*Contractors are facing very difficult times in the following areas:*

- high cost of fuel
- increasing productivity
- being OSHA, Canadian Safety Compliant
- being economically competitive & prosperous

*Would You Like To... Save Time... Improve Profits... and Be OSHA Compliant?*

The answer to this question is a Simple, American Made Product, that has been time tested for over 20 years...with Unique, Uncomplicated features such as:

- **Maximum Versatility...**
  - Model 139 - w/ a max Platform height of 19'-6" with an Working height around 24' to 25'.
  - Model 195 - w/ a max Platform height of 25'-6" with an Working height around 30' to 31'.
  - All-Directional-Leveling on both RUSTGO Models by the simple use of the winch system & adjustment rods.
  - Front & Rear Steering for easy maneuvering into close & difficult places.
- **Minimum Maintenance** due to a simple design and manually operated controls.
- **Tows Safely** at highway speeds behind a ½ ton pick-up truck without CDL license. **NO NEED** for any specialized equipment or trailer.
- **Safer and More User Friendly Winch System** for all platforms, that features better handling to adjust platforms at your desired height.
- **Gate Entrance Design** for Main Platform, is spring loaded to close automatically after entering.
- **Standard 15" automotive type wheels & tires, OR optional 11" Wide Wheels & Floatation Tires.**
- **Manual hand operated brakes** on all 4 wheels.
- **Quick Safety Pins** make the assembly & disassembly quick and easy without the use of any specialized tools.
- **Pressure Treated 1" x 4" Toe Boards, & ½" Decking** on all Platforms.
- **Special Non-Skid Surface and Deck Protection** for longer deck life & greater safety. (optional)

**THERE IS SIMPLY NOTHING AVAILABLE AS UNIQUE, VERSITAL, SAFE, AND COST EFFECTIVE AS The RUSTGO *ALL-TERRAIN MOBILE WORK PLATFORM!***

**Our web-site is the best way to see the different applications and jobsite conditions that the RUSTGO All-Terrain Mobile Work Platform can be used.**

**Compare the RUSTGO to any other method of scaffolding up to 31' of working height!**  
**Why not consider the advantages of owning your own RUSTGO All-Terrain Mobile Work Platform?**

# COMPARE the RUSTGO FACTS

**Alternatives:**     Scissor Lifts Electrical & Fuel Driven / Arial Man Lifts  
                          Fork Lifts w/ a Platform / Stack Scaffolding

## SCISSOR LIFTS, ARIAL MAN LIFTS, & FORK LIFTS:

- Each of these types of equipment functions with electrical motors, or engines that require expensive types of fuels like gasoline or diesel fuel.
- This type equipment has complicated hydraulic systems; this requires a certified mechanic to do maintenance and repairs.
- The transportation of this type equipment from one location to another requires in most cases a large truck & trailer, special permits, and a CDL licensed driver.

## STACK SCAFFOLDING:

- Scaffolding is very labor intensive.
- In most cases you have to be certified to the proper way to level and erect scaffolding, especially when a large project is on-going.
- Scaffolding can clutter up a job site and take up space that could possibly benefit other sub-contractors.

## The RUSTGO All-Terrain Mobile Work Platform:

- Has Simple manual winches on both uprights to lift the platform levels to the desired heights, and hand operated manual brake on all 4 wheels.
- Maintenance consist of lubrication of grease fittings and platform slide racks.
- No certified mechanic required...just good common mechanical sense.
- Multiple Platform Levels on one machine allows two men to work on each platform level.
  - The RUSTGO Model 195 can have as many as 3 platform levels = 6 men on task.
  - The RUSTGO Model 139 can have as many as 2 platform levels = 4 men on task.
- Transportation of a RUSTGO machine is simple...just use a 1/2 ton pick-up truck to tow it to your job site. Towing can be done at highway speeds in most all cases.
- The RUSTGO Model 139 can be ready to work in 10 to 15 minutes after you arrive at the job site.
- The RUSTGO Model 195 erection is a little more detailed. The first time, 2 to 4 men can erect this machine in about 45 mins. to 1 hour after you arrive at the job site. The erection time should decrease once the workmen get acclimated to the erection procedure, in most cases, about 30 mins.
- Leveling & Plumbing the platforms is simply done by using a manual winch system and adjustment rods on each upright.
- Easily Moved around a job site by steering from both ends and using a 1/2 ton truck, a 4 wheeler, or just a couple of men.
