

DEGREASER

YJ-590

GREASE DISSOLVER - POWDER

- ✓ Dissolves protein.
- ✓ Removes carbonized and greasy soils.
- ✓ Quick and efficient action.

WHAT IT IS FOR

High power grease removal, contains a metasilicate alkali source and surfactants to saponify and emulsify oil and grease. With minimal effort grease is washed away.

RECOMMENDED DOSAGE

10 to 40gr per liter of water, depending on the soil level.

USE

For fryers

Allow to cool and then drain off into a container. Fill fryer to maximum level with clean water. Add 4-20g of product per litre. Heat to 90 degrees for 20 minutes. Drain solution into heat resistant container then pour down drain. Rinse with hot water.

For filters and oven shelves

Prepare solution with 20g/litre hot water in a sink or soak tank. Soak for 30 minutes. Drain and rinse with hot water.
