

THE VIPER

- Small 6 Fr. distal tip for less trauma
- Dual 270° up/down distal deflection for easy navigation
- Ergonomic design for better control and less hand fatigue
- Built-in dual 3 mm luer bridge for quick, simple connections

THE VIPER

The Viper's small 6 Fr. distal tip self-dilates to 8.8 Fr., which allows for easy introduction, increased durability, and stability throughout the flexible shaft.

- Award-winning ergonomic handle design makes the Viper easy to maneuver and reduces user fatigue
- Simple deflection lever allows easy control of the distal tip

- Built-in dual 3 mm luer adapter enables quick and easy attachment of irrigation lines and sealing adapters

- Optional 3 Fr. flexible grasping and/or biopsy forceps

Numerous reprocessing options, including:

- STERIS System 1E™
- STERRAD®

Richard Wolf also offers trays, flexible scope brushes, sealing caps, and other reprocessing accessories.
