

## Product Information

## ENVIROCLEANSE A Multipurpose Disinfectant/Sanitizer

### Product Description

**Envirocleanse-A** is liquid disinfectant/sanitizer that is organic, nontoxic, biodegradable and safe for use on all hard surfaces. **Envirocleanse A** is EPA approved to kill COVID-19 and many other commonly known healthcare pathogens. **Envirocleanse A** is made up mostly of hypochlorous acid (HOCL) and water. HOCL is naturally created in the human body by white blood cells. As such while **Envirocleanse A** is an effective disinfectant/sanitizer it is completely non toxic to humans and pets.

### Features

## Envirocleanse - A

Multi-Purpose Disinfectant / Sanitizer

Safe
FDA Approved & EPA Registered

Density	lbs/gal	Calculated	1.02-1.06
pH	N/A	ASTM E70-97	6.0-7.5
Odor	N/A	N/A	Slight Chlorine Like

## Additional Information

---

**Envirocleanse A** replaces chlorine disinfectants and other oxidizing disinfectants. Because **Envirocleanse A** is made up of naturally occurring substances, it is nontoxic (EPA rating of lowest possible toxicity equivalent of nontoxic). **Envirocleanse A** is also noncorrosive, nonflammable, sustainable and ready to use out of the bottle. Storage and spilling are not an issue since there are no harsh chemicals. No masks, gloves, or special equipment is required to use **Envirocleanse A**. **Envirocleanse A** naturally breaks down into a saltwater solution after degrading, which is harmless to the environment, humans and other warm-blooded animals.

**Envirocleanse A** can be used in the healthcare, food services, janitorial services, oil and gas field, water reclamation, cruise lines, livestock and poultry, childcare centers and gyms. There are many applications, uses and industries beyond those listed. **Envirocleanse A's** lack of toxicity makes it completely harmless and environmentally friendly, while its powerful disinfectant allow ECA to be highly effective in antimicrobial care.
