

STAA LA TIERRA INDEX: 197				
----BY RECORD NUMBER				
Rec	Author	Vol	No	Title
1	Ball, Fred	7	2	A Lanceolate Point from Webb County
2	Beasley, Tom S.	5	2	A Late Prehistoric Site in Webb County, Texas
3	Beasley, Tom S.	5	4	A Site with Edwards Points in Bandera County, Texas
4	Beasley, Tom S.	7	2	Incised Stones from Kinney and Webb Counties
5	Beasley, Tom S.	9	3	Paleo-Indian Artifacts from a Site in McMullen County
6	Benfer, Alice and Robert Benfer	8	3	The Mason Ranch Burial Cave, Uvalde County, Texas
7	Birmingham, W. W., E. H. Schmiedlin and T. R. Hester	3	4	Archaeology at the Wells Site (41JK146), Jackson County, Texas
8	Birmingham, W. W. and J. L. Mitchell	5	1	<i>Scottsbluff Points from the J-2 Ranch</i>
9	Birmingham, W. W.	7	4	<i>Scottsbluff Points from Victoria and DeWitt Counties.</i>
10	Calhoun, C. A.	6	3	A Small Campsite Near Kenedy, Texas
11	Campbell, T. N.	10	2	Espinosa, Olivares and the Colorado River Indians, 1709.
12	Carroll, William B.	5	3	Notes on Two Obsidian Paleo-Indian Points from Val Verde County, Texas
13	Carroll, William B.	10	1	The Medina Point: A New Dart Point Type.
14	Carroll, William B.	10	3	Committees and Point Type Classification: A Reply to Hester.
15	Chadderdon, Mary Frances	2	1	Notes on the Menger Collection, Site 41BX272, Bexar County, Texas
16	Chadderdon, Mary Frances	3	1	An Analysis of Altered Quartzite Cobbles from Victoria County, Texas
17	Chandler, C. K.	1	4	Use Wear Analysis of "Clear Fork" Tools from the Falcon Reservoir Area, Southern Texas

1 By Record #

18	Chandler, C. K.	9	3	Paleo-Indian Projectile Points from San Patricio County, Texas, Texas Coastal Bend
19	Chandler, C. K.	10	3	Notes on Some Bell Points from San Patricio County, Texas
20	Chandler, C. K.	10	4	Paleo-Indian Projectile Points from Kendall County, Texas
21	Chandler, C. K., Florence Knolle and Mary Margaret Knolle	10	2	Paleo-Indian Projectile Points from Jim Wells and Nueces Counties, Texas.
22	Clark, John W. , Jr.	7	1	Sa Reina Nortena: History and Archaeology of San Jose Mission
23	Cook, Paul J.	7	3	A Review of the History and Archaeology of Mission Concepcion
24	Cook, Paul J.	8	3	A Review of the History and Archaeology of Mission San Lorenzo, Real County, Southern Texas
25	Cooper, Brom	1	3	A Fluted Point from McMullen County, Texas
26	Cox, David	4	3	A Preliminary Report on "Early Man" Artifacts Found in Northeast Bexar County
27	Daniels, Roger L.	3	4	Preliminary Excavations at the Randig Site, Williamson County, Texas
28	Davis, E. Mott	3	2	Who Joins An Archaeological Society?.....A Tentative Typology
29	Duke, Paul	4	3	Lake Thunderbird Site (41BP78), Bastrop, Texas
30	Dusek, Curtis	7	3	<i>Plainview Points from 41MC10, McMullen County, Texas</i>
31	Dusek, Curtis	9	2	A Pottery Vessel from 41MC320, The Nichols 1 Site, McMullen County, Texas
32	Dusek, Curtis	10	3	Cut Mussel Valve from 41MC320, The Nichols 1 Site, McMullen County, Texas
33	Eaton, Jack	8	1	History and Archaeology of Mission San Antonio De Valero (The Alamo)
34	Fawcett, William B., Jr.	1	1	A Preliminary Analysis of Prehistoric Utilization of Upland Areas Adjacent to Leon Creek, South Central Texas
35	Fox, Anne, E. H. Schmiedlin and J. L. Mitchell	5	3	Preliminary Report on the J-2 Ranch Site (41VT6), Victoria County, Texas

1 By Record

36	Fox, Daniel E.	7	1	Test Excavations at the Classen Rockshelter, Northeastern Bexar County, Texas, 1967
37	Fox, Daniel E. and Warren M. Lynn	3	2	41MC185 - A Historic Building Site in the Proposed Choke Canyon Reservoir Area, Live Oak and McMullen Counties, Texas
38	Garber, James F. , Susan Bergman, Billy Dickinson, Robert W. Hays,III, Jane Simpson and Jeffrey Stefnaoff	10	2	Excavations at Aquarena Springs, San Marcos, Texas
39	Gilmore, Kathleen	9	1	So Shall Ye Reap: The San Xavier Missions
40	Graves, Carol and Lynn Highley	5	2	41ME7: A Cave Site in Medina County, Texas
41	Green, L. M.	4	4	A Stone Outline Figure in Central Texas
42	Greer, John W.	4	2	A Columella Bead from the San Antonio Area of South Central Texas
43	Griffin, F. Eugene	3	3	Summary of STAA Bear Creek Site Survey
44	Gunn, Joel, Royce Mahula and J. B. Sollberger	3	4	The Sollberger Distribution - Analysis and Application of a Tool Reduction Technique
45	Gunn, Joel and Royce Mahula	4	4	Response to Patterson on Sollberger Distribution
46	Gunter, Rita R.	9	1	An Altered Quartzite Cobble from San Patricio County, Texas
47	Gunter, Rita R.	9	4	A Brief Description of Three Items from the Arthur Bickman Collection
48	Harris, Edwin S.	3	2	Papers on File in the STAA Library (As of April 1976)
49	Hemion, Roger H.	7	3	Further Notes on the Bromley Cooper Collection from McMullen County, Texas
50	Hemion, Roger H.	7	4	Ground and Notched Lithic Artifacts from McMullen County
51	Hester, Thomas R.	1	3	Some Observations on Archaeology at Chaparrosa Ranch
52	Hester, Thomas R.	3	2	Rock Art of the Lower Pecos River, Southwestern Texas
53	Hester, Thomas R.	4	3	David R. Espy: Personal Recollections
54	Hester, Thomas R.	5	4	Notes on the Edwards Arrow Point Type

1 By Record

55	Hester, Thomas R.	6	3	Notes on Gower, Jetta, and Other Projectile Points of the Pre-Archaic Period in Texas
56	Hester, Thomas R.	6	3	A Stone Pestle from Dimmit County, Southern Texas
57	Hester, Thomas R.	8	2	Some Observations on Avocational Archaeology in Texas
58	Hester, Thomas R.	10	3	Problems in Typology: The Case of the Medina Points
59	Hester, Thomas R.	10	4	The Southern Texas Archaeological Association: A Review of its First Ten Years
60	Hester, Thomas R. , Feris A. Bass, Jr. and T. C. Kelly	1	4	Notes on the Miles Site, McMullen County, Texas
61	Hester, Thomas R. and John E. Funnell	1	1	Petrographic Notes on Two Stone Artifacts from Southern Texas
62	Hester, Thomas R. and Harvey Kohnitz	2	2	Chronological Placement of Guadalupe Tools
63	Hester, Thomas R. , E. T. Miller, and Cynthia North	5	1	Notes on Paleo-Indian Projectile Points from Kerr and Bexar Counties, South-central Texas
64	Hester, Thomas R. , E. H. Schmiedlin, and W. W. Birmingham	5	3	A Record of Several Ground Stone Artifacts from the Texas Coastal Plain
65	Hester, Thomas R. , Jimmy L. Mitchell, Frank Asaro, and Fred Stross	7	3	Further Notes on Obsidian Artifacts from Dimmit County, Southern Texas
66	Highley, Lynn	6	4	A Note on Arrow Points Collected in Webb and Duval Counties
67	Highley, Lynn and Dan Lengefeld	4	4	Preliminary Investigations at the Wolf Site, Blanco County, Texas
68	Highley, Lynn, Anne A. Fox, and Will Day	9	2	Mission Nuestra Senora de la Luz and Presidio San Agustin de Ahumada: The Orcoquisac Historic District in Chambers County, Texas
69	Hill, T. C. ,Jr.	2	3	Experiments in Pottery Making
70	Hill, T. C. ,Jr.	5	3	Pipes, Pots, and Little Indian Girls
71	Hill, T. C. ,Jr.	10	4	The Ladies, the Monster, and the Good Ol' Boys

1 By Record #

72	Hill, T. C. , Jr., J. B. Sollberger, and Thomas R. Hester	4	1	Yucca Exploitation: A Contemporary Account from the Rio Grande Plain
73	Howard, Calvin D.	1	3	Paleo-Indian Surface Finds in Bexar County
74	Hudgeons, Mark D.	6	1	A Clovis Point Fragment from DeWitt County
75	Hudgeons, Mark D. and Thomas R. Hester	4	3	An Aboriginal Burial at the Dunn Site, DeWitt County, Southern Texas
76	Ivey, James E.	3	3	The Camino Real Crossing of the Trinity River
77	Ivey, James E.	6	3	The Comanche Spring Site
78	Ivey, James E.	8	4	Reexamination of the Site of Presidio San Saba
79	Ivey, James E. and Thomas W. Medlin	4	3	The Fort Macintosh Problem
80	Jaquier, J. A.	3	4	Flotation Recovery Techniques During Archaeological Excavation
81	Jaquier, J. A.	9	4	A Plainview Point from Coleman County, Central Texas: Observations on Typological Problems
82	Johnson, Malcom L.	2	2	Possible Hut Site in Central Texas
83	Johnson, Malcom L.	3	1	The Hut Experiment
84	Johnson, Malcom L.	6	4	Black-On-White Pottery Vessel from Central Texas
85	Johnson, Malcom L.	6	3	Oliva Shell Beads or Dangles, San Patricio County, Texas
86	Johnson, Malcom L.	7	1	A Dugout Canoe from the Nueces River
87	Johnson, Malcom L.	8	4	Notes on Two Sites along Oso Creek, Nueces County, Southern Texas
88	Jones, Courtenay J.	8	2	A Further Experiment in Stone Boiling: A Calcining Process for Acorns
89	Jones, Courtenay J.	8	3	Sandstone Artifacts from Western McMullen County, Texas: The Bromley Cooper Collection

1 By Record

90	Kelly, Thomas C.	6	3	Comments on Patterson's, Hester's, and Shafer's Comments
91	Kelly, Thomas C.	6	2	<i>Gower Projectile Points ?</i>
92	Kelly, Thomas C.	9	3	Criteria for Classification of Plainview and Golondrina Projectile Points
93	Kelly, Thomas C.	10	4	The Barber Paleo-Indian Point
94	Kelly, Thomas C.	10	3	The Bromley Cooper Paleo-Indian Collection from McMullen County, Texas.
95	Kingsbery, Ann	1	2	The Coahuiltecan-Speakers of the Rio Grande Plain of Texas
96	Land, Howard D.	4	1	Budget Photography
97	Land, Howard D.	4	2	Replicating Experiments with the Graver and Bone Needle
98	Land, Howard D.	6	1	A Flint Perspective
99	Land, Howard D.	10	4	Early Barbed Points from Hays County, Texas
100	McGuff, Paul R. and Ernest L. Ludelius, Jr.	1	1	A Possible Late Wisconsin Faunal Assemblage on the Texas Eastern Gulf Coast
101	McReynolds, Richard L.	8	3	Additional Paleo-Indian Artifacts from the Coletto Creek Project Area of Southern Texas
102	McReynolds, Richard L.	8	2	Ground Stone Artifacts from Atascosa and McMullen Counties, Southern Texas
103	McReynolds, Richard L.	9	2	An Iron Projectile from Gillespie County, Texas
104	McReynolds, Richard L.	9	4	Marine Shell Artifacts from Southwest Bexar County
105	McReynolds, Richard L.	10	4	Two Late Paleolithic Tools from Coletto Creek, Victoria County, Southern Texas
106	McReynolds, Richard L., Ben McReynolds, and Mike McReynolds	6	2	Additional Paleo-Indian Artifacts from San Miguel Creek, Atascosa County, Texas
107	McReynolds, Richard L., Ben McReynolds, and Mike McReynolds	7	3	Additional Paleo-Indian Artifacts from Southwestern Atascosa County, Texas
108	McReynolds, Richard L. and Keith Grunewald	8	1	An Archaeological Sample from an Undocumented Edwards Site in Northern Bexar County, Southern Texas

