## EMS WEEK

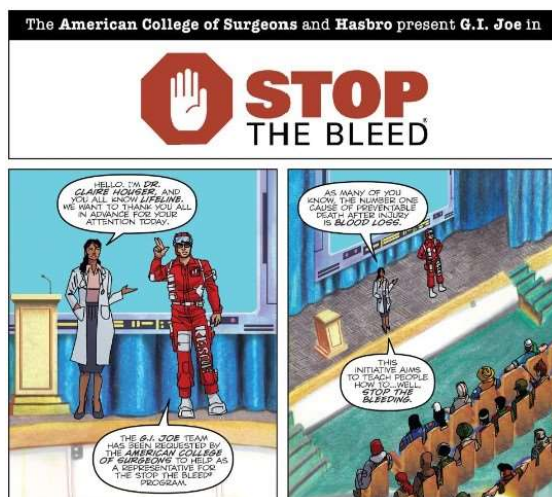

Where **Emergency Care** Begins  
May 21-27, 2023

Schedule a Stop the Bleed Class for the public as part of your EMS Week 2023!

The Stop the Bleed program launched in 2017 and since then over **2.4 million** people have learned the life-saving skill of hemorrhage control. Is your department ready to join us in training the next million!?!

The NCRATAC needs your help to bring this important class to central and northern Wisconsin. The class is free and easy to host, and all EMS providers are eligible to teach.

The American College of Surgeons has even developed a video version of the lecture so if you aren't comfortable with the slides, you can let them do that part and your instructors just conduct the hands-on skills stations for the participants.

Stop the Bleed recently appeared in an edition of the G.I. Joe comic book. Even Superheroes are taking Stop the Bleed classes!!

## NCRATAC Resources for Stop the Bleed Training

To assist you in conducting classes, the NCRATAC is proud to offer:

- Instructor training courses
- Training kits with all the materials you need
- Individual hemorrhage control kits for class give-away
- Instructor honorarium funds
