Stabilizer Insert. 5/16" 1.50

Howatt Stabilizer Flex-Connect. The Flex-Connect provides a flexible connection between the Custom Stabilizer and the handle riser. It acts to cushion both limb shock and stabilizer reaction at time of release. Like the Howatt Custom Stabilizer it is finished in black and gold. 9.95

HOWATT SPRING LOADED PRESSURE POINT
Another of HOWATT'S quality accuracy accessories. The Spring Loaded Pressure Point is fully adjustable both as to spring tension and for distance from the side of the window. Nicknamed "panic button", it is standard on the Del Rey and is available by special order on other models. 4.95

HOWATT MICRO-SIGHT

The Howatt Micro-Sight is designed to provide infinite and accurate micrometer adjustments for both windage and elevation. The sturdy mounting arm attaches to an integral mounting plate on the handle riser permitting the removal and remounting of the sight without recalibration. All prisms and wire mounted apertures can be accommodated. Finish is black and gold which coordinates with other Howatt accessories. 25.00
7" Sight Extension Arm 8.95

HOWATT GUARANTEE

Each HOWATT bow is fully guaranteed against glass failure or delamination during normal use for one full year and replacement or repairs will be made for 50 percent of the retail cost during the second year.

IMPORTANT—No adjustment will be made when breakage or failure is due to abuse or misbandling. Otherwise, should failure occur, please contact your dealer or DAMON HOWATT ARCHERY MANUFACTURING CORP. for instructions.

All prices are F.O.B. Yakima, Washington. Specifications and prices are subject to change without notice.

Terms are net 30 days, however all orders will be shipped C.O.D. unless order is prepaid or open account has been approved by HOWATT.

Minimum order is \$5.00.

No returns will be accepted without proper authorization from HOWATT ARCHERY MANUFACTURING CORP.

We urge all HOWATT bow owners to use a bow stringer to string their bow. In lieu of that, use a method of stringing that will minimize the twisting of the bow limbs—the cause of most bow breakage. Fistmele (brace height) is so dependent upon the style of the shooter that it is impractical to specify fistmele measurements for HOWATT bows. HOWATT bows are equipped with strings that will provide proper fistmele in most cases. Because of a particular shooting style, it may be necessary to tighten the string by twisting it to obtain maximum performance.

All HOWATT bows are made of the finest materials available. These exceptional materials together with more than 25 years of bow making experience are combined to produce the world's best performing and most beautiful line of modern bows.

No. 112 Arm Guard. Same style as No. 110, but made of tough vinyl bonded to leather. Available in black only. 2.25

No. 121 Arm Guard. Same as No. 122 only with velcro fasteners. 7 in. long. 4.00
