Roman Shades on Drapery Hardware

Shown as assembled set. Available as round 5/8" diameter rod only. Available While Supplies Last.

Fina Collection Thin Line Drapery Hardware

Available for 1/2" rod diameter only. Finials as exterior fit only. Rod and rings not included.

3D Drapery Hardware

Finials in Front of Rod

Explore new window designs with the ability to have the finial in front of the rod. Finials can also be manually adjusted to be above or below the rod simply by changing their position to enhance the window covering presentation.

Combined with our master carriers, which help reduce light gaps, this system is also great for tight areas where you may not be able to fit the finial you would like to use when using conventional drapery hardware.

Nearly all our finials are available for use with the 3D system (some exceptions are listed on page 27). Rods are 1" diameter in either round hollow smooth (Iron and Italian) or hammered styles (Iron only). Choose from 35 Iron Art™ finishes, 5 Italian finishes, or your own custom finish.

3D Drapery Hardware

Finials in Front of Rod

3D Drapery Hardware can be used with single or double rod systems. Back rods in the double rod system are the same length as the front rod, including their end caps. Straight master carriers allow the drapery to pass the end brackets, giving you maximum window coverage. Begin your order by selecting your 3D Drapery Hardware Kit from the selections below.

3D Drapery Hardware Kits:

3D Single Kit:

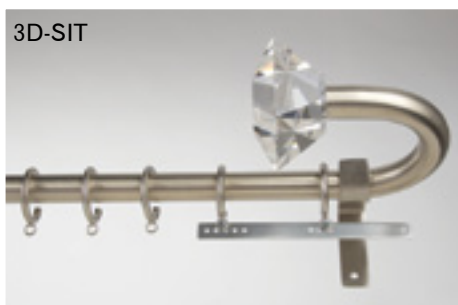

- Two 180° U-Bends for one iron rod.
- Two straight master carriers for rings.

3D Drapery Panels

Finials and Stationary Panels in Front of Rod

Introducing our latest product addition, 3D Drapery Panels. Similar to our 3D Drapery Hardware, 3D Drapery Panels allow you to have the finial in front of the rod, perfect for tight spaces. But now the wrap around front portion of the rod can be used for stationary panels. Just give us the length up to 24" on each side.

Specially designed brackets provide support for the front panel rods. Bypass rings for the functional drapery behind the panels allow the curtain to pass under the support brackets.

Available for 1" smooth round hollow rods in 35 Iron Art™ finishes, 5 Italian finishes, or your own custom finish.

3D319DC Bracket

Manual and Motorized Traversing

Orion's traversing systems come with many great features, plus plenty of options to choose from.

When using traversing, draperies will open and close easier than traditional rod and ring combinations through the use of heavy-duty glides, tracks and pulleys. With these heavy-duty systems you can safely hang up to 62 pounds of drapes on a 16 foot track; great in these days of lining and interlining. Single or double track systems up to 30 feet in length allow for a wide range of drapery styles. Front tracks are available with or without rings.

Our cord or baton drawn traversing collections include Designers' Choice (Iron, Wood, and Italian fascia styles), Tuscany Traversing (lightweight embossed metal rods), and Deco Lite Traversing (lightweight embossed metal panels). All these collections can be motorized with Somfy.

Orion offers nearly 200 different finials and 52 beautiful finishes to compliment your traversing system. You can even do your own custom finish. With so many options to choose from, you're sure to create that perfect design!
