

Looking at the big picture.

Qlink coupled shade system allows you to operate a bank of shades with one motor and little effect on battery life, energy efficiency, or quiet operation. Connecting QMotion shades side-by-side not only allows you to cut costs, your shades will operate in unison when receiving a remote command.

- Battery powered, multi-window coverage without wiring. Or select low voltage QMotion shades with Qlink for even greater power.
- Manual override option.
- Compatible with QMotion fascias for an elegant, finished look. (144" max width)
- Coupler system is user friendly.
- Perfect for commercial applications like conference or meeting rooms, lobbies and atriums, and a simple solution for large windows in most homes.
- 11/8" minimum light gap between shades.

Exceptionally large coverage, up to 24 feet wide, 10 feet tall and coupling up to 7 shades.
