

Scigofer

Providing Technical Information and Resources
for Biotechnology R&D

www.scigofer.com

Twitter: @Scigofer

Email: info@scigofer.com

Services

- I. Develop customized reports to support technology development. Customized reports may include:
 1. Scientific summary with references
 2. Materials suggestions, including vendors and product numbers

- II. Short-term Collaboration: hands on support for experimental design and execution.

From Request to Project Completion

Step 1. Submit a Service Request At scigofer.com, submit a service request form. Include non-confidential information about services that you desire. An email to info@scigofer.com is acceptable if preferred.

Step 2. Telephone Call A Scigofer representative will review your request and schedule a telephone call to discuss project deliverables.

Step 3. Proposal A proposal will be sent via email. The proposal will include agreed upon project deliverables, timelines, and cost. We provide services at an hourly rate.

Step 4. Project Initiation Services begin after the work order, based on the proposal, is signed by both parties.

Step 5. Completion

The Team

Our Research Consultants are bioengineering, biotechnology, and pharmaceutical professionals who are highly skilled at experimental design, experiment execution, and scientific writing. Collectively, they have scientific work experience in academia and industry.
