

# RECORD OF PROCEEDINGS

## KREMMLING SANITATION DISTRICT

---

REGULAR BOARD MEETING  
MAY 13, 2019

The Board of Directors for the Kremmling Sanitation District met in the boardroom located at 200 Eagle Avenue. The meeting was called to order by President Jason Bock at 6:00 p.m. Directors present: Jason Bock, Dave Sammons, Dwayne Uhrich, Eric Bradley and Ken Bentler. Director(s) absent: None. Staff present: Superintendent Jeremy Bock and District Manager Rich Rosene. Audience present: None.

**APPROVAL OF MINUTES:** BRADLEY MOVED TO APPROVE THE REGULAR MEETING MINUTES OF APRIL 8, 2019 AS PRESENTED. SAMMONS SECONDED. MOTION CARRIED.

**APPROVAL OF EXPENDITURES:** BENTLER MOVED TO APPROVE THE EXPENDITURES PRESENTED FOR THE PERIOD OF APRIL 9, 2019 THROUGH MAY 13, 2019 IN THE AMOUNT OF \$60,405.68. UHRICH SECONDED. MOTION CARRIED.

**PUBLIC COMMENT:** None.

**ENGINEER'S REPORT:** Bock said that the engineer is working on a proposal for the Town Manager to present to the Town Board for the extension of the reuse water line to Ceriani. Bradley asked if the cost would be all on us or shared with the town. Bock said that he is hoping to present it so that the town would pick up the cost. We currently have the ability to take on the school properties but that would hurt the town water revenues. His thought is to have the town take on the cost to keep from losing the school revenue. Ceriani Park uses about 30,000 gallons per day (gpd). He has parts ordered for the town square and he hopes to have it hooked up next week. Town square is about 11,000 gpd and the cemetery about 43,000 gpd, so we are at about 84,000 gpd. We are getting inflows of about 150,000 gpd. It would take about 3,200 feet of 6" purple PVC pipe to go from the high school to Ceriani Park.

Bock said that grant funds may be available as this would be considered a "green" project. We may be able to look at something like a 25% Town, 25% District and 50% grant to cover the cost. The line only needs to be four feet deep and there would be 3 or 4 pavement cuts. Valves would be installed at the bottom of the hill to drain the line and one at the top to be used to blow out the line. Bock said it may be most cost effective to do the work by hiring an excavator and having the Town and District employees doing the installation work.

**OPERATOR'S REPORT:** Bock said that he would like to install a sprinkler system around the ponds and plant to use more reuse water. He estimates that this should use about 30,000 gpd and the irrigation season is longer than in town. All of the parts will be purple pipe and fittings which increases the cost over regular pipe and fittings. The cost estimates are \$3,100 for pipe, \$10,000 for parts, \$5,500 for labor from Neils Lunceford, and trencher rental for about \$500 for two days for a total cost of around \$19,000. There would be 9 sprinkler zones around the plant. He has Brandon from Water Technology Group also looking into parts and fittings costs and hopes that the cost may come down a bit. The town is waiting on the purple meter and backflow preventer for the town square. The additional irrigation use of reuse water is going to help take some pressure off of the town water plant as it is often up against its limits on daily production. The town expects to have to build a new water plant in the next 5 to 10 years. This can also help to provide some of the water needed for any new growth before the new plant is built.

SAMMONS MOVED TO DO THE IRRIGATION PROJECT AT THE TREATMENT PLANT FOR A COST NOT TO EXCEED \$20,000. BENTLER SECONDED. MOTION CARRIED.

Bock is looking to hire Mason Lemon as the summer seasonal. The jet truck had some issues last summer so he was unable to get the entire town jetted. After completing the jetting, he then plans to get more camera work done to get the tap records up to date as the old paper records are difficult to get good information from and correct addresses. He still needs to get the lump out of Pond D.

The ammonia was at 0.01 mg/L as Pond A has really kicked in and is treating ammonia in the effluent very well. The soda ash machine is working well and he is hoping to get down to about 6 pallets per year at a cost of about \$1,200 per pallet. He also hope to reduce the chemicals cost from about \$12,000 to \$8,000. Bradley asked if the additional bugs were supposed to continue to regenerate themselves and what their life expectancy is. Bock said that the bugs are hard to quantify but that they do reproduce while in the system. As the bugs go through the ponds, some do go out in the discharge and are treated by ultraviolet light before they go to the storage ponds so these need to be replaced by the addition of bugs each day.

Regular Board Meeting  
May 13, 2019  
Page 2 of 2

**OLD BUSINESS:** Rosene said that when he returned from his trip to Minnesota a couple of days after the April board meeting, there was a signed agreement from the Hotel Eastin indicating they would go ahead and pay the additional amount each month for the next 16 months. Rosene went over to the hotel and talked to Maryann Van Lue about the agreement. He told her that the additional payment needs to be entered manually so an occasional late fee or interest charge may show up and to not get concerned as they will be removed at the next billing cycle. There was no indication if they were going to pursue any legal action.

The annual board workshops put on by the Special District Association are coming up. The closest will be in Granby again on June 14 at 8:00 am. Bentler said he will plan to attend. Rosene will get the registrations completed.

**NEW BUSINESS:** None.

**ADJOURNMENT:** UHRICH MOVED TO ADJOURN AT 6:35 PM. BRADLEY SECONDED. MEETING ADJOURNED.
