

SAGACIOUS INVESTMENT SERVICES

Doug is an experienced investor and trader who has for many years focused on training people throughout Australia in the skills of 'trading for profit'. It was as a consequence of his relationship with many clients that 'Sagacious Investment Services' was established with the mantra:

"Financial Wisdom is to learn from the past, invest in the present to profit in the future."

The major challenge for retail (Mum & Dad) traders is not just learning the skills but also finding time to apply those skills. An industry was created whereby businesses offered 'fantastic returns' however there was no guarantee of preserving the investor's capital or even any ROI. Sagacious Investment Services addresses both those concerns and delivers an exceptional ROI, and guarantees both capital and a very competitive interest rate for investors (more than 3 times the 12 month rate that the major banks currently offer).

Sagacious Investment Services Mission Statement:

To provide retail investors with a competitive, risk-free investment service.

In the 'corporate world' Doug is a qualified senior manager, and served in the army reserve and police force. The skills, discipline and decision making processes acquired in those professions are major contributors to his trading success.
