

Sylvie

Residential DSP

3 years

Sylvie has been a Direct Support Professional in the Residential Program with MYEP for over three years. Sylvie is an incredibly dedicated staff member who continuously strives to learn, listen, and support the individuals she serves to the best of her abilities. Sylvie tailors her supports and services to best suit the individual she is working with and is able to adapt to meet their needs. Sylvie primarily works with individuals who have limited communication abilities. She has spent years getting to know them and educating herself on their characteristics and personalities. Sylvie has worked hard to establish positive rapport with them and is able to identify when they communicate their wants, needs, goals, and priorities. She not only identifies their choices and preferences by listening to them and understanding them, but also assists by communicating for them and advocating for them to supervisors, community members, family members, and others. Sylvie is a prime example of what advocacy truly means. She demonstrates equality, inclusion and empowerment when supporting individuals and encourages them to make decision within their lives. Sylvie always puts the person first and has had a positive impact on the lives of many individuals. She stands beside them and ensures that they truly feel heard, no matter the situation.