1 By Record

109	Meier, Carl J., Jr. and Thomas R. Hester	3	1	Paleo-Indian Artifacts from the Meier Site, Southeast Texas
110	Mitchell, Jimmy L.	1	1	An Archaeological Site in Atascosa County, Texas
111	Mitchell, Jimmy L.	1	2	An Unfluted Folsom-like Projectile Point from Webb County, Southern Texas
112	Mitchell, Jimmy L.	2	1	Ground Stone Ornaments in Southern Texas
113	Mitchell, Jimmy L.	2	2	A Pottery Pipe from LaSalle County, Texas
114	Mitchell, Jimmy L.	2	4	A Tentative Chronology Framework for Southern Texas
115	Mitchell, Jimmy L.	3	4	An Alibates Dolomite Scraper from Wilson County, Texas
116	Mitchell, Jimmy L.	3	3	Artifacts from the Johney Creek Area of LaSalle County, Southern Texas
117	Mitchell, Jimmy L.	3	1	A Tentative Type of Late Paleo-Indian Point from South Texas
118	Mitchell, Jimmy L.	4	4	41CM52 - A Salvage Site in Comal County, Texas
119	Mitchell, Jimmy L.	5	4	The Turtle Creek Phase: An Initial Late Prehistoric Component in South Texas
120	Mitchell, Jimmy L.	6	3	Comanche and Kiowa in Blanco Canyon - Review of an Article by Wayne Parker entitled MacKenzie's Supply Camp
121	Mitchell, Jimmy L.	7	4	Brief Ethnographic Notes on the Indians of Mission San Juan de Capistrano
122	Mitchell, Jimmy L.	7	4	Brief Notes on the Archaeology of Mission San Juan de Capistrano
123	Mitchell, Jimmy L.	7	3	Book Review: Digging Into South Texas Prehistory, by Thomas R. Hester
124	Mitchell, Jimmy L.	8	2	Avocational Archaeology: A Progress Report

1 By Record

125	Mitchell, Jimmy L.	8	3	Book Review: Historic Indian Groups of the Choke Canyon Reservoir and Surrounding Area, Southern Texas, by T. N. Campbell and T. J. Campbell
126	Mitchell, Jimmy L.	8	4	Book Review: Wax, Men, and Money, by Curtis Tunnell
127	Mitchell, Jimmy L.	9	2	Book Review: Allens Creek: A Study in the Cultural Prehistory of the Lower Brazos River Valley, Texas, by Grant D. Hall
128	Mitchell, Jimmy L.	9	1	Publication Announcement - Preliminary Archaeological Survey and Testing at Fort Inge, Texas, by George Nelson
129	Mitchell, Jimmy L.	9	4	The Sabinal Point
130	Mitchell, Jimmy L.	10	3	Editorial Comment: Hester Versus Carroll
131	Mitchell, Jimmy L.	10	4	Book Review: Traces of Texas History: Archaeological Evidence of the Past 450 Years, by Daniel E. Fox
132	Mitchell, Jimmy L., Thomas R. Hester and Wayne Parker	7	2	A Bannerstone from Padre Island on the Texas Coast
133	Mitchell, Jimmy L. and Lynn Highley	9	1	Notes on a Metal Projectile Point from Southern Texas: The Bromley Cooper Collection
134	Mitchell, Jimmy L. and Shirley Van der Veer	10	3	Late Prehistoric Projectile Points from the Vicinity of the Dan Baker Site, 41CM104, Comal County, Texas
135	Mokry, E. R. , Jr.	3	2	Notes on an Altered Quartzite Cobble from Webb County
136	Mokry, E. R. , Jr.	3	1	Notes on Paleo-Indian Projectile Points from McMullen County
137	Mokry, E. R. , Jr.	4	1	Preliminary Report on Investigations of a Multi-component Archaeological Site: 41NU33
138	Mokry, E. R. , Jr.	6	4	Survey of Archaeological Sites in Starr County, Texas
139	Mokry, E. R. , Jr.	9	4	A Brief Description of Three Items from the Arthur Bickman Collection
140	Moore, Bill	9	4	Report of Testing at the Wells Rockshelter (41RE53); A Middle Archaic Site in Real County, Texas

1 By Record

141	Moore, Bill	10	2	Analysis of Surface-Collected Materials from 41GL12, an Archaic Site in Gillespie County, Texas
142	Moore, Bill and Roger Moore	9	1	Annotated Bibliography of Texas-Related Articles in the Plains Anthropologist, 1947-1981
143	Orchard, C. D.	1	4	Planning Site Surveys
144	Orchard, C. D.	10	4	Notes Relative to the Historic Gathering of Peyote in South Texas
145	Parker, Wayne	5	3	Notes on Two Early Man Dart Points from Zapata County, Southern Texas
146	Parker, Wayne	7	4	Refashioned Clovis Point from an Early Apache Site, Crosby County, Texas
147	Parker, Wayne	9	2	An Ox Shoe and Metal Scraping Tool from the Montgomery Site
148	Parker, Wayne	9	4	The Wooden Bow Burial Site, Floyd County, Texas
149	Parker, Wayne	10	4	Preliminary Notes on a Clovis Point Associated with Mammoth Tusk Fragments in Hockley County, Texas
150	Parker, Wayne	10	1	Three Metal Projectile Points from a Historic Indian Workshop Site
151	Parker, Wayne and Jimmy L. Mitchell	6	2	Notes on Some Bell Points from a Site in Crosby County, Texas
152	Patterson, L. W.	1	3	A Multiple Rock Midden Site
153	Patterson, L. W.	1	1	Prismatic Blade Distribution in Texas
154	Patterson, L. W.	1	2	Three Sites in Jim Wells County
155	Patterson, L. W.	2	4	411HR210, A Multi-component Site in Harris County, Texas
156	Patterson, L. W.	2	1	A Quarry Site in Medina County, Texas
157	Patterson, L. W.	3	3	The Hillboldt Site, Austin County, Texas

1 By Record #

158	Patterson, L. W.	5	1	An Archaic Rock Midden (41BN11), Bandera County, Texas
159	Patterson, L. W.	6	3	An Alternate Explanation of Edge Damage on Gower Points
160	Patterson, L. W.	6	4	Archeological Summary of the Upper Texas Coast
161	Patterson, L. W.	6	1	Experimental Heat-Treating of Flint
162	Patterson, L. W.	7	2	Comments on the Gibson Lithic Cache
163	Patterson, L. W.	8	4	A Chert Cobble Flaking Experiment
164	Patterson, L. W.	8	2	A Late Paleoindian and Archaic Rockshelter, Pecos County, Texas
165	Patterson, L. W.	8	1	Paleoindian Lithic Technology and New Associated Dates for Site 41ME3, Medina County, Texas
166	Patterson, L. W.	9	2	Initial Employment of the Bow and Arrow in Southern North America
167	Patterson, L. W.	9	1	Some Prehistoric Sites on the Uvalde-Zavala County Line, Texas
168	Patterson, L. W.	10	1	An Archaeological Survey in Northwest Val Verde County, Texas
169	Patterson, L. W. and W. Robert Wehner	2	4	The Las Moras Site in Kinney County, Texas
170	Patterson, L. W. and J. H. Adams	4	2	An Archaeological Complex in Kendall County, Texas
171	Prewitt, Elton R.	10	3	<i>Andice: An Early Archaic Dart Point Type</i>
172	Saunders, John T. and Elaine L. Saunders	5	1	A Ranch Survey in the Upper Santa Isabella Watershed, Webb County, Texas
173	Schmiedlin, E. H.	2	2	A Grooved Stone Artifact from Victoria County, Texas
174	Schmiedlin, E. H.	6	1	A Preliminary Report on the Burriss Site (41VT66), Victoria County, Texas
175	Schmiedlin, E. H.	8	2	Preliminary Investigation of the Kerlick Sites, DeWitt County, Texas
176	Schuetz, Mardith K.	7	4	An Historical Outline of Mission San Juan de Capistrano

1 By Record

177	Scruggs, Lang, Joel Gunn and Norman Hitzfelder	5	2	The Hitzfelder Bone Collection
178	Shafer, Harry J.	3	2	The Consideration of Lithic Refuse at Archaeological Sites
179	Shafer, Harry J.	6	1	Additional Comments on Altered Quartzite Cobbles and Pebbles from Central and Southern Texas
180	Shafer, Harry J.	6	3	Comments of Kelly's "Gower Projectile Points?" Article
181	Shafer, Harry J.	9	1	Survival of the Wittiest: Archaeological Challenges in Southern Texas
182	Shafer, Harry J. and Roy Hanus	1	4	Asphalt Hafted Tools from Bee County, Texas
183	Skinner, S. Alan	4	3	Amateur Archaeologists as Conservationists
184	Skinner, S. Alan	6	2	The Bushwack Shelter (X41KR116), Kerr County, Texas
185	Skinner, S. Alan	6	4	The Paris Site (X41KR1), Kerr County, Texas
186	Skinner, S. Alan	6	3	The Real Site (X41KR166). Kerr County, Texas
187	Smith, Brent W.	2	4	An Analysis of Faunal Remains from 41HR210
188	Smith, Harvey P., Jr.	1	1	Double Hafted or Double Pointed?
189	Smith, Harvey P., Jr.	2	4	Dig That Square: A Lesson from Timmeron Rockshelter

Abstract
Describes lanceolate point, surface find in north western Webb County near Maverick County line, resembles Plainview
A site on Santa Isabel Creek with Perdiz, Clifton, Fresno, side-notched arrow points, and other artifacts is discussed.
Site on Mason Creek, Medina River drainage, supports Sollberger's Turtle Creek Focus construct. Points; Edwards, Scallorn, triangular, Abasolo, Ensor, Frio, La Jita, Montell, Nolan, Pedernales.
Three stones with parallel lines are described. A Scallorn point is associated with one stone. The Webb County stone was a surface find.
Discusses seven fragmentary Paleo-Indian points, surface collected in McMullen County. Points; Angostura, Golondrina, Meserve, and Plainview
Remains of 25-50 individuals from a vertical shaft are described. Artifacts; Nolan, Travis, Tortugas points. Burials may be Archaic Period.
Discusses the Herman Wells farm site near the Navidad River, north of Edna, Texas. Owner's collection; Angostura, corner-notched, rectangular, stemmed, triangular and Clear Fork.
Scottsbluff points from J-2 Ranch (41VT6) in Victoria County are discussed. Golondrina and Kinney also associated.
Four Scottsbluff points described. Two points from surface and two buried.
Describes small hearth in Karnes County. Pottery from site is similar to that made by Coahuiltecan Indians of Mission Espiritu Santo and Mission Rosario.
Discusses Espinosa-Aquirre Expedition (1709) through Texas. In Bastrop and Travis Counties, encountered Yojuane, Simaomo, and Tusonibi and Cantona tribes.
<i>Clovis and Plainview points of obsidian, recovered from a ranch near Devil's River.</i>
New dart point type is proposed. 150 specimens found in midden on Winans Creek in Bandera County.
Carroll replies to Hester's thoughts on the formation of a committee to supervise point type classification (see Hester 1983a).
Site excavated 1960-61 near Long Creek, Bexar County. Artifacts; Angostura, Montell, Frio, Castroville, Ensor, Pedernales, Langtry, Shumla, Marshall, Lange, Bulverde, Nolan, Travis, Guadalupe, Clear Fork.
100 quartzite cobbles by Birmingham and Schmiedlin from sites along the Guadalupe and Coletto Creek show alteration and suggest use by prehistoric man.
Describes 22 Clear Fork tools collected by R. W. Hickman from sites along the Rio Grande River.

Paleo-Indian points from sites 41SP69, 41SP75 and 41SP79 on Chiltipin Creek described. Include Clovis, Angostura, Plainview, Golondrina, Gower-like.
10 Bell-like dart points from surface collections in the western part of San Patricio County along Chiltipin Creek are described.
Two Paleo-Indian points from surface collections on East Sister Creek in Kendall County described. Specimens are Clovis and Angostura.
Surface-collected Paleo-Indian points from Nueces River area described. Angostura and Plainview and corner-tang knife discussed.
Previous work at Mission San Jose in Bexar County described. Brief history of site presented.
Overview of site is given, previous work described and artifacts from mission discussed.
Overview of work at mission discussed and brief history given. Mission established for Lipan Apaches. It lasted only nine years.
Documents basal fragment of a fluted point found on surface of site on south side of Frio River west of Tilden.
Two Plainview points from the Seibel Site near Cibolo Creek in Universal City described. Ensor and Nolan points also recovered.
Austin phase site on Brushy Creek near Pflugerville described. Artifacts; Scallorn point, bifaces, blades, bone beads, incised bone and two burials.
Essay about amateur archaeologists. Reprinted from Texas Archaeology 10(3) May 1966.
Site two miles northeast of Smithville discussed. Artifacts; Gower, Golondrina, Martindale, Uvalde, Kinney-like, Bulverde-like, Marcos, triangular, corner notched, Scallorn, Clear Fork tools, scrapers, cores, quartzite hammerstone.
Two basal fragments of Plainview points found near Salt Creek. Angostura and Folsom found nearby.
Reconstructed vessel from site overlooking Nueces River in southwestern McMullen County described. Vessel is example of bone-tempered Leon Plain ware. Scallorn, Ensor and a leaf-shaped biface found.
Unusual freshwater mussel shell found eroding from bank of small gravel quarry described. Artifact had been altered by removal of rectangular section of shell using "groove and snap" technique.
Overview of history of mission, previous archaeology, and artifacts presented.
Documents testing of six areas near Leon Creek in northern Bexar County near site 41BX52. One Archaic dart point recovered plus flakes and scrapers.
Report on J-2 Ranch. Artifacts; Plainview, Scottsbluff, Bell, Meserve, Refugio, Pedernales, Scallorn, Perdiz, Zavala, early corner-notched, triangular points, bison bone, and other materials.

