

Firewise Charter

Firewise is a program offered through Texas Forestry Services that provides a certification process which compliant communities can achieve. The benefits of being firewise certified include potential insurance savings for homeowners, assistance from the forestry service in firewise programs, ability to petition for grants, and finally a heightened community awareness that comes from an active firewise program.

In support of the Eagle Landing Firewise program, a committee has been formed to define, implement, and oversee all Firewise activities. The responsibilities of this committee include but are not confined to the following items.

1. Know all requirements for being 'Firewise' certified and ensure that the community is compliant with those requirements
2. Apply yearly for renewal of our 'Firewise' certification
3. Disseminate information on 'Firewise' best practices and any other pertinent information to the Eagle Landing community.
4. Identify through a process of vigilance and passive monitoring any potential issues which elevate the threat of wildfire in the area
5. Coordinate 'Firewise' projects aimed at mitigating the threat of wildfires
6. Conduct regular meetings to review 'Firewise' status and to define required activities and projects.
