

Because things can get ugly out there.

Scotchgard™ Paint Protection Film Pro Series helps preserve the quality of your vehicle's finish, can enhance the resale value and keeps your vehicle looking newer longer.

Chips: gravel and other road debris can be launched at your car and can chip your paint.

Scratches: sharp objects like keys, rings, watches, can scratch handles and doors.

Stains: bugs and bird droppings contain acids that eat away at the finish.