<p>Work at 41BX32 in 1967 described. Indicate occupation from Middle Archaic through end of Archaic Period. Historic use as a still, trash dump or storage area.</p>
<p>Documents two possible structures, may be related to the Yarbrough Bend Community. Site is late 19th Century farm.</p>
<p>1982 field school at 41HY160 in Hays County reported. Artifacts; Golondrina, Eden/Scottsbluff, Ensor, Frio, Marshall, Castroville, Pedernales, Nolan, Alba, Clifton, Perdiz, Scallorn. Stone alignment suggesting structure noted.</p>
<p>Overview and history San Xavier mission complex in Milam County presented. Previous archaeological work discussed.</p>
<p>Report on Scorpion Cave Site on the Medina River. Multi-component site includes Archaic and Late Prehistoric. Artifacts dominated by Edwards points , includes faunal materials and historic artifacts.</p>
<p>Describes outline of possible structure of three squares and two circles done in sandstone in Central Texas along the Colorado River in McCulloch County.</p>
<p>Unusual bead from Bexar County described. Drilled from both ends and side. Postulated use breastplate bead.</p>
<p>Survey of Bear Creek Boy Scout Reservation by STAA described. Artifacts include Angostura, Pedernales, Montell, Archaic dart points.</p>
<p>Replication of artifact manufacture and saving lithic debris at each stage of reduction. Distribution plotted at various stages. Data useful in future lithic studies.</p>
<p>Comments on Patterson's criticism of Sollberger Distribution article.</p>
<p>Altered cobble of quartzite found near Odem, Texas described. Data on distribution of this kind of artifact presented.</p>
<p>Three eccentric flint artifacts from Webb County described. Three artifacts, surface collected, crescent-shaped, axe-shaped, and reptile-shaped.</p>
<p>A bibliography of items in the STAA library</p>
<p>Collection of arrow points described. Include Edwards, Scallorn, Perdiz, Toyah, Livermore, and Bonham.</p>
<p>Line sinkers or Waco sinkers in Bromley Cooper Collection described. Artifacts surface collected in the west-central part of county.</p>
<p>Discusses UTSA field school held June 4 to July 11, 1974. Mariposa Site, on east bank of Turkey Creek, investigated and yielded C-14 dates of A.D. 550 and A.D. 1650. Points; Zavala, Perdiz .</p>
<p>Describes some pictograph traditions found in the Pecos River area of the Trans-Pecos.</p>
<p>A eulogy for Dave Espy of Corpus Christs, Texas. Mr. Espy was one of the charter members of the STAA.</p>
<p>Commentary of Sollberger's 1967 report on the Edwards point type; republished from The Record 26(2), 1970.</p>

Brief overview of Gower point presented and new type, Jetta, suggested for Pre-Archaic. This type based on from private collection from Gillespie County.
A stone pestle, found near Asherton, Texas, described. Also found two Perdiz points, Clear Fork tool, preform, and a stemmed dart point fragment.
Role of avocational archaeologist within the archaeological community discussed.
Discusses problems in establishing new projectile point types, states that Carroll's proposed Medina type may be same as already established type, La Jita (See Carroll 1983).
Review of accomplishments and future goals of Southern Texas Archaeological Association (STAA) presented.
Reports on skeletal material recovered on Miles Ranch, south of Tilden in McMullen County during construction of septic tank.
Reports analysis of a square-rolled green-stone celt from eastern LaSalle County, Texas and Waco Sinker found in northern part of Frio County, Texas.
Reports stratigraphic analysis of the Granburg II, 41BX271, site on Salado Creek. Cache of Guadalupe tools recovered under 12 feet of gravel.
Notes on Paleo-Indian projectile points, Angostura and Golondrina from northern Kerr County, and a Folsom fragment from southeast Bexar County along Parita Creek.
Waco sinkers and boatstone from Victoria and Goliad counties, a plummet from McMullen County, other ground stone artifacts discussed.
X-ray fluorescence analysis of trace element content of four obsidian artifacts reveal possible trade relations with central Mexico and north-central New Mexico.
Projectile points from Bromley Cooper Collection of Kingsville, Texas described. Artifacts; Bonham, Edwards, Harrell, Toyah, Scallorn and Perdiz.
Rockshelter (41BC73) on south bank of Pedernales River near Johnson City discussed. Artifacts; triangular, Nolan, Ensor, Perdiz, bone fragments, bone awl.
Overview of history and archaeology of important Spanish Colonial site located in southeast Texas in Wallisville Lake area east of Houston.
Description of experimental pottery making. Includes photos of replicated pottery and discussion of problems and practices involved in replicating pottery.
Report of tubular sandstone pipe from 41ZV14 located on middle Nueces River drainage in Zavala County. Pipe exhibits incising on exterior and possible dottle within.
Reflections on the past achievements of STAA.

Account of Mexican migrant use of Yucca plant in Tortugas Creek area of eastern Zavala County.
<i>Plainview, Angostura, Golondrina, and Scottsbluff points and perforator from Bexar County discussed. Artifacts found in sand hill country south of Medina River.</i>
Basal fragment of Clovis point found near Cuero, Texas described.
Recovery of human skull at Pat Dunn Site near Irish Creek and Guadalupe River in DeWitt County discussed. Materials; conch shell beads, Clear Fork tool, Matamoros and Refugio points.
Historical research to identify location of ford on Camino Real of Trinity River discussed. Site believed to be in Madison County.
19th Century German house believed to have been built by John O. Meusebach in the 1850's described. Located in Bexar County.
Discusses reconstruction of original plan of mission.
Discusses Fort McIntosh, situated on campus of Laredo Junior College in Webb County, Texas. Fort established in 1848, closed by U. S. Army in 1949.
Field Equipment, procedures, and problematic considerations in performing flotation at the Timmeron Rockshelter (Hays County) discussed.
<i>Plainview point from Coleman County described. Distributional information and further typological comparative studies also provided.</i>
Fist-sized stones in an arc superimposed with another arc with hearths found site 41GL44 in Gillespie County. Hearths and stone alignments suggest possible house sites which are extremely rare in Central and South Texas.
Discusses replication experiment designed to calculate number deer hides needed to cover seven-foot diameter hut. Concluded that 18 hides needed to adequately cover such a house.
Black-on-white pot found Gillespie County, Texas between 1865 and 1870 described. Vessel collected from Indian camp.
Objects believed to be shell beads or dangles recovered from site in San Patricio County (41SP72), Texas discussed.
Wooden canoe found in the Nueces River described. Other known canoes mentioned for comparative purposes. Techniques used in extracting and preserving this artifact discussed. Canoe found in Live Oak County.
Surface collection and excavation of two sites in Nueces County documented. Two types shell artifacts added to known assemblage of the Oso Creek area.
Discussion of experiment using limestone to neutralize tannic acid found in acorns.
Private collection sandstone artifacts described. Artifact; metates, manos, grooved abraders, pecked stone, pestles, and a grooved weight/sinker.

Kelly replies to earlier comments on his article (Kelly 1979) on edge damage of Gower points which he believes is the result of cutting and slicing of wood (see Hester 1979; Patterson 1979; Shafer 1979).
Projectile point described with suggestions as to function and origin. Analysis of nine specimens suggested to author that point form may have functioned primarily as a tool used for cutting of bone or wood .
Manual for classifying these point forms is provided. Technological and cultural implications discussed.
Presents evidence for adoption of new Paleo-Indian point, the Barber point. New type based on specimens from Byron Barber Collection (Gillespie County) and Wilson-Leonard Site (Williamson County).
Collection Paleo-Indian artifacts belonging to Mr. Bromley Cooper described. Types include Clovis, Folsom, Plainview, Golondrina, Angostura, and Scottsbluff.
Review of historic materials in South Texas. Discusses Brownsville Complex, Falcon and Mier Foci as they relate to Coahuiltecans of South Texas.
Photography of archaeological specimens and how to do it.
Discusses replication and use of bone needle and graver.
Techniques of flint knapping described. Emphasis placed on creation of Paleo-Indian points.
Sample of nine early barbed projectile points from excavations at Gregg Ranch Site (41HY131) discussed. Types include Gower, Lerma, Uvalde, and Pandale-like.
Fossil horse and mammoth teeth from Clear Creek watershed near Houston found during U. S. Corps of Engineers survey described.
<i>Golondrina and Plainview points found in Goliad and Victoria Counties are discussed.</i>
Hammerstone of quartzite and Waco Sinker from Atascosa and McMullen Counties described.
Metal projectile point from Gillespie County described. Artifact is only historic artifact from site which has produced dart points and arrow points.
Discusses presence of columella shell artifacts from prehistoric site in Bexar County.
Documents Plainview or Golondrina dart point and fully-grooved stone similar to Waco Sinker. Artifacts found in road cut.
Paleo-Indian artifacts, Angostura, Plainview, Golondrina, and Clear Fork from surface collections described.
Paleo-Indian artifacts from San Miguel Creek area of Atascosa County described. Types include Golondrina, Angostura, and Clear Fork.
Discusses excavation of vandalized site in Bexar County. Artifacts from site primarily Edwards point. Dart points found suggest site occupied during most of Archaic.

<i>Clovis, Plainview and Angostura points from Meier Site and vicinity (about 13 miles east of La Grange, Fayette County) discussed.</i>
Surface finds by A. J. Hoover site on San Miguel Creek in southern Atascosa County discussed. Artifacts; Angostura, Desmuke, Pedernales, Abasola, Gary, Edgewood, Fresno, and Alba projectile points plus two pottery pieces.
Very large, thin projectile point with some Folsom-like attributes discussed. Specimen from Johnson collection. Found on Rio Grande River above Laredo.
Summary ground stone artifacts found in region. Include; gorgets, pendants, celts, three-quarter grooved axes, boatstones, Waco Sinkers, and plummets. Four gorgets from Dimmit County illustrated.
Artifacts from site 41LS13 on Las Raices Creek in southwestern LaSalle County discussed. Artifacts; pottery pipe bowl, reed arrow point, and two triangular points from A. J. Hoover Collection.
Tentative summarization of periods, diagnostic artifacts, etc. for southern Texas presented in single page chart.
Large flake scraper from Bly collection, near Sayers, Texas, described. Material is Alibates dolomite from Texas panhandle, probably Late Prehistoric.
<i>Marcos, Darl, Morhiss, Ensor, and Perdiz points from site 41LS15 near Johnny Creek in the Frio River drainage are discussed.</i>
Unusual point from Johnson collection compared with points in the literature; named the Orchard point because of earlier publication by Orchard and Campbell illustrating similar specimen.
Materials salvaged from site in Comal County temporarily accessible after floods of 1972 on the Guadalupe River below Canyon Dam. Artifacts; Frio, Darl, and Marcos points, plains knife, fire reddened rock, scrapers and bone.
Evaluation Sollberger's Turtle Creek Focus, A. D. 860-A. D. 1130, involving Edwards and Scallorn arrow points, trade pottery; definition of Edwards distribution and postulation of Turtle Creek Phase as initial of Late Prehistoric in region.
Review of article which discusses historic military site on high plains. MacKenzie describes fortifications built in 1872 to protect U. S. Army troops stationed there to control the Comanche and Kiowa groups.
Ethnographic accounts of Indians who lived at this Spanish mission are discussed.
Discussion of previous archaeological investigations at mission site presented. Metal projectile points from site described.
Review of Hester's book which discusses archaeology of South Texas.
Recent activities of STAA are presented.

Review of report by Campbell and Campbell. Provides overview of historic Indians of South Texas.
Review of Tunnell's report which discusses historic gathering, production, and marketing of wax from sites along the Rio Grande region of Trans-Pecos Texas.
Review report of excavations in Allens Creek area along Lower Brazos River Valley, Texas.
Review report which documents the 19th Century Fort Inge in Uvalde County, Texas.
Presents evidence for new point type, Sabinal, for South Texas Archaic. Evidence suggests point localized and centered in Uvalde and Real Counties. Distributional data for point presented.
Reply to comments by Hester and Carroll concerning the Medina point type and initiation of Type Review Committee to regulate introduction of new point types (see Carroll 1983, Hester 1983).
Review of Fox's book which presents comprehensive study of historical archaeology as practiced in Texas with discussions of major sites and periods of Texas history.
Half of slate, winged bannerstone found in the sand dunes of Padre Island (Cameron County) described.
Metal projectile point from Victoria County described.
Assemblage of late prehistoric projectile points found in vicinity of Dan Baker Site discussed. Includes; Edwards, Cliffton and Perdiz.
Pablo Meyer Site (41WB5), situated on north bank of dry tributary of Lobo Creek, discussed. Surface-collected materials include Abasolo, Trotugas, Frio, Langtry, Lerma, Gary, Scallorn, and Perdiz points; quartzite cobble.
<i>Plainview and Golondrina bases from site seven miles west of Tilden, Texas on Leoncita Creek described.</i>
Discusses site which produced 1,478 historic artifacts, a late Archaic cemetery with Tortugas points, a Late Prehistoric campsite with Perdiz and Fresno points and Rockport pottery. Site is on Oso Creek in eastern Nueces County.
Results of survey along upper Arroyo Los Olmos in west-central Starr County, Texas described. Five sites, all prehistoric, discussed
Article wrongly attributed to Ed Mokry; actually written by Rita Gunter (See Gunter 1982). Correction notice for this error published January 1983 issue - 10(1)28.
Documents findings of test excavations at undisturbed rockshelter in Real County. Projectile points from site predominantly Pedernales.

