

## WEIGHBRIDGE TRAFFIC LIGHT SYSTEM

We supply a complete traffic signal system to efficiently operate your weighbridge, increase throughput and reduce operating costs. We provide a two aspect Green/Red lighting system to control traffic entering and exiting the weighbridge facility. The traffic lights are made of LED-based traffic signal modules for the highest optical performance. With low power consumption, our traffic systems provide a long life solution to your traffic control needs.

### Advantages

- Shows driver when to drive onto weighbridge
- Useful for split-weighing vehicles
- Manually operated or controlled from computer software
- Automatic barriers available for stronger signal

### Description

Size 100 mm / 200 mm/ 300 mm Dia  
Wkq.vits 230v AC/12/24 VDC  
Power Consumption 10 W  
Total No Of LED 177-200 Nos  
Housing Poly Carbonale  
Protection IP65

Traffic control lights are a simple, and yet functional, security accessory. The lights are typically fitted with a 150mm red and green aspect, but other combinations of colours and sizes are available. They may be supplied as an incandescent type or LED type light.

Traffic lights for weighbridges are easily fitted to posts and buildings, and can be controlled manually, or integrated with a software package supplied by Accu-Weigh for automation.

We provide Best Quality LED Traffic light With Green Colour, Red Colour. in 12volt DC, 24volt DC, 230AC with Various Dia Like 100 mm, 200 mm, 300 mm.....
