

Outdoor Campus West*

Rapid City, SD

The South Dakota Game, Fish, and Parks Outdoor Campus West wilderness park includes a variety of outdoor classrooms, picnic shelters, wetlands, and fishing ponds.

While practicing at a previous landscape architecture firm, design elements at the South Dakota Game, Fish, and Parks Outdoor Campus West were designed and constructed under the supervision by leaders of Elevate Design Studios. Some of the designed facilities included the duck blind outdoor classroom, and tree house. These elements play a key role in the learning criteria at the Outdoor Campus West. While employed at a previous employer, Mark Jobman, Principal Landscape Architect played a key design role with critical construction administration over site and review. Mark was responsible for the oversight of the design on the duck blind and tree house feature.

Key Elements:

- ▶ Duck Blind Outdoor Classroom
- ▶ Tree House Structure
- ▶ Associated trail system
- ▶ Construction Administration

Budget: Total facility approximately \$15 Million

Completed: 2010

Client: South Dakota Game Fish and Parks

* Project was completed while employed at a previous firm
