

UGLY

Fruit & Veg

IT'S WHAT'S ON THE INSIDE THAT COUNTS!

10 Reason Why You Should Support Ugly Fruit and Veg

Food Waste

1. As much as 40% of produce goes uneaten because it doesn't meet retailers' strict cosmetic standards ([U.K. Global Food Security Programme](#)) ([NRDC](#)) ([United Nations Environmental Program](#)). In other words, that produce is considered wonky or "ugly" fruit and veggies (veg).
2. About 50% of all wasted food happens at the farm and in transit before the food even reaches the distributors, stores and our plates ([FAO](#)). Much of this waste is due to retailers' strict cosmetic standards for produce.

Hunger

3. About 1 billion people are chronically undernourished or "hungry" ([FAO](#)). Our extra (often wasted) food, could feed the world's hungry more than their entire diet ([Tristram Stuart](#)).
4. There will be an estimated 9 billion people in the world by 2050. With that, and more and more soil becoming unusable, 70% more food will be needed than we produce today ([FAO Report](#)).

Climate Change

5. Approximately 10% of human-made greenhouse gas emissions come from producing, transporting, storing and preparing food that is never eaten ([Tristram Stuart](#)).
6. If we planted trees on the land we use to grow food we waste, we could theoretically offset a maximum 50-100% of the world's human-made greenhouse gas emissions ([Tristram Stuart](#)).

Growth in Ugly Fruit and Veg at Major Retailers

7. After finding ugly fruit and veg is just delicious and nutritious as other produce, the growth in selling "ugly" has exploded around the world since [Intermarche's Inglorious Fruits and Vegetables campaign](#) in France in Spring 2014. For more, please click [here](#).
8. In a U.K. study, almost half of those surveyed are interested in buying ugly fruit and veg. And in 2012 the "ugly" market was the fastest growing produce sector in the U.K. ([Mintels](#)).
9. Some retailers such as [Sainsbury's](#) are committed to selling "ugly" to support by buying all fruit and veg from farmers due to their impressive [Courthauld Commitment](#) goals of 1% waste.
10. In the U.S. in 2016, a full [seven new supermarkets](#) started selling "ugly" produce where only one had sold them previously.

So while you can find "ugly" or cosmetically imperfect fruit and veg at farmers markets and small corner markets, [supermarkets now represent 75-80% of all food retail outlets in the developed world](#). That is why it is important to support supermarkets with ugly fruit and veg lines/ranges. **Click [here](#) to find out where "ugly" is (or isn't) being sold around the world and to demand your supermarkets sell ugly!** You can also follow [@UglyFruitAndVeg](#) on social media and visit [www.UglyFruitAndVeg.org](#) for more info and [#Funactivism](#).