Describes collection of artifacts from surface of burned-rock midden and adjacent area on bank of Pedernales River. Primary artifact is Pedernales.
Articles concerning Texas archaeology published in the Plains Anthropologist described.
Discusses proper use of maps, correspondence, and review of previous surveys in planning site survey.
Describes historical accounts of peyote collecting trips and some of the physical remains of these activities which may aid future archaeologists in identifying peyote collection area sites.
<i>Golondrina and Angostura points found on a site in Zapata County, Texas near Falcon Lake described.</i>
Four-way beveled knife, believed fashioned from a Clovis point described.
Two historical metal artifacts excavated from an historic Indian site in Floyd County are described.
Recent Indian burial from rockshelter in Floyd County described. Complete wooden bow recovered in addition to Washita arrow point, bone awl, stone elbow pipe, and two sandstone shaft-smoothers.
Possible mammoth kill site on the Llano Estacado is discussed.
Description of three unfinished metal projectile points and three cut metal fragments found just off the caprock rim in southern Crosby County. Artifacts from Wheeler Site (41CB29).
<i>Bell points from eastern edge of Llano Estacado described. Typological similarities with Calf Creek (Arkansas and Oklahoma) and Charcos (Southwestern Coahuila, Mexico) noted.</i>
Reports site 41BN8 (Bandera County), consists of three separate burned rock middens on cliff top along Hondo Creek. Artifacts; Abasola, Angostura, Travis-like, Frio, and Scallorn points; grooved pendant.
Review of lithic industry in state with distributional map of reported blade recoveries.
Discussion of sites 41JW3, 41JW4, and 41JW5, located on Freeborn Ranch in southern Jim Wells County, along Lagarto Creek. These are late Archaic sites which have produced chips, scrapers, cores, flakes, and a Desmuke point.
Stone pendant, bone pendant, hafted microlith with asphaltum, and point types Almagre, Palmillas, Kent, Ellis, and Perdiz found in low sandy mound on bayou on former stream bed in wooded area of Harris County near Houston.
Discussion of site 41ME3, a site which stretches 1500 feet along a hill top with three main areas of lithic scatter. Large prismatic blades, cores, hand axes, and no diagnostic points were found from the site, judged to be Archaic.
Site 41AU7 discussed. Artifacts; sandy paste sherd, historic glazed sherd, and Plainview, Kent, Pedernales, and Scallorn projectile points.

Site on Hondo Creek produced burins, mano, triangular, single-shouldered, Frio, Fairland, Bulverde, Plainview, Abasola, Angostura, and Gower points.
Patterson discusses how edge damage found on Gower points may reflect manufacturing process as well as having functioned as a tool for cutting (See Kelly 1979).
Overview of 20-county area of southeast Texas presented.
Heat-treating techniques utilizing flakes from chert collected in Fayette County, Texas described.
Comments on earlier report which described the Gibson lithic cache from Oak Creek Reservoir in West-Central Texas.
Results of experiment in chert cobble flaking intended to replicate quarry site and remote campsite discussed. Raw materials obtained from Fayette County.
Surface collection of rockshelter site described. One Angostura-like point collected.
Discussion of thermoluminescence method of dating lithics and dates obtained from samples from site 41ME3.
Early diffusion of bow and arrow from far north to southern North America is discussed as well as associated types of lithic technology.
Surface collections of four prehistoric sites described. Based on Frio dart point, one site tentatively assigned to Late Archaic. Three not assigned.
Survey of area along east side of Pecos River described. Eleven sites recorded, one is possible historic Indian site.
Site 41KY14, on Las Moras Creek in central Kinney County, described. Surface collection from site yielded dart point fragments, chips, chopper, cores, blades, Plainview, Castroville, Langtry, Perdiz, Scallorn, Harrell, Zavala or Figueroa points.
Nine sites on ranch on upper Cibolo Creek described. Sites date from Pleistocene through Middle Archaic. Sites 41KE69 and 41KE73 produced Mousterian-like artifacts and site 41KE72 produced Angostura, Gower, and Tortugas points.
Provides information for proposed new Archaic dart point type, Andice. Type based on specimens from San Patricio, Travis, and Williamson Counties.
Statistical comparison of collections in East and West Branch sections of Santa Isabella Creek. Point types include Fresno, Perdiz, Bulverde, Gary, Matamores, Tortugas, and Lerma. Other tools analyzed include Guadalupe and Clear Fork.
Fully-grooved hammerstone, or axe, of brownish quartzite found on gravel bar in Spring Creek described.
Late Archaic site containing bison bones discussed. Decorated bone found.
Report of testing and surface collecting from four prehistoric sites in DeWitt County. Arrow point with asphaltum collected.
Overview of history of Mission San Juan de Capistrano presented. Diagram of mission included.

Analysis of osteometric data from bone materials from Hitzfelder Cave near Cibolo Creek in northern Bexar County described.
Analysis of role of lithic refuse in study of archaeological sites in Choke Canyon presented. Sites studied are in Live Oak and McMullen counties.
Presents comments by Shafer concerning previous study conducted by M. F. Chadderdon in Victoria County (See Chadderdon 1976).
Shafer argues wear patterns on Gower points may be the result of use as projectile points instead of being used for cutting and slicing of wood as Kelly (1979) has proposed. Additional observations concerning this type are presented.
Shafer presents insight of how prehistoric peoples were able to survive from local foodstuffs in seemingly harsh environment of South Texas.
Report of two dart points with asphalt on stems from locations along Aransas River. Perdiz and Scallorn arrow points recovered with no asphaltum suggests that asphalt used during Archaic.
Role of amateurs in Texas archaeology, need for data on sites by county, and request for assistance is discussed.
Describes a rockshelter excavated during Texas Archaeological Society field schools of 1971 and 1972. Site apparently served as temporary camp occupied repeatedly from Middle Archaic until about A.D. 1200.
Discusses excavations at Paris Site, one of four sites tested at TAS field schools of 1971 and 1972. Site contained burned rock midden and adjacent living and working areas.
Burned rock midden excavated by TAS field school of 1972 described. It is proposed that the mound was constructed during the Neo-American period.
Faunal remains from site identified as white tail deer, turtle, bison or cow, and bird. Thirteen specimens exhibited some modification. See Patterson 1975 for discussion of site.
Unusual lithic artifact found along San Miguel Creek in Frio County discussed. Several possible functions for artifact postulated.
Reports finding of small ear of corn during STAA excavation at Timmeron Rockshelter (41HY95).
Second report on use of Lift-Out Technique to recover and transport archaeological matrix from site to laboratory. Technique discussed is from Baker Cave, Val Verde County.
Various construction phases of Spanish mission discussed.
Overview of history of mission presented. Also, previous work involving restoration of site discussed.
Certain vessels from east coast of Belize described. Discusses special features which may isolate them by provenience and culturally.
Overview of Spanish Governor's Palace in San Antonio, Bexar County, Texas presented.

Documents removal of one-meter square of deposit from Baker Cave in Val Verde County for transport to laboratory (see Smith 1977).
Unique artifact from John E. Conner Museum on campus of Texas A&I University in Kingsville, Texas described.
Discusses how natural causes can create burned clay objects which resemble those made by man.
Function of asphaltum, often found on specimens of Rockport pottery along the South Texas Coast discussed.
Stone image of ground squirrel or prairie dog with incised whiskers, recovered from burned rock midden in southwestern Kerr County, discussed. Level of mixed arrow points and dart points, dated tentatively at A.D. 500 - A.D. 1500 observed.
Initial report of the Edwards arrow point. Author hypothesized Edwards as a miniature dart point with demonstration of various dart points and Edwards counterparts; hypothesized Turtle Creek Focus based on distribution of point type.
Report on Goat Bluff Rockshelter in southeast Kerr County. A bone awl, antler tines, graters, knives, dart points, and arrow points Edwards, Cuney, Scallorn, and triangular recovered. Reprinted from The Record, 8(3), 1949.
Report of three sites on White Brush Creek near confluence with Atascosa River. Dart points, corner-tanged knives, Edwards, Perdiz, Scallorn, bulbar-based, and triangular arrow points found at site. Reprinted from The Record 9(3), 1951.
Further comment on the Gibson lithic cache which appeared in La Tierra 7(2)32-33.
Discussion of misconceptions which may arise from use of term 'blade' in an archaeological context. This article comments on Tunnell's discussion of Gibson Lithic Cache in Coke County.
Discusses past and future directions in archaeology.
Discussion of primary quantifiable criteria inherent in man-made fractures versus naturally occurring fractures in chert artifacts.
Reply to comments made by Patterson (1980) and Sollberger (1980) concerning his report describing the Gibson Lithic Cache.
Discusses a survey which recorded ten sites and tested one (41BX333 and 41BX358) have historic components.
Surface-collected point fragments believed from Paleo-Indian Period described.
Discussion of how mineral deficiency in grain sorghum can lead to yellowish discoloration in plants. Condition may be associated with concentrations of snail shells, indicative of an archaeological site.
Sandstone artifact with engraved lines found in Live Oak County in Choke Canyon Reservoir on Frio River.
Test excavations from prehistoric habitation site on the Nueces River in Uvalde County described. New projectile point type, Anthon, described.
Temple mounds high in mountains on ranch about 150 miles south of Brownsville, near city of Victoria described.

<p>Pre-Archaic and Archaic projectile points from the Bromley Cooper Collection described. Types; Abasolo, Bell, Bulverde, Carrizo, Catan, Darl, Desmuke, Early Corner-Notched, Edgewood, Ensor, Fairland, Frio, Gower, Kent, Lange, and Langtry.</p>
<p>Reports history, culture and language of Cacaxtle Indians during late 17th century. Spanish expeditions of 1663 and 1665 caused such damage that Indians never recovered and ethnic identity lost by 1708.</p>
<p>Documents unusual painted rock recovered from surface of burned rock midden in an unnamed arroyo in Bear Creek drainage north of Guadalupe River in Kerr County, Texas.</p>
<p>Reports search for and eventual discovery of several lithic sources in the Texas coastal bend.</p>
<p>Discusses surface collection of prehistoric artifacts collected along Nueces River near La Pryor in Zavala County, Texas. Artifacts; bifaces, unifaces cores and Guadalupe tools.</p>
<p>Three corner tang artifacts from Olmos Dam area of northern Bexar County documented from Orchard collection. Specimens represent three different varieties of corner tangs.</p>
<p>Documents four fragmentary corner tang knives from rockshelters on edges of Edwards and Stockton Plateaus in Val Verde County, Texas. Wear analysis revealed two types both hafted knives but used to cut different materials.</p>
<p>Over 50 artifacts associated with terrace burial near Falls City in Karnes County, Texas. Artifacts; Marcos projectile points, corner tang knives, drills, preforms, limestone gorget, ironstone, deer antler tines, quartz, asphaltum.</p>
<p>Documents pictograph site located along Guadalupe River near Sisterdale, Texas in rural Kendall County. Pictograph sites are rare in this section of the state, making this site a significant discovery.</p>
<p>Documents unusual ,expanding stem, metal projectile point from Comanche County in north-central Texas, and a straight stemmed iron arrow point recovered from along Pedernales River area of Central Texas.</p>
<p>Replication of Brose's experimental use of lithic flake to process meat failed to confirm wear patterns reported. There does not appear to be differential wear with processing of the meat of various species as Brose has implied.</p>
<p>Three Guadalupe tools recovered from Robards Hill area of the northeastern section of San Antonio in Bexar County. Site locations and material suggests the hilltops along the Balcones Escarpment were heavily utilized as lithic work stations.</p>
<p>Three metal points from the Billy Evans collection are documented. These artifacts are from South Texas, probably from Uvalde County</p>
<p>1983 Southwest Texas State University Archaeology Field School tested site 41HY37 near Aquarena Springs, San Marcos, in Hays County, Texas. Eight units were opened and a few artifacts were recovered from the middle archaic site.</p>

<p>Reports the location of earliest Wharton family cemetery at Eagle Island Plantation in Brazoria County, Texas. History of plantation and cemetery are presented.</p>
<p>Bromley Cooper collection includes archaic projectile points from both sides of the Nueces River in Duval, LaSalle, Webb and McMullen Counties. Analysis of this database of 2213 points suggests the Nueces River may represent a cultural boundary.</p>
<p>Describes flint knapping technique that produces large pressure flake scars like those observed on prehistoric corner tang artifacts, Marcos and Ensor points.</p>
<p>First of a series of short papers dealing with topics of interest in archaeology. Paper includes comments on historic excavation of La Villita, Fairmont Hotel, site looting in the Hill Country, land development in Bandera and Medina County.</p>
<p>Discusses number of small shell-working drills and variety of arrow points in the Ben Bickham collection from areas on northern half of Padre Island in Coastal Bend area of southern Texas.</p>
<p>Attempt made to reach beyond typological names to find functional use for Guadalupe tool. Proposed tool form may have been early Texas invention for defleshing hides.</p>
<p>Presents analysis of basic information available on quadrangle maps. Uses of maps are discussed.</p>
<p>New form developed by Office of the State Archaeologist for use initial recording archaeological and historical sites. Form summarizes information required for issuance of Trinomial Site Number.</p>
<p>Recorded names of some protohistoric and early historic Indian groups located along central and southern Texas coast may be compound Spanish words containing unanalyzed information about habits, culture, or physical characteristics.</p>
<p>Discusses ceramic platform pipe from Duval County, southern Texas</p>
<p>Recovery of lithic artifacts from areas normally flooded by Falcon Reservoir in Zapata and Starr counties described. Artifacts; tools and points ranging from Paleo-Indian to Historic Periods.</p>
<p>Analytical criteria for quantitative attributes of Andice and Bell points presented. Statistical analysis of types concluded Bell and Andice types may represent continuum of single technological tradition of Early Archaic.</p>
<p>Describes Clovis point found on surface in upper Guadalupe watershed of Kerr County, Texas.</p>
<p>Additional artifacts and data added to Moore's earlier paper [See Moore 1983 , 10(2) :14-22].</p>
<p>Further analysis of name of some early historic Indian groups presented to evaluate hypothesis such names Spanish "nicknames" containing information about groups.</p>
<p>Form and function: hand axes, fist axes and butted knives.</p>

