

PRODUCT DATA SHEET

FINALE® - HERBICIDE

DESCRIPTION

Finale® Herbicide is a nonselective water-soluble herbicide for application as a foliar spray for the control of a broad spectrum of emerged annual and perennial grass and broadleaf weeds. Plants that have not yet emerged at the time of application will not be controlled. THOROUGH SPRAY COVERAGE IS IMPORANT. Visual effects and control from application of Finale Herbicide occur within 2 to 4 days after application under good growing conditions.

Avoid all contact with foliage or green tissue of desirable vegetation. Avoid direct spray contact with green, thin, and uncalloused bark of desirable vegetation or plant injury may result.

Finale Herbicide works best when weeds are actively growing. Weed control may be reduced when applications are made to weeds under stress due to drought or cool temperatures. Weeds under stress or in dense populations will require application at the highest rate recommended.

FEATURES

- **FAST ACTING & RAPID CONTROL – VISIBLE RESULTS IN 1-4 DAYS UNDER MANY CONDITIONS**
- **LONG APPLICATION WINDOW**
- **ONLY KILLS WHAT YOU SPRAY IT ON**

USE AND DIRECTIONS

SPOT APPLICATION: Apply 2 fl oz per gallon of water when weed height or diameter is less than 6 inches. Apply 3 fl oz per gallon of water when weed height or diameter is 6 inches or greater.

BROADCAST APPLICATION: Apply 3 qt per acre when weed height or diameter is less than 6 inches. Apply 4 qt per acre of water when weed height or diameter is 6 inches or greater.
