Teaching Others Using Horticulture

# Desert Terrarium

## Teaching Others Using Horticulture

**Assignment:** Teach someone how to make a desert terrarium

Requirements:

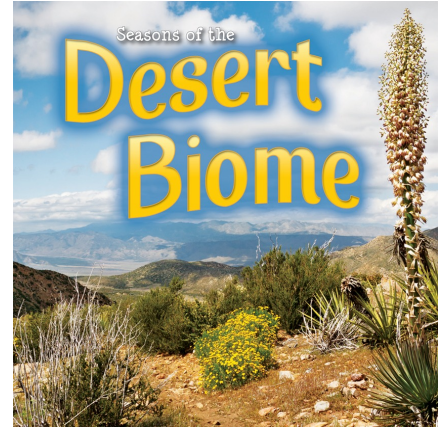

1. **Flyer** - Create a flyer advertising your Terrarium workshop. The flyer must include:
  - Date of Workshop
  - Location
  - Information about terrariums (easy to care for, low maintenance)
  - Information about what they will learn
  - Sign up information
  - Suggested donation - Materials Fee
  - Include a picture

*Horticulture: According to Louisiana State University (2011), horticulture is the science and art involved in the cultivation, propagation, processing and marketing of ornamental plants, flowers, turf, vegetables, fruits, and nuts. It is unique among plant sciences because it not only involves science and technology, but it also incorporates art and principles of design.*

## **2. Presentation**

- Make a 5 slide instructional presentation to use during your workshop. The presentation must include:
  - History of Terrariums (including different types/pictures)
  - Information on Desert Biome (including locations, climate, plants, animals )
  - Elements of an Ecosystem - describe what are the necessary elements in an ecosystem, including biotic and abiotic factors)
  - Instruction for Making a Terrarium (including a list of supplies)
  - Maintenance and Care

## **3. Teach Your Students**

Find an adult that would like to learn how to make a terrarium. Invite them to your workshop and teach them all about terrariums.

Take pictures and make sure they fill out a Learning Survey in order for you to get credit for the assignment. Have fun teaching!
