

Lincoln Heights Industrial Zone receives \$5,000.00 grant from Keep Los Angeles Beautiful

The Board of Directors received notification in late January that they received the grant. The grant request was initially for \$10,000 but they received \$5,000.00. The Board is excited to begin this project. Ten trash receptacles will be purchased and placed throughout the district.

The project expects to be completed in late May. The trash receptacles have been ordered, the district identity plates have been designed and manufactured. The lids have to be manufactured and powder coated which can take up to four weeks.

The Board would like to thank Keep LA Beautiful for the opportunity to beautify Lincoln Heights by keeping trash off our streets.
