As well as 4 optional social outings to practice learned social skills!

PEERS® for Adolescents, developed by UCLA's Dr. Elizabeth Laugeson, is a 14 week evidence-based social skills intervention for motivated students who are interested in learning new ways of making and keeping friends. During each group session, teens are taught important social skills and are given the opportunity to practice these skills in session during socialization activities. Parents attend separate sessions at the same time and are taught how to assist their teens in making and keeping friends by helping to expand their teen's social network, and providing feedback through coaching during weekly socialization homework assignments. Parent participation is required.
