

THE BRISTOL

- 3 bedrooms
- 2 baths
- 1600 square feet

It's hard to beat the Bristol plan for charm and convenient living space. This home has a covered front entrance that enters into an open floor plan. There are plenty of windows in each of the rooms to allow for natural light to enter the home. The mudroom doubles as a drop zone with a bench and hook area along with the laundry. The master bedroom is tucked away from the traffic flow and includes a private bath with a separate water closet and walk-in closet. Two additional bedrooms are located in a private hall off the family room and share a hall bath with guest access from the living areas.
