All yield values are adjusted to 15.0% moisture. Gross revenue is calculated based on selling price of \$5.25 per bushel and drying cost of \$0.04 per point moisture over 15.0% and waxy corn premium of \$0.60 per bushel. Unit of Measure: Yield (bushels per acre), Test Weight (pounds per bushel). Performance may vary, from location to location and from year to year, as local growing, soil and weather conditions may vary. Growers should evaluate data from multiple locations and years whenever possible and should consider the impacts of these conditions on the grower's fields.
