

## Using Checkin Here, Ok and Pick Me Up Notifications

The following is an overview of one of the most useful features of GeeZee Locator/Reporter which allows a child/senior to quickly and silently communicate with their parent or guardian with the following three hot buttons:

**Here:** Send an alert to reporter when child has reached their destination address with location (latitude/longitude) verification and map showing directions from reporter location to their destination address.

**OK:** Send an alert to reporter that child is ok but feeling uncomfortable at their current address location (latitude/longitude) with a map showing directions from reporter location to their current address.

**Pick Me Up:** Send an alert to reporter that child is ready to be picked up at their current address location (latitude/longitude) with a map showing directions from reporter location to their current address.
