

Health Action Team Agenda

Our community will address social, emotional, mental and physical barriers to success for all learners.

Digital Meeting

Plans for the Future

- I would like to see continued focus on educating adults in the community on the power of connections and relationships.
- Opportunities for adults/teachers/ mentors to “hang out” with kids during school based social events..... maybe more adult help at APAC sponsored events and or events where kids are already attending, maybe socials prior to concerts, positive tailgates before games, outdoor game nights at schools or parks. I think more adults need to see the good in kids and kids need to see adults show up.
- I would like to advocate for more direct mental health people/ activities in school.
- Sustainable year-round gardens for schools to reduce lunch costs and have an outdoor learning experience in winter.
- Continuing bright spots and other such programs.
- Continue to focus on “Bright Spots”. Also continue to advocate for more parent support from AMC, and the entire health community
- Is there a way to find out if the mobile clinic around town is utilized? Maybe we could focus on if that is something we can help promote in an effort to bridge the gap between need and access?
- Personally, I would love to find a way to get more mental health support into the schools, but I’m not sure that is really within the scope of our group.

Next Meeting

August 7 @ 5:00 pm
