

Dear member of the Cooperativa A/C Rafael Carrión, Jr.:

The Doctor tells us: “Cancer.” We lose our breath. When we regain our composure, many things come to mind: Will I survive, how much will the illness cost, will I have to miss work, what should I do so that the children are not affected much, that I may continue to pay the mortgage, feed my family and provide for their entertainment?

Life does not come to a stop. At that particular moment we need resources to afford the costs of the best treatments, and support to minimize the impact of the illness in our lives and the lives of our loved ones.

Fortunately, with the scientific development of new better treatments, a cancer diagnosis is not a death sentence. For that reason, and many others, it is important to count on PLAN MAX V, which offers a wide array of benefits to treat cancer and other pernicious diseases.

This plan is available to you and your family at a cost of:

- | | |
|-------------------|----------------|
| ■ INDIVIDUAL PLAN | \$4.00 a month |
| ■ FAMILY PLAN | \$7.00 a month |

Don't delay. Regardless of the excellent medical plan you may have, it is always convenient to count on a supplementary plan that will help you with the costs of treatment for cancer.

The cancer plan we are offering has a wide array of benefits that you certainly would want to know, at a cost that you can afford. For information, contact me today.

In addition to the cancer plan, we have designed other products to protect what is most precious to you: your life and your health.

Remember that at COSVI... ***more than insuring your life, we want you to live it.*** Call today.

Cordially,

Joan Cruz
Insurance Producer