Describes and compares ecology, history and archaeology of South Texas brush country with Australian Outback.
Applying restoration technique used forensic anthropology, artist Betty Pat Gatliff reconstructed face of Lower Pecos man whose skeleton had been recovered during Shumla excavations in 1933.
Discusses analysis of five Karnes County burials from Rudy Haiduk property near Falls City, Texas.
Cache of bifaces from southwestern Dimmit County, Texas.
Analysis of language groupings of some protohistoric Indian groups located central and southern Texas coast presented and relationships among groups hypothesized.
Examines ethnohistoric and archaeological evidence of Karankawa Indians of Central Texas Coast, reported to be both giants and cannibals.
Materials recovered Bandera County sites 41BN8, 11 and 12 reported. Materials; graters, prismatic blades, cores and points Gower, Martindale, Nolan, Travis, Bulverde Montell, Frio, Scallorn.
Reports survey of Goss Creek, tributary of Guadalupe River carried out enhance the archaeological knowledge of area. Points recovered; Clovis, Scallorn, Frio, Pedernales, Marshall, Lange, Montell, Angostura.
Discusses need for site recording in southern Texas.
Pictograph of four dancers site 41VV666 quite similar to panel at Meyers Springs (41TE9), 80 miles away. These two pictographs appear expressions of same ideogram, possibly portraying common ritual event.
Reports analysis of skeletal materials from Leyendecker Site (41CD62) located on relict channel of Colorado River in Colorado County, Texas. Individual was young adult and had suffered both ear and tooth infections.
Means Site(41NU184) located west of Corpus Christi on edge of Pleistocene terrace which overlooks southern margin of lower Nueces River floodplain. Artifacts; Archaic/Late Prehistoric points, preforms, gouges, cores.
Discusses chemical link between Escondido Ranch group obsidian artifacts and Malad source of material found in southern Idaho.
Documents two additional fired clay whistles from Bexar and Medina Counties. Third previously reported whistle also discussed.
Reports excavation of Goss Creek Shelter No. 2 Site(41KE110). Shelter used Archaic and Late Prehistoric periods. Artifacts; charcoal, fresh water mussel, flakes, bone, Edgewood, Edwards, Ensor, Castroville, etc.
Experimental replication of several styles of hearths undertaken to evaluate suggestions on creation and use of clay balls often found at prehistoric sites on Texas coast. Results documented.

Overview of archaeology of greater South Texas.
Describes initial excavation of shallow midden site in Gillespie County, Texas, appears occupied mainly during Early to Middle Archaic times, possibly in Late Paleo-Indian times.
Documents unusual brass projectile point from Bexar County in south-central Texas. Recovered from near surface of burned rock midden which contained Archaic and Late Prehistoric artifacts.
Tabulation of discriminant function values calculated for Andice and Bell projectile points from Central Texas presented.
Discusses rock art site (41WB56) in Webb County ,Texas.
Excavations conducted at McKinzie site near Corpus Christi in 1984 and 1985. Features noted and artifacts recovered reported.
Distinct figure, repeated at eight pictograph sites in Lower Pecos River region, combines elements not found in nature, suggesting represents character in mythology or oral history of Archaic artists.
Archaeological evidence in southeastern Texas seems to contradict Huebner's experimental finding that fired clay balls are by-product of hearth building. Intentionally made clay balls recovered from sites in Texas and Louisiana.
Discusses large flint knives found sites along Texas Coast. Possibly used ceremonial purposes. Points; Bell, Andice, Calf Creek, Charcos, Palmillas, Marcos, Perdiz.
Discusses problems and progress in Paleo-Indian studies in southern Texas.
Gamenthaler Creek drainage in Gillespie County, Texas produced over 600 Paleo-Indian and Archaic projectile points. Discusses private collections which include Golondrina, Angostura, Barber, Nolan, Pedernales, Marcos, Frio, Edwards.
Small holes in freshwater mussel shells attributed to human workmanship, use of shell as tool or ornament, Holes may be natural phenomenon--carnivorous snail. The Choke Canyon area discussed.
Documents unusual metal arrow point from, McCulloch County. Recovered from surface of ridge near San Saba River in Central Texas.
Documents two iron projectile points found by local resident early 1930's at site of old Osage community, in Colorado County.
Discusses early Texas geologists as observers of archaeological phenomena.
Documents preliminary report on "butted knife" biface type of artifact resulting from a survey form sent to members of TAS and STAA.

<p>Reports 1983-86 Southwest Texas State University field school and excavation at Zatopec Site (41HY163), San Marcos area, in Hays County, Texas. Site occupied during Archaic and Late Prehistoric periods.</p>
<p>Incised and/or grooved stones rare in archaeological sites, and function and age continue open to considerable speculation. A single specimen from northwestern Bexar County is described and discussed.</p>
<p>Eight Paleo-Indian projectile point fragments, recovered during the UTSA-CAR project in Choke Canyon Reservoir area, reanalyzed and documented. Golondrina, Miniature Plainview, and the tentative "Levi" types present in collection.</p>
<p>Paleo-Indian artifacts from Chaparrosa Ranch, southern Texas discussed.</p>
<p>Reports small rockshelter in Kinney county that appeared used as way station and disposal of the dead.</p>
<p>Discusses unusual grooved limestone cobble found by Mr. Joe McFatter west of Nueces River in Edwards County.</p>
<p>Archaeological Stewards are volunteer agents of the Office of the State Archaeologist. Article is summary of activities of Steward for Redford Texas area.</p>
<p>Documents bone flute, shell bracelet, and shell bead found on southeast Texas coast near Anahuac in Chambers County.</p>
<p>Discusses archaeological excavations at site 41ME34 in Medina County Texas.</p>
<p>Describes distinctive bone artifact from Toyah Horizon bison processing site (41VT66) in Victoria County, Texas. Postulated tool form utilized in initial stage of bison processing.</p>
<p>Documentation of Goss Creek Shelter in form of photographs, measured profile, and limited notes on stratigraphy.</p>
<p>Rare and hardly known prehistoric art form, painted snail shells, in Lower Pecos Rio Grande area is illustrated and described and its cultural placement suggested.</p>
<p>Several purported Paleo-Indian projectile points recovered from Bear Creek area of Brewster County, Texas, reanalyzed and found erroneously classified.</p>
<p>Essay on meaning of Archaeology, comments on need for replicative studies to confirm or disconfirm ethnohistoric accounts.</p>
<p>Discusses lithic reduction process that produces preforms and ultimately projectile points. Illustrative material from Kendall County.</p>
<p>Discusses excavation and analysis of Hinds Cave, a large rock shelter in Val Verde County known for long archaic sequence preserved in deep, dry stratified deposits.</p>
<p>Describes second phase excavation of shallow midden site in Gillespie county, Texas. Done in May, 1986. See Saunders 1986: 13 (3) 6-27.</p>
<p>Eight metal arrow points recovered from vicinity of historic Fort Lipantitlan in northern Nueces County, Texas discussed.</p>

Discusses studies of obsidian Clovis point from Central Texas Coast, and other Paleo-Indian obsidian artifacts from Texas.
Presents suggested translation of parts of two chapters of Alonso de Leon's history of conquest of Nuevo Leon dated 1649.
Describes artifacts from surface site 41GL19 on Pedernales River in south-central part of Gillespie County. Artifacts; Darl, Ensor Scallorn, Edwards, Perdiz.
Potential Paleo-Indian site exposed by flood control work along Chiltipin Creek in San Patricio County east of Sinton, Texas.
Arrow shaft straighteners in southern Texas and some California ethnographic comparisons.
In 1987 archaeologists from UTSA-CAR carried out salvage operations at prehistoric cemetery located in Austin County. Indications are that cemetery utilized during Late Prehistoric and/or Transitional Archaic Periods.
Four unusually small Corner Tang artifacts documented, described and illustrated. Wear analysis indicates extensive use as tools used for variety of functions.
Excavations at the Kent-Crane Site, a massive shell midden, in Aransas County, Texas suggest site occupied seasonally by pre-Rockport Complex populations and all seasons by Rockport Complex peoples.
Presents update on Mesoamerican artifact occurrence in southern, Central and western Texas.
Reports recovery of Nockenut Clovis point in Wilson County in 1986.
Presents results of original archival and historical research conducted during 1987 on Mocha ware, a variety of ceramic ware. Examples from La Villita Earthworks presented.
Discusses chronology and possible sources of Perdiz and Scallorn points in South Texas.
Documents brass projectile point recovered from surface of large site in northern Nueces County, Point was surface find from site 41NU 209.
Revisits Kincaid Rockshelter, La Jita Site and archaeology of Sabinal River.
Retrospective of accomplishments of STAA during its first fifteen years.
Report of excavations at Dan Baker Site (41CM104) in Comal County, ongoing since 1977. Established occupation during Paleo, Archaic and Prehistoric periods. Paleo points; Plainview, Angostura, Clovis, bifacial gouge.

<p>Relatively new techniques of radiocarbon and thermo-luminescent dating on natural deposits or soils provide useful alternatives for dating common host archaeological materials in southern Texas.</p>
<p>Recent radiocarbon dates for Pedernales point indicate point type use at earlier date than previously believed.</p>
<p>Identification leafy material and fibrous binding present on four shaped limestone flakes discussed.</p>
<p>Documents recovery of Folsom fluted projectile point from Live Oak County in South Texas.</p>
<p>Late Archaic burial from Lower Nueces River Drainage, Live Oak County, Texas, discussed.</p>
<p>Relates incident during the Sutton-Taylor in McMullen County circa 1869.</p>
<p>Excavation of Bear Creek Site (41KR172) in Kerr County, Texas during 1983 and 1984 reported.</p>
<p>Discusses 1989 University of Texas at Austin archaeological field school in northeastern Uvalde County, Sabinal Valley. Sites 41 UV132 and 41UV 21 were excavated.</p>
<p>Documents 23 stone tools collected from Rio Grande gravel deposits in 1949 by M. E. Bingaman in northwestern Webb County. Artifacts; Guadalupe tools and other pick-like bifacial forms.</p>
<p>Documents George S. Meyer Collection recovered period of many years from middens in lower hill country near San Antonio.</p>
<p>Cremation burial from site in Dimmit County, southern Texas.</p>
<p>Reports lack of proper documentation for three major excavations at Mission Espiritu Santo de Zuniga in Goliad State Historical Park in Goliad County between 1933 and 1977. Paper affords partial report.</p>
<p>Fietsam Site located in Fayette County adjacent to unnamed tributary of Lone Pool Creek. Much of site disturbed by gravel quarry in area. Documents the site. Fragmentary Andice collected at site.</p>
<p>Authors propose that evidence of chiseling and filing metal arrow points found at Fort Lipantitlan is indication points made by blacksmiths not by Indians themselves.</p>
<p>Documents iron arrow point from south-central Terrell County in eastern Trans-Pecos region of southwest Texas.</p>
<p>Documents large brass arrow point recovered in town of San Patricio, San Patricio County, Texas. Projectile recovered by author, from surface of newly disturbed area.</p>
<p>Documents settlement of town of Stonewall in Gillespie County, Texas.</p>
<p>Describes assemblage of lithic artifacts from preceramic site 41CD122 in Colorado County, Texas. Points; Ensor, Travis, Plainview, Angostura.</p>

Status of archaeology in northeastern Mexico.
Burial from Morhiss Site in Victoria County, Texas contained group of snake bones subsequently described as a necklace.
Documents results of continuing excavation of Fox Draw Site in Gillespie County (41GL175).
<i>Clovis points from Comanche and Falls counties of Central Texas are documented.</i>
Documents possible Mesoamerican artifact, face on a ceramic disk, discovered Nueces County, Texas. Ceramic artifact recovered from surface of recently disturbed area along Nueces River.
Four metal points from northwestern South Dakota described and commented on in this report.
Documents large biface from Atascosa County with comments on function of such artifacts in Prehistoric South Texas.
Discusses letter indicating active interest in town of Roma by Stephen F. Austin, in 1823.
Documents and illustrates fragmentary Folsom point from southeastern Bexar County, Texas.
Documents fragmentary Folsom point from Cibolo Creek in Wilson County, Texas.
Describes Archaic and Late Prehistoric lithic artifacts found by Joe D. Hudgins on surface at two aboriginal sites in mountainous region of Jeff Davis County, Texas.
Reports, describes and illustrates Clovis point from Kendall County, Texas. Found on surface of small campsite along Guadalupe River near Waring. Montell point also recovered.
Reports Bammel Site, 41KR10; Archaic site in Kerr County. Faunal remains include bone, teeth skeletal parts. Lithic artifacts; Montell, Castroville, Marshall, Pedernales, Nolan, La Jita.
Presence of beveling on projectile point edges may or may not have significance as diagnostic attribute for a specific point type.
Early Archaic "eccentric" lithic artifacts in southern and Central Texas.
Describes small copper knife or dirk found near Mission San Jose in San Antonio, Texas, and discusses tools available to do metal working.
Documents grooved stone from southern Terrell County in eastern Trans-Pecos area of Texas. These grooved stones have been ethnographically documented as being used for straightening of arrow shafts.
Metal arrow point found embedded in log wall of a 19th century house in Travis County is described and discussed.

