Description

- Novice – The costume can be assembled from pre-made and/or pre-existing major costume pieces, although items made by the costumer are highly encouraged. Pre-made wigs, footwear, and props are allowed. Pre-made swords are also allowed, as they are difficult items to make and may need to be very specific.
- Intermediate – The costume can be assembled from pre-made and/or pre-existing major costume pieces, but must be modified at least 50% from the original condition by the costumer. This can be achieved by adding to a given clothing item or removing from that item. Pre-made wigs and footwear are allowed. Props must also be modified at least 50% from the original condition. For example, painting and adding parts to a toy gun is acceptable for creating a sci-fi prop gun. Pre-made swords are also allowed, as they are difficult items to make and may need to be very specific.
- Advanced – The costume must be completely made by the costumer with no pre-made and/or pre-existing major costume pieces (components like buttons and buckles are allowed). Specific vintage clothing items may be used if the age and authenticity can be validated. Pre-made wigs are allowed. Footwear, props, and swords must be modified at least 60% from the original condition and are subject to review by the judges for submission.
- Group - Groups may be allowed to enter the contest but will be judged as if the entire group were as 1 person entering. Groups must decide what category they should enter. For example you are a group but your costumes are Novice, Intermediate or Advance.
