- Silkscreening • Steel • Aluminum • Stainless
- Design & Engineering Assistance • Solid-Works

Sheet Metal Fabrications- we produce metal brackets, panels, covers, boxes and enclosures.

Metal Types Used- carbon steel, aluminum, copper, brass and stainless steel. In regards to the metal used; the thickness utilized is 28 gauges steel to 9 gauge steel.

CNC Machining- we are a precision CNC machining facility. We handle parts from 1-inch to 20-inches in size. We machine the same type of metals as listed above.

Assembly Manufacturing- we are a turn-key mechanical assembly manufacturer. We have 30 employees and are located at a 32,000 sq-ft facility.

HUBZone certification# 17637

SDB certification# 0909-1263p

ISO-9001

- Screen Printing • Etched Metal • Bar Code
- Photosensitive • Panel Overlays • Serializing
- Lexan • Mylar • UL & CSA Approved

PROPERTY IDENTIFICATION NAMEPLATES, BAR CODES & LABELS *FOR INVENTORY & ASSET CONTROL*

FEATURES:

- Custom made to your specifications
- Bar coded for easy, permanent control
- Adhesive backing or mounting holes
- Human readable serial numbers plus bar code
- Thicknesses from .005 to .125
- Large selection of stock tooling
- Gloss or matte finishes
- Tamper proof material available

***Purchase direct from
the manufacturer.***

QNP also manufactures pressure sensitive labels, nameplates, dials, and various advertising specialty items such as rulers and key tags. Aluminum, brass, stainless steel, foil, and assorted plastics are used in fabrication.
