**Yield & Income Factors:** Base Moisture = 15.0% Shrink = 1.3 Drying = \$0.030 Prices: GMO = \$3.20; non-GMO = \$3.20

**Test Comments:** *Corn in this area was some of the first that we planted. Stands were excellent. Good rainfall and plentiful heat degree units made for a nice uniform location. Plants stood well and stalk quality was excellent. There was little to no disease present at harvest. Ear size was good and most hybrids were filled out close to the tip. Bruce commented, that the surrounding field averaged around 215 bu/a.*

† See last page for abbreviation descriptions. Dark colored row identifies the check product found in early- and full-season tests. **Bold** yields are significantly above test average by LSD(0.10). **Italicized** brands exceed the grain moisture limit for this test. **ns** = column values not significantly different
