

8-Hour Confined Space Entry Safety Course for Entrants, Attendants, and Entry Supervisors

Course Director/Instructors

John M. Fernandez, CIH, CSP, CMC - Industrial Hygiene Professionals, Inc. (Course Director/Instructor)

Jim J. Brandt, CSP, CHST, CET - Industrial Hygiene Professionals, Inc. (Instructor)

Benefits

OSHA requires that employers provide training to all employees whose work involves permit-required confined spaces (29 CFR 1910.146) and confined spaces in shipyards (29 CFR 1915 Subpart B). This course is designed to provide the basic knowledge needed by entrants, attendants, and entry supervisors to recognize, evaluate, and control the hazards associated with confined space entry. Course participants who successfully complete this course should be able to: define terms specific to confined space entry; identify current standards governing confined space entry procedures; demonstrate the proper operation of certain testing instruments and explain their limitations; and describe appropriate ventilation, personal protective equipment, and emergency procedures that are necessary for entry confined and enclosed spaces.

Who Should Attend

Industrial hygienists, emergency medical personnel, firefighters, safety professionals, police officers, sanitary engineers, public works employees, chemical workers, waste water treatment workers, tank cleaners and anyone whose work involves entry into confined spaces.

Selected Course Topics

- ❖ *The ANSI Confined Space Standard*
- ❖ *Federal Regulations and Guidelines*
- ❖ *Recognizing Hazards in Confined Spaces*
- ❖ *Air Monitoring Instrumentation*
- ❖ *Ventilating Confined Spaces*
- ❖ *Personal Protective and Safety Equipment*
- ❖ *Confined Space Entry Permits*
- ❖ *Confined Space Entry Emergencies/Rescues*
