

LISTENER'S GUIDE TO WDAM RADIO'S HISTORY OF THE MONKEES

Here they come! It's the Monkees ... as you've never heard them before! *WDAM Radio's* production staff obviously had too much time on their hands, so they got into some big time monkey business! And now you have more than three hours of tunes to monkey around with on your hifi or MP3 player.

Not only will you enjoy every Monkees hit ever, but also the original versions of songs they covered, as well as hit covers of their tunes by other artists. And as yet another *WDAM Radio* exclusive, we've also included every hit ever by individual members of the Monkees as solo artists. Naturally, all of this is in precise chronological order!

And there's more. (Did you expect less?) *WDAM Radio* remembers all of the Monkees album cuts that were not released as singles, but should have been, and were played lots of lots on the radio anyway. You'll remember them, too, because they're included in this collection...along with some rare "missing links" from the Monkees.

All of us at *WDAM Radio* hope you'll enjoy this collection as much as we did putting it together.

Rock on!

Radio Dave
