

TABLE 1**Explanation of Procedures Used to Obtain Scale Scores from Raw Scores**

On each of the four multiple-choice tests on which you marked any responses, the total number of correct responses yields a raw score. Use the table below to convert your raw scores to scale scores. For each test, locate and circle your raw score or the range of raw scores that includes it in the table below. Then, read across to either outside column of the table and circle the scale score that corresponds to that raw score. As you determine your scale scores, enter them in the blanks provided on the right. The highest possible scale score for each test is 36. The lowest possible scale score for any test on which you marked any responses is 1.

Next, compute the Composite score by averaging the four scale scores. To do this, add your four scale scores and divide the sum by 4. If the resulting number ends in a fraction, round it to the nearest whole number. (Round down any fraction less than one-half; round up any fraction that is one-half or more.) Enter this number in the blank. This is your Composite score. The highest possible Composite score is 36. The lowest possible Composite score is 1.

| ACT Test 1572CPRE | Your Scale Score |
|----------------------------------|-------------------------|
| English | _____ |
| Mathematics | _____ |
| Reading | _____ |
| Science | _____ |
| <hr/> | |
| Sum of scores | _____ |
| Composite score (sum ÷ 4) | _____ |

NOTE: If you left a test completely blank and marked no items, do not list a scale score for that test. If any test was completely blank, do not calculate a Composite score.

To calculate your writing score, use the rubric on pages 61–62.

| Scale Score | Raw Scores | | | | Scale Score |
|--------------------|-----------------------|---------------------------|-----------------------|-----------------------|--------------------|
| | Test 1 English | Test 2 Mathematics | Test 3 Reading | Test 4 Science | |
| 36 | 75 | 60 | 40 | 40 | 36 |
| 35 | 72-74 | 58-59 | 39 | 39 | 35 |