<p>Four possible Paleo-Indian artifacts surface collected from fields of Johnson farm southeastern Medina County, Texas is documented. Points; Clovis and Gower.</p>
<p>Interactions between Indians groups using technological traditions of southern Plains and southeastern Woodlands discussed using southeast Texas as study area.</p>
<p>Possible Almagre projectile points from Panther Springs sites described and discussed. Also speculated these points are true type and not preform.</p>
<p>Radiocarbon dates from archaeological excavations in Medina County.</p>
<p>Sandstone artifact recovered from site along Miguel Creek in Atascosa County, Texas, appears naturally formed but is incised with series of fine lines to form deliberate patterns comparable to some incised bone artifacts.</p>
<p>Descriptive data provided for a fired clay figurine from southeastern Bexar County, Texas. Unlike any previously reported figurine in Texas and cultural attribution uncertain.</p>
<p>Reports program to assess site potential of Beecroft Site Complex, 41HY197 in Hays County, Texas. Determined that uncontrollable vandalism severely limited possibility any significant contributions.</p>
<p>Large, heavily engraved, tubular stone pipe described and discussed. Pipe appears significant for heavy engraving.</p>
<p>Describes surface-collected lithic artifacts from Paleo site near Washboard and Isinglass Canyons in Terrell County, Texas. Presence of Plainview points may denote human occupancy ca. 10,000 years ago.</p>
<p>Overview of results of the Texas Obsidian Project.</p>
<p>Conch shell artifacts from sites along Medina River and its tributary drainages in Bexar and Medina counties documented and described.</p>
<p>Discusses technical improvements in accuracy and reliability of radiocarbon dating.</p>
<p>Incised stone pendant from Val Verde County, Texas, with unusual design on both faces documented and illustrated.</p>
<p>Reports search for and discovery of water source in concealed cave on Ranch of E. T. Rucker near Del Rio, Texas.</p>
<p>Describes and illustrates two Clovis points from southeast Dallas County and one possible Ross County Clovis distal fragment . Artifacts recovered from sand and gravel pit operations and no longer in true stratigraphic context.</p>
<p><i>Plainview points from the St. Mary's Hall Site, South Central Texas.</i></p>

Shield Shelter, 41VV1088, is 16th historic pictograph recorded in Lower Pecos River region. Twenty-seven horseshoes are contained within a circle that is in turn framed by paired undulating lines.
Radiocarbon age data discussed in terms of implications for defining a chronology of adaptive change during 6,500 years of Archaic occupation of Coastal Bend area.
Elaborately incised stone from rockshelter in Val Verde County, Texas described and illustrated. Incised design, this stone one of very few designs that finds parallels on painted pebbles in the Lower Pecos.
Probable aboriginal gunflint from Live Oak County, Texas described and discussed.
Notes on lithics from Plainview occupation at St. Mary's Hall Site, South Central Texas.
Reports salvage archaeology conducted at Texas West Indies Ranch Site in 1961 due to road construction which exposed skeletal remains. Many shell and bone artifacts recovered from 29 burials.
Presents criteria for corner-notched biface common in lithic collections from Medina, Bandera and Bexar counties. Specimens have single, deep, corner notch found on one basal corner.
Results presented which examines effect of percussor striking tip diameter on dimensions of chert flakes produced by quartzite hammerstones.
Documents two iron points recovered from surface of large Indian mound, Bluntzer Site, 41NU209, in Nueces County.
Archaeological excavations conducted at Sorcerer's Cave (41TE282) in 1990. Excavation yielded local variation of Toyah projectile point which corresponds with Late Prehistoric radiocarbon date from wooden mortar inside cave.
On importance of archaeological collections.
Report on small rockshelter of Cueva Corbin located on edge of Edwards Plateau on borders of Medina and Bexar counties near San Antonio, Texas.
Two fired clay figurines from south-central Texas, documented and illustrated. One specimen from Late Prehistoric Rockport time period, other may be more recent.
Bone tool assemblage from Alabonson Road site includes seventeen worked elements and one possible bone tool.
Attributes of seven types notching failures experienced during Andice/Bell replication experiments presented.
Materials from site 41UV20: Uvalde County, south-central Texas. Artifacts include burned rock midden, burial, Sabinal, Ensor, Frio, Pedernales, Kinney, Montell, Castroville, Lange, Marshall, Pandale, Tortugas.
Form useful for documenting your collection presented.

Describes and illustrates fragmentary Folsompoint from southeast Dallas County, Texas.
<i>Axtell dart point type named by Frank Bryan in 1936 reviewed to provide current data regarding presumed early Middle Archaic style.</i>
Reports survey of lower Geronimo Creek watershed in Bexar, Medina and Bandera counties.
On the beach: Trace element analysis of obsidian artifact from site 41JF50, upper Texas coast.
Comment to Birmingham and Huebner concerning article "Incised Bone and Conch Shell Artifacts from the Texas West Indies Site".
Patterson presents dissenting view to Prewitt and Chandler's proposed Axtel dart point as new type.
Reports prehistoric lithic quarry site in area where no quarry sites recorded before. Site consists of large imbedded boulders of lithic material not previously identified in area of southwest Texas.
Summarizes accomplishments of first STAA/IPC field school. Discussion of methodology of Medina Valley project provide contextual information regarding efforts of field school.
Two polyhedral cores found Comanche Hill in San Antonio, Texas documented and suggestions made for use of blades removed from cores. Suggested time period for artifacts is Late Prehistoric.
Engraved tubular stone pipe similar to one described in previous report [17(4)31-34] and fragment of stone pipe broken in manufacture, reported.
Chipped stone artifacts from site 41DM59, Dimmit County, southern Texas. Artifacts; Perdiz, Guerrero, Edwards, Ensor, Shumla, Bell, Tortugas, Frio, Bulverde, Desmuke, Conejo, Lange, Martindale, corner tang, triangular, corner notched, drill, Toyah,
Documents and illustrates eight specimens of freshwater mussel with incised and notched decorations.
Discussion of skeletal remains after uncontrolled digging event of prehistoric cemetery on Redfish Bay near Corpus Christi.
Investigations of O. H. Ivie Reservoir in Concho, Coleman and Runnels counties. Recovered four fragmentary specimens of engraved freshwater shells from Toyah and pre-Toyah occupations dating between A.D. 1060 and 1550.
Concerns pebble from Real County that is both incised and painted.

<p>Report excavations at Dewees site in Kerr County. Artifacts; Angostura, Nolan, Pedernales, bifaces, cores, cobbles, burned limestone, scrapers, mano hammerstones, metates, gravers, Edwards, Perdiz.</p>
<p>Paleo-Indian engraved stones from Gault site, 41BL323.</p>
<p>Data summarized on present state knowledge regarding initial use of bow and arrow southern North America. Although not widely accepted, increasing evidence for introduction at least as early as 2000 B.C..</p>
<p>Documents possible new locality Guadalupe tool use. Guadalupe tools found most frequently along Guadalupe and San Antonio Rivers.</p>
<p>Describes and illustrates polyhedral blade core from northeast San Antonio, Bexar County, Texas. Cores this type generally considered of Paleo-Indian cultural association.</p>
<p>Two polyhedral cores from Comanche Hill reported by T. C. Kelly 1992: 19(2)29-33 possess technological affinities Paleo-Indian (Clovis) rather than Late Prehistoric (Toyah) blade cores and there are errors in Kelly's technological inferences.</p>
<p>Austin phase burial from Frio County, southern Texas: Archaeology and physical anthropology.</p>
<p>Reports and illustrates large, deeply engraved stone pipe from Kerr County, Texas. Design of engraving different from any previously reported stone pipe in Texas.</p>
<p>Summarizes 1992 STAA-IPC field school accomplishments. Several associated sites excavated and additional survey undertaken.</p>
<p>Alternate interpretations could be made for some of Ricklis' conclusions. See Plains Anthropologist 37(140):261-273.</p>
<p>Describes and illustrates ten Scottsbluff points from Atascosa, Frio and McMullen counties in south-central Texas. Ten specimens reported greatly expands known number Scottsbluff points these counties.</p>
<p>Studying Archaic of southern Texas and northern Belize: notes from field.</p>
<p>Basketry, cordage and stone, bone and wood artifacts collected from Ocampo region described and compared similar specimens from other sites in Coahuila and Lower Pecos region of Texas.</p>
<p>Three small limestone pebbles with fine line incising illustrated and described. Two from burned rock midden in northwest Bexar County one from burned rock midden in Kerr County.</p>

Side Notched Arrow Points (111 out of 148 specimens) from Rio Grande region of Texas and Mexico given tentative name Caracara.
Documents possible late archaic burial salvaged from private ranch road building activities on ranch in northern Bexar County, Texas.
Comments on Paleo-Indian large prismatic blade technologies and later small prismatic blade technologies at archaeological sites in Texas.
Insights Clovis technology: Clovis point from Atascosa County, southern Texas.
Discussion for what author considers to be Bandy points.
Bone projectile point and bone awl recovered from McFaddin Beach site (41JF50) on upper Texas coast documented.
Documents and illustrates boatstone from Kerr County in southern part of Central Texas. Rare find this area, appears to be southwestern limits for distribution in Texas.
Reports results quest to identify colors used in article describing various glass beads.
Collection of large stemmed points with massive barbs from Starr and Zapata counties in the Lower Rio Grande Valley documented and discussed.
Describes excavation of shallow midden site in Gillespie County.
Remembering the Alamo: 20 years of archaeology by the University of Texas at San Antonio.
Tiny chert drills surface-collected from sites in coastal northeastern Tamaulipas, Mexico reported with supporting evidence of use in rotary fashion. Probable method obtaining proper size source material is explored.
Several artifacts, mostly of Paleo-Indian or very Early Archaic origins, found in or near sinkhole near Georgetown, Texas described.
Four metal projectile points from Medina County in south-central Texas illustrated and discussed. All four made of iron. Three are arrow points but fourth is spear or lance point.
Rickliss responds to Patterson's comments on paper which appeared in Plains Anthropologist 37(140).
Small lightly incised limestone pebble from north Bexar County reported and illustrated. Incised and engraved pebbles rare in archaeological literature of Texas. Specimen reported to add data these scarce artifacts.
Site at El Chorro Falls, near Saltillo, Coahuila, Mexico.

<p>Reports and illustrates Paleo-Indian projectile points from Olmos Basin in San Antonio, Texas. They are from private collections on and around San Antonio. Most were not known about or illustrated in 1989.</p>
<p>Discusses private collection of Harding Black pottery.</p>
<p>Reply comments by Ricklis (1993) on data from southeast Texas, evidence discussed for concurrent use of spear and bow and arrow during Late Prehistoric period of inland southeast Texas.</p>
<p>Letter of appreciation for a grant from STAA.</p>
<p>Ground stone ornaments from Lower Rio Grande reported and illustrated. Both rectangular and triangular forms represented. Artifacts recovered from sites in Starr and Zapata counties in Texas and in northern Tamaulipas.</p>
<p>Results given for experiment obtain edge damage on chert flakes by foot trampling. Comparisons made between accidental edge damage and edge damage from functional uses of utilized flakes.</p>
<p>The contexts of trade between the Brownsville Complex and Mesoamerican cultures: A preliminary study.</p>
<p>Letter of tribute for J. B. Sollberger</p>
<p>Fourteen sandals collected from Sierra de la Encantada in northern Coahuila described and sorted into three categories based on construction methods.</p>
<p>Large chert longitudinally symmetric biface eccentric found near Colha site in Belize described in detail and compared with other Belize lithic eccentrics.</p>
<p>Four surface-collected Clovis points (two complete, two fragmentary) from northeastern valley margin of Angelina River in San Augustine County described.</p>
<p>A case of mistaken identity: A hafted stone tool that's not from the Nueces River drainage, southern Texas.</p>
<p>Paper to report, describe and discuss boat-shaped mortars in Reagan County, Texas.</p>
<p>Documents and describes six Folsom points from south and southwest Texas. All except one from counties bordering Rio Grande River. Exception from Duval County.</p>
<p>Well-made Dalton projectile points and knives of middle to late Paleo-Indian period occur throughout High Plains and Woodland regions of mid-continental America and throughout most of Texas.</p>
<p>Several tubular stone pipes from Lower Rio Grande Valley documented and discussed. Some from northeastern Tamaulipas, Mexico and some from Texas side of Rio Grande.</p>
<p>Reports and illustrates decorated stone pipe from Uvalde County, Texas. Tubular stone pipes widely distributed in Texas, but those with decoration are extremely rare.</p>

Documents two fired clay whistles from general area of San Antonio in South Texas. Type and style of whistle believed associated with early mission period in South Texas but may have more ancient history.
Introduction to lithic analysis presented to give inexperienced individuals an idea of why and how lithic analysis is done.
Documents and illustrates Folsom point from Dallas-Fort Worth area of north-central Texas. Surface find from northeast corner of Tarrant County.
Large triangular bifaces as grave goods in southern Texas: Example from 41LC4, Lavaca county. Points; Perdiz, Scallorn, Frio, Ensor, Darl, Bulverde, Pedernales, Golondrina.
Petronila Creek site (41NU246) has remains of two species of Bison, both associated with humans. Bison bison of Archaic age. Deeper from Pleistocene deposits apparently older than 16,880 years and contains Bison antiquus.
Use of Virgin Nerite shells as ornaments and grave goods documented from Morhiss site (41VT1) in southeast Texas.
<i>Plainview projectile point excavated from stratified context 41AT118, a buried site in drainage divide uplands above La Parita Creek in Atascosa River drainage, Atascosa County.</i>
Artifacts made of sandstone rare in limestone areas of Texas. Documents two unusual artifacts made of ferruginous sandstone. From southern Terrell County in eastern Trans-Pecos.
Results experiments incidental impact breakage of arrow points given, using brush piles, rock, trees, and soil as targets. Breakage types similar those published by others when using dead animal targets.
Early Archaic chronology in southern Texas.
Documents and illustrates stone pipes from Bexar County, Texas where similar artifacts not recorded in literature. Both tubular and elbow types presented.
Results experiments presented for perforator use-wear from drilling holes wood, ceramics and leather. Possible to determine perforator been used, difficult to identify type of material worked.
Documents archaeological investigations by T. C. Hill, Jr. in 1971-1972 at the Errol Jonsson #1 site located in western Zavala County.
Paper describes and illustrates eleven incised stones found state of Nuevo Leon, Mexico. Incised stones only documented examples in state.
On the promise and perils of field schools
History ownership property containing 41BX527 spans period from 1808 to present. History recounted focuses on years between 1855 and 1896 when Dr. Theodore Heermann owned property.

