# FlowControl
## Ticketless Entry System

# FLOW PAY STATION

## USER INTERFACE

The Flow Thru system allows daily visitors to pay at standalone pay stations with a soft credential control column and Hi bright LCD display 6.4" or optional 10.1" LCD touch screen. Using their 7-10 digit phone on a 16 button illuminated keypad with a parker support and guidance system via intercom. Once the payment has been process the daily visitor can proceed to the exit allowing the cameras at the exit to recognized the daily visitor's license plate as paid; thus opening the gate for the parker without interface at the exit. Optional variable message signs are available.

## FEATURES

The Flow Thru ticketless Pay-On-Foot station (POF) features a 10" ruggedized touch monitor designed to capture the customer phone number and display the customer License Plate. The Flow Thru POF includes Cash and Credit Card payment options with a Cash Bill Recycler. Optional coin processing and online real time cloud reporting where no local servers are necessary. Additionally the POF includes a receipt printer.
