

## **Family Style Service: Sample Menu**

When your dinner is served in this style, your guests receive their food all at once, leaving more time for them to enjoy the event you've planned. Each guest can take as much or as little from the platters that are delivered to the table as they please, reducing waste and ensuring that everyone gets the plate that they're looking for. This style of service helps to create a comfortable, conversational atmosphere like you would find around your dinner table, making your guests feel at home and welcome on your big day.
