

The Story of Day Two

Genesis 1:6-8

The light of the first cycle of light called Day One is fading away and the evening of Day Two has begun. The time of darkness has begun, but there is a surety that light will return again. On the first day the god chose to use its creative power to change darkness. Today it chooses to change the waters.

And the god said:

*“Let there be a **RAQIYA** – **a solid dome-like structure** –
in the middle of the deep waters
that separates the waters beneath it from the waters above it.”*

*And the god made the **RAQIYA**.*

*And the god named the **RAQIYA** “**SHAMAYIM**” –
The Two Theres or **The Two Names**.*

The god changed the deep waters by placing a solid dome-like structure beneath the surface of the waters. It was solid enough to create two separate bodies of water – one body of water outside the dome and one body of waters inside the dome.

*The god completes this solid dome-like structure as evening approaches once again. Its arrival signals the end of the Second Cycle of Light, Life & Enlightenment -- **Day Two**.*

These are a very important Bible verses because in your English translation **SHAMAYIM** is probably translated as either “**Heaven**” or “**heavens**.”

*Did you picture a solid dome-like structure submerged in deep waters when you read Genesis 1:1 – “God created the **Heaven(s)**” -- before now?*

*Are you planning on spending eternity
in the sold dome-like structure pictured above?*

*How important is the word “**Heaven**” in your Belief System?*

Before we move on the *Third Cycle*, it is important to note that the god does not measure the *solid dome-like structure* with its **TOV Standard**? Why? It is because the structure hasn't fulfilled the purpose for which the god made it -- *it isn't functioning like it is supposed to function yet.*
