

Longhorn Organics

Environmental and Aquatic Consulting

Chris Faucett joins the Longhorn Organics team, providing experienced management of aquatic based facilities with an expertise in live aqua-feed systems. Chris earned her B.S. in Marine Biology at Texas A&M at Galveston in August 2002 and achieved her first industry position as a Marine Biologist with The Aquarium at Moody Gardens, located in Galveston, Texas. Successful focus on live food grow-out procedures at Moody Gardens led to further employment at The Oklahoma Aquarium where Chris managed a staff of accomplished micro-biologists and aquarists. Through her leadership and husbandry experience specialty species exhibits thrived.

In late 2005 Chris earned another leadership role with Wildlife World Zoo & Aquarium near Phoenix, Arizona. The position was in pre-opening of an aquatic themed expansion of an existing zoo facility. Chris' responsibilities included animal sourcing and procurement, exhibit design and construction, as well as full facilities and staff management. However, specific focus was given to additional research and perfection of live food grow-out methods. Chris's methods include protocols for bio-security and propagation to achieve maximum growth density and efficiency. This specialty area of work requires a high degree of quality control and accurate recordkeeping to maintain exacting protocols.

Chris's well-rounded expertise in the design, build, manage phases of aquatic facilities caught the attention of Longhorn Organics in 2014. Since joining the Longhorn Organics family Chris has become a valuable member of the project management, construction, and quality control staff. Chris brings with her several additional industry qualifications including:

- AZA Management School-Managing for Success: Organizational Development
- MSEC-Supervision: Core Competencies
- NAUI Master Diver, Caver, Rescue, Nitrox Diver, Scientific Diver training, Dive Master candidate.
- Certified Paramedic-Emergency Medical Technician
- OSHA 10 Certified
