## LOGISTICS MANAGEMENT

We offer our services either to companies in their startup or for those implementing a new logistics function.

Logistics Management is also provided to companies expanding their logistics resources.

Under Logistics Management falls

**INVENTORY MANAGEMENT**

**BUSINESS CONTINUITY MANAGEMENT**

We provide both one time and periodical consultancies.

We conduct Physical Inventory Counts.

We provide resident consultants for leading, on a long term basis, logistics functions on customers' locations.

We monitor logistics change management in companies, change being in people, systems, equipment or facilities.

We also monitor transition periods and handovers when outsourcing part or all logistics functions to 3PLs.

We help companies draw a flawless operational cycle, write logistics procedures manuals, job descriptions and elaborate and execute training programs.

## LOGISTICS SYSTEMS IMPLEMENTATIONS

We help identifying the right logistics systems for you  
(ERP, WMS, TMS, VMS,...)

We monitoring their implementations

We also monitor related training of staff for a smooth transition from old to new system.

## LOGISTICS AUDIT

The Logistics Audit at Imdad Logistics assesses the logistics performance of an entity.

Following the preset scope of audit, our audit mission can cover each and every function of the supply chain cycle (Sourcing, Procurement, Freight, Customs, Warehousing, Distribution, Transportation, Customer Service & Sales).

The Audit findings/report will come out as a strategic plan for logistics initiatives proposing corrective and preventive Risk based actions.

The Logistics Audit presents a comparative analysis between current activity metrics KPIs and targeted international benchmarks and normal practices.

## LOGISTICS BUSINESS PLANS

Writing a logistics business plan is a job only a logistics professional can accomplish.

The specificity of logistics data for

Market Feasibility Study,  
Operational Feasibility Study &  
Financial Feasibility Study

makes that feasibility studies, where all parts are interlinked, can be combined and analyzed only by logisticians leading to sound decision making.