<p>Theodore Heermann kept journals and account books throughout adult life. Valmont account book dates from 1856 to 1873 and provides wealth of information regarding development of Theodore's ranch, Valmont.</p>
<p>A. L. Heermann collected around San Antonio and along Medina River from 1854 until 1865. Knowledge of freshwater mussels, amphibians, reptiles, and birds of area advanced through his shipments of specimens.</p>
<p>Paper examines aboriginal native american groups encountered by early Anglo-European explorers along Medina River in southwestern Bexar County.</p>
<p>Investigations at Pampopa-Talon crossings site 41BX528 yielded Perdiz arrow points, bone-tempered pottery, medium and large end-scrapers and cobble tools designated as "slickstones".</p>
<p>The protohistoric period in southern Texas.</p>
<p>Several Folsom points from four counties in northern part of south-central Texas documented, illustrated and discussed. In collections of eight different individuals and have been recorded over several years.</p>
<p>Six San Patrice points made of fused volcanic glass from Manning Formation described and illustrated.</p>
<p>Unusual stone celt from Nuevo Leon, Mexico described and illustrated.</p>
<p>Documents and discusses in-situ Clovis point found in Kerr County.</p>
<p>Fired clay "T"-shaped pipe from near Hunt Texas in Kerr County reported and illustrated. Most unusual specimen and first reported this part of Texas.</p>
<p>Discussion on lithic artifacts from site 41FY56 in Fayette County, Texas, including chert cobble primary reduction strategies at this site.</p>
<p>Extensively decorated stone pipe documented and illustrated. Found Val Verde County. Prehistoric stone pipes with engraved decoration previously reported.</p>
<p>During summer 1972, archaeological field school for Southwest Texas State University conducted at Cochran Farm site, 41GZ2, Gonzales County. Artifacts; Travis, Godley, Marshall, Pedernales, Scallorn, Morrill.</p>
<p>Issues facing the Southern Texas Archaeological Association.</p>
<p>Illustrates group long rectangular marine shell ornaments of type rarely reported or described in Texas literature.</p>
<p>Advantages and limitations chert flake as a pressure flaking tool discussed. Experimental examples this pressure flaking technique given.</p>
<p>Four Clovis points surface-collected from undocumented sites near Houston reported and illustrated. Three from Montgomery County just north of Houston, one from Brazoria County.</p>

Documents and discusses excavations at J2 Ranch site.
Spanish colonial archaeology in Victoria, Texas region.
Documents and illustrates basalt shaft straightener from Rattlesnake Canyon in Val Verde County, Texas.
Experiments to drill holes in shell using a bow drill, described. Two bit types used, including (1) wet sand on end of wood drill shaft, and (2) hafted chert perforator on wood drill shaft.
Describes two modified Rabdotus snail shells recovered from Bluntzer Site 41NU209, Nueces County. One snail shell coated with asphaltum, other has been cut.
Skeletal remains representing a single, primary human interment excavated following accidental exposure at edge of sand pit on Rudy Haiduk property in Karnes County, Texas.
Four Guadalupe tools from Frio and Atascosa counties documented and illustrated.
Archaic points in surface collections from estuarine sites along Central Texas Coast examined for patination and placed into local chronology. Estuarine sites plotted based on time-diagnostic points found those sites.
Archaeological site attributable mainly to Late Prehistoric period examined this report. The location and description of site presented, and analysis artifacts collected included.
Limestone pebble with engraved motif one surface documented and illustrated. It is fourth pebble reported Bexar County.
Documents and discusses two incised pebbles and a painted stone from Kerr County, Texas.
Two engraved stone pebbles from midden site on Sulfur Creek in Lampasas County, Central Texas documented and illustrated.
Site destruction at Falcon Reservoir, southern Texas.
Five butted bifaces from Kendall County, Texas containing microscopic residue illustrated and residue analyzed. Senior author describes artifacts and recovery, co-author performed microscopic analysis.
Previously unreported site with numerous bedrock mortar and metate features discussed. Site located in Tamaulipas in northeastern Mexico, on shoreline Falcon Reservoir. Description given of site.
Reports and describes large group of stone pestles recovered in Falcon Lake area of Lower Rio Grande.
Alamo Wells excavation spring of 1995 may have been the single most publicized archaeological project in history. Paper clarifies goals, actions and consequences of project.
Documents and discusses two mid-back tang scrapers found in Kerr County, Texas.

Documents and illustrates small basalt pestle from Mission San Francisco de la Espada in San Antonio, Texas. Only artifact made of basalt known to be recovered at this mission.
Two stone pipes from Falcon Reservoir on Lower Rio Grande in South Texas and North Tamaulipas, Mexico described and illustrated.
Mesoamerican obsidian at sites in Falcon Reservoir and Lower Rio Grande area of southern Texas and northeastern Mexico.
Two lithic specimens made of Alibates agatized dolomite documented and illustrated. One from Wilson County and one from San Patricio County. No known artifacts of Alibates dolomite previously reported from areas of South Texas.
Botanical research shows native palm trees existed on Texas Coast northward to Matagorda Bay in the late 1600s. Small bits of evidence reinforce model that supports location of Fort St. Louis in Matagorda Bay area.
Human burial salvaged Falcon Reservoir in 1990 discussed. Artifacts apparently associated with burial recovered are described. Brief comparison with other burials salvaged from same area.
Clovis points from Kendall, Tom Green and Walker counties documented and illustrated. One from each county plus one without provenience.
Blocky desiccated piece of agave, impaled by terminal spines of at least four agave leaves, apparently used as pincushion that served several purposes, including keeping stripped fibers out of ashy shelter fill.
Documents and discusses pictographs at Hatfield Shelter located in western Kerr County, Texas. Prehistoric paintings in county extremely rare and every effort should be made to preserve, document and record them.
Reports and illustrates three incised pebbles from Central Texas. One each from Burnet, Llano and Williamson counties.
Discusses Hog Island #1 site, small Rockport phase (ca. A.D. 1250/1300-1700) camp on Hog Island in Redfish Bay, near tidal pass between Corpus Christi and Gulf of Mexico.
1995 survey of Hupedo Ranch in southwestern Travis County by author located and recorded 10 prehistoric shelters.
Report of archaeological investigations at Mission Espiritu Santo De Zuniga (41VT11).

Discusses 1995 STAA field school at Beene site (41BX831) along Medina River in south Bexar County.
Two caches of lithic bifaces documented and illustrated. One cache from Starr County, Texas, other from Tamaulipas side Lower Rio Grande.
Reports 1986 discovery of prehistoric burial at site on Mexican side of Falcon Reservoir on Lower Rio Grande.
Brass gold-plated coat button found old port town of Quintana, Texas (41BO135) showing a fouled anchor and a banner embossed with the initials "T.M.C." is reported.
Seven previously unreported Folsom points reported and illustrated. Three from Bell County, one from Cochran County, two from Limestone County and one from Milam County.
Archaic burial patterns in southern Texas. Further data from the Castillo site (41ZP2), Falcon Reservoir.
Several decorated freshwater mussel shell artifacts illustrated and discussed.
Presents documentation of new historic rock art site located short distance south of Rio Grande in Coahuila, Mexico.
Alignment sandstone rocks in occupation site with rich Archaic period component reported. Rock alignment and site location described. Artifacts recovered also described.
Author evaluates bedload cherts, upland residual cherts, and bedrock ledge or nodule cherts in terms of availability and suitability for prehistoric knappers.
Illustrates and documents four unrecorded Folsom points and one Midland point. One from Llano County in Edwards Plateau area of Central Texas. Other three Folsom and Midland from Midland County in the Lower Plains.
Complete Folsom point from Wilson County reported and illustrated. Only one Folsom point previously reported from this county.
Two ornamental artifacts collected in occupation site on Rio Salado in northern Tamaulipas, Mexico reported. Artifacts described in detail and general description of site and other artifacts collected given.
Five fluted Clovis points and one Folsom point illustrated and discussed. From Falcon Lake area of Lower Rio Grande in Tamaulipas, Mexico and South Texas.
Archaeological materials from the middle Rio Grande, southern Texas and Coahuila.
Three extensively modified quartzite cobbles illustrated and described. Artifacts from Bexar, Uvalde and Ellis counties.

Describes two Rabdotus snails with patterned perforations from 41CV935 at Fort Hood, Texas. Context suggests they may relate to Austin phase.
Large number of bottles and jars dating from Historic period salvaged from historic ranch located within conservation pool area of Falcon Reservoir in 1995. 41ZP89.
In 1952 relic hunters removed a bundled burial of a young woman from deposits at Panther Cave (41VV83). The remains have been returned to TARL .
Four large unstemmed bifaces documented and illustrated. All from cultivated fields bordering Cibolo Creek in northern Wilson County.
Personal perspectives on artifact collecting: examples from Texas and northeastern Mexico.
Burial discovered within historic site of Old Zapata, in Zapata County, Texas is reported.
Presents description of artifacts recovered from various surface collections and excavations conducted at Late Archaic cemetery at the Oso Dune Site(41NU37).
Clovis fluted point documented and illustrated. From a sandpit near Lake Houston in Harris County, southeast Texas.
Waco Sinkers infrequently reported outside Central Texas area. Have never been documented as found in Kerr County to this authors knowledge.
Three previously unreported Scottsbluff points, two from Zapata County in South Texas and one from Tamaulipas in northeastern Mexico documented.
Cache of freshwater mussel shells, found on open campsite on tributary to Pecos River in Crockett County, consists of six relatively large Cyrtonaias tamicoensis right valves.
Four Clovis points from Bexar and Wilson counties documented and illustrated. Three from Wilson County and one from Bexar County.
Archaeological legacies: the significance of notes and photographs.
Small atelier, workshop area, located on terrace in rich occupation site on Rio Salado in northeastern Tamaulipas, Mexico described and illustrated.
Twenty-two tubular stone pipes and pipe fragments from Lower Rio Grande area of South Texas documented and illustrated.
Initial finds along upland terrace in eastern Guadalupe County suggest a strong affiliation with Middle Archaic culture of southern Texas.
Two large sandstone abrading stones collected from unrecorded bedrock mortar and metate site located on Lower Rio Grande in Tamaulipas, Mexico described and illustrated.
Two large cakes of processed pigment exhumed from dry rockshelter, 41VV68, in Lower Pecos region probably in 1950s, and kept by their collector for almost 40 years.

<p>Four metal arrow points from South Texas and Tamaulipas, Mexico documented and illustrated. One from Atascosa County, one from Uvalde County and two from Tamaulipas side of the Rio Grande.</p>
<p>Documents and illustrates basalt shaft straightener from southwest Terrell County in the Texas Trans-Pecos.</p>
<p>Arrow point specimens recorded in primarily Archaic period site located on Rio Salado, Tamaulipas, Mexico reported. Points; Caracara, Clifton, Perdiz, Starr, Toyah.</p>
<p>Describes a site in Travis County, Texas, within the city limits of Austin, that was completely destroyed by looters (41TV1614).</p>
<p>A prehistoric burial discovered eroding from a major occupation site, Scissors Island Site, on the shoreline of Falcon Reservoir is discussed</p>
<p>On the east bank of Cypress Creek is an intermittently exposed feature consisting of dressed limestone blocks forming an open rectilinear outline. Anderson Mill Site, 41TV130.</p>
<p>This report provides preliminary information on the occurrence of Rangia cuneata on the Lower Rio Grande Delta in Cameron County, Texas and Tamaulipas, Mexico.</p>
<p>Two sites with boat-shaped mortars were recorded in a recent survey just east of the Pecos River in Crockett County, Texas (41CX802, 41CX814).</p>
<p>Two marine shell pendants from inland counties in South and south-central Texas are documented and illustrated. One is from Wilson County and the other from Gillespie County.</p>
<p>The use of the Oxidizable Carbon Ratio (OCR) dating method is discussed.</p>
<p>Discusses the artifacts and burials from a vertical shaft cave, Site 41UV356 in Uvalde County, Texas.</p>
<p>Discusses the looting of archaeological sites and the illegal trafficking of artifacts, at Falcon Reservoir and other areas on the Texas-Mexico border.</p>
<p>Marine shell of many kinds have been modified for use as tools and ornaments. However, quahog shells are rarely mentioned in Texas literature.</p>
<p>The Lower Colorado River Authority has proposed to dismantle six buildings located below Roy Inks Dam in Burnet County.</p>
<p>This report is to document and discuss an Andicepoint from Kerr County, Texas.</p>
<p>Data are presented on the chronology and geographic distribution of the Pedernalespoint in Southeast Texas.</p>
<p>A cache of marine shell beads, found in a rich occupation site/prehistoric cemetery in the conservation pool area of Falcon Reservoir is discussed.</p>

Two Clovispoints, one each from Atascosa and Bexar counties are documented and illustrated.
Memories of J. W. House, teacher and archaeologist.
The results of a brief survey conducted at a rockshelter in Seminole Canyon State Historical Park in January 1997 are presented.
This paper reports and illustrates a basically complete Midland point.
A Guadalupe tool recovered from the south shore of Travis Lake during a period of low water is described.
This paper reports and describes unifacial corner-tangartifacts and proposes a functional category through low-power use-wear analysis.
The manufacture of wide, thin bifaces in Texas is discussed.
An experimental burned rock pit oven was constructed and used for estimating rates of burned rock reuse and discard for burned rock middens in Central Texas.
This paper reports three painted pebbles recovered during the Rock Art Foundation's 1998 test excavations in 41VV156.
A review of A Field Guide to Common South Texas Shrubs by Richard B. Taylor, Jimmy Rutledge and Joe G. Herrera.
A review of The Alamo: An Illustrated History by George Nelson
A review of the origin of the name "Coahuiltecan".
A number of marine shell ornaments found in various sites within the conservation pool area of Falcon Reservoir are examined.
A single polyhedral core from the Encino Park area of northeast San Antonio is described and illustrated.
A Folsompoint previously reported found in Hinds Cave in the 1960s was actually found in Blanco County some 30 years earlier.
Two Guadalupe tools collected from the surface of the Tschoepe-Harbroth site in Guadalupe County are described.
The Elizabeth Staha Hughes collection, recovered in 1930 and consisting of 60 lithic artifacts, is illustrated and documented.
This paper discusses the various factors that can affect the width-to-thickness ratio of a bifacial dart point, as an aid to understanding some of the details of the manufacturing process for dart points.
A discussion of the life, diet, trade patterns and burials of the American Indian during the Late Archaic period in the area referred to as the Rio Grande Plain.
A polyhedral blade core is documented and illustrated. Generally considered to be early Paleo-Indian.

<p>A 5 year regional drought has caused Amistad Reservoir to drop to the lowest levels since the late 1960s, exposing prehistoric sites. Long term low water effects researched.</p>
<p>A ground stone mano discovered in the area of a remote cave in southwestern Coahuila, Mexico is discussed.</p>
<p>A discussion of potters in South Texas in the 19th & 20th century.</p>
<p>Neither surface inspection nor shovel-testing would discover cultural materials when overlying deposits from natural levees are too young to bear archaeological remains.</p>
<p>This report documents two artifacts described as "Ceremonial", but wear analysis reveals practical use.</p>
<p>A look at the program for STAA's field school on the asteroid 81PL3 in the year 2098.</p>
<p>A discussion of the obsidian point from 41ME29 and the x-ray fluorescence testing indicating the source as Malad, Idaho.</p>
<p>A general discussion of the rare occurrence of cremation burials in South Texas and the burial discovered in 1986.</p>
<p>Folsom points from widely separated areas of Texas are illustrated, documented and discussed.</p>
<p>A brief report of the artifacts recovered from the military hearths from the McMullen Site, 41SP190.</p>
<p>Excavation in a dry rock shelter, although damaged by relic hunters, retained some intact deposits that date to 6800 and 7600 years ago. Some artifacts bore traces of pigment.</p>
<p>Uses of prehistoric pottery in relation to various physical attributes are discussed.</p>
<p>A pedestrian survey, shovel tests and artifact collection from this site, along with its history are discussed.</p>
<p>The increase in fake artifacts such as points, ceramic figurines, thunderbirds, etc. cause a problem for professionals asked to "authenticate" them.</p>
<p>Two fragmentary Folsom points are reported and illustrated.</p>
<p>Four separate rock art panels are discussed in context with other known rock art sites in the Rio Grande Plains, west and central Texas.</p>
<p>Archaeological investigation of battlefields and related sites in the Brownsville, Texas area are documented and discussed.</p>
<p>Archaeological remains at the Palo Alto Inn, north of the Palo Alto Battlefield in Cameron County, Texas are discussed and documented.</p>
<p>This report documents Mexican-American War artifacts unearthed as a result of construction activities in the Brownsville, Texas area. Suggestions for future investigation in the area are indicated.</p>
<p>The destruction of two archaeological sites are discussed along with the measures taken to prevent future destruction.</p>
<p>Comments are given on the experimental manufacture of chert arrow points, in regard to selection of flake blanks and force application.</p>

Biface specimens and flakes are examined, the reduction process discussed and ultraviolet light examination presented.
X-ray fluorescene analysis of obsidian artificats is discussed and reveals that the artifacts came to the Rio Grande area via trade routes from sources in Mexico.
Vertebrate remains relyed upon during Paleo-Indian and Late Prehistoric occupations are detailed and discussed.
A single fluted Clovis point is documented and illustrated.
Methods for the estimation of relative population levels in various archaeological time periods are considered. Then the population dynamics of inland and costal portions of southeast Texas is discussed.
A small rockshelter and recovered artifacts are reported and described, as is the surrounding occupation site.
A naval officer's belt buckle covering is documented and illustrated.
A series of 19th century archaeological are discussed along with the history of those sites during the Mexican-American War.
The histort and findings from this nationally significant Mexican-American War and Civil War depot site are discussed.
The findings of the 1997 archaeological work at the 950 acre Brazos Santiago Depot site are discussed along with its history and recommendations for future work.
The history and archaeological findings at the site of a bridge built during the Mexican-American War and another built during the Civil War on the same site are discussed.
The excavation and artifacts from this terrace occupation site are discussed and discribed.
Petroglyphs at this site are illustrated and tantalizing possibilities of the clutural identities of the artists are made.
A report of a case where the blending of archaeological research with written history and records is filling a time gap in the story of San Antonio life from 1820 to 1840.
Two unidentified arrow forms are described and their distribution compared. Pliminary information on the geographic location of apparent cultural boundaries are indicated.
The uneven distribution of points along the costal margin of Southeast Texas is discussed and reasons for this situation is considered.
Bedrock mortars at a large rockshelter are described and illustrated as are the setting and pictographs

<p>This site was excavated in May 1981 however all known copies of the comprehensive report have been lost. This report attempts to document the site from artifacts, level forms and plan maps of the site.</p>
<p>One engraved pebble from each county is reported and illustrated.</p>
<p>The life of the indians before the Spanish came, their life in the missions and the effects of these influences on the life of the indians who moved into the San Antonio community are discussed.</p>
<p>Guadalupe bifaces are documented and illustrated. Their recovery sites are described.</p>
<p>The characteristics and social aspects of mortuary traditions for 13 sites are considered along with possible relationships with other cemetery sites in southern Texas.</p>
<p>This cairn burial is documented and compared with other cairn burials in the area. Recovered artifacts are illustrated.</p>
<p>A site near the mouth of the Rio Salado is documented and the grave goods illustrated. Comparison to other grave sites is discussed.</p>
<p>The effects of long-term drought-like conditions on plants and soil character are examined and illustrated. The implications are considered.</p>
<p>Petroglyph sites in the lower Pecos River region are illustrated and discussed, including many lesser known sites.</p>
<p>A pendant of kaolinite, not found in Texas, is discussed and illustrated.</p>
<p>Various types of debitage analysis are reviewed and examples given. Awareness of the potential is encouraged.</p>
<p>The career of Jimmy Mitchell is outlined and some of the many archaeological projects on which he worked is discussed. His help in encouraging others is indicated.</p>
<p>Five instances of Caracara points in association with burials on both sides of Falcon Reservoir are documented.</p>
<p>Several problems with the 1999 report on site 41JF50 are discussed and conclusions challenged.</p>
<p>This paper documents various additional artifacts from this site, providing a broader view of long term site utilization.</p>
<p>An initial overview of a four year study at a location in McMullen county. Many points are illustrated.</p>
<p>Qualitative attributes for resharpening these points are described and tabulated.</p>
<p>Jimmy's contribution to STAA and archaeology as an avocational archaeologist is outlined.</p>
<p>A discussion of the efficiency of the American Indian hunters based on a review of historic documents and prehistoric cemetery findings.</p>
<p>This important site has been investigated by various groups from 1959 to 1977. This report provides an initial impression of the results of these investigations and the need for more excavations.</p>
<p>A review of the studies, artifacts and sites that define the Turtle Creek Phase.</p>
<p>A discussion of the dating and distribution of this point type in South Texas.</p>

The history of STAA from 1973 to 1989 is outlined
Paleo and Archaic artifacts from the Johnson Farm collection are documented and illustrated.
Problems with the "gray literature" that is the result of Cultural Resource Management reports required by Joint Task Force Six work done in Dimmit, Webb and Maverick Counties are discussed.
The Author recalls some of his contact with Jimmy and outlines some of Jimmy's contributions to archaeology.
This report provides a discription of the structures and features found as a result of excavation of this mesa top in 1981 and 1984.
Smitty talks about how Jimmy got him to start wriiting archaeological reports. Also includes "Who Was That Masked Man?"
A list or reports and reviews authored by Jimmy from 1973 to 1996
An introduction to Dr. Tim Pettula's study, which follows, and the respect due the mortuary remains of the American Indian.
The focus of this paper is to gain a better understanding of the social interactions, affiliations and beliefs as well as an insight into the rituals associated with rare indian burials in the studv area.
A winged bannerstone, which is rare in southeastern Texas, is documented and illustrated.
A cranium and mandible were recovered from the Zapata Terrace with parallel cut marks. A replicative experment indicate the marks were made with a thin chert flake.
A cache of 18 very large thin bifaces are illustrated and discussed.
The contributions to archaeology in South Texas by Smitty Schmiedlin are recalled.
The 23 lithic and 4 bone tools from 41VT6 are illustrated and described.
The 77 mortars found at 41WN356 are discribed along with other finds at the site. Other Webb county mortar sites compared.
Statistical data are presented on the morphological variation of Andice/Bell points caused by breakage
A discussion of raids in Southern Texas and the history of the account reprinted as # 654
A reprint of the sworn statements by witnesses to the raid of 1878 into South Texas from Coahuila, Mexico
Problems in "typing" Andice/Bell/ Calf Creek points as well as Charcos and Shumla points are discussed.
Three approaches to fire-cracked rock analysis and the results are reported. They are archaeomagnetism, x-ray diffraction and thin-section analysis.
Calf Creek Horizon points form 3 counties ar documented and illustrated. General distribution is discussed as well as lithic resources of the area.

<p>13 dart points of the Calf Creek Horizon from the "Cibolo Creek Sand Pit" are documented. Hafting and binding methods are illustrated.</p>
<p>Analytical and observation criteria for identification of heat-treated chert are discussed</p>
<p>The use of baking soda in different amounts and various lengths of time is discussed. Conclusions and recommendations are made.</p>
<p>An obsidian flake from 41BX5 is described and its source found. Various analysis methods are discussed as well as how this flake may have arrived at this mission.</p>
<p>One Clovis and two Folsom points are documented and illustrated.</p>
<p>The results of an experiment to evaluate whether color changes in burned clay can aid in locating structures that have been burned.</p>
<p>The results of shovel tests at this site, contiguous to a state highway, is documented. TxDOT advised the site extends into their right-of-way.</p>
<p>7 of 14 large bifaces are part of a collection of over 2000 artifacts from this site and are documented and illustrated.</p>
<p>Excavation and laboratory methods on artifacts from this site along Potranco Creek are documented and illustrated. It appears the site was occupied as early as 9000 years ago.</p>
<p>A detailed reevaluation of the projectile point assemblage is documented and conclusions given.</p>
<p>This is a report on the results of the 1997/98 excavations by STAA. The site was used as a wheelwright and blacksmith shop from 1875 to 1938. The results from a limited archival search is also presented.</p>
<p>The early history of STAA is outlined and the accomplishments in field work and education over the past 30 years is highlighted. Suggestions for the future are given.</p>
<p>This article touches upon some of the favorite topics of C.K. such as artifacts from the Olmos Basin, the Rudy Haiduk burial, etc.</p>
<p>A discussion of new analytical approaches in an effort to extract more information from sites with restricted cultural assemblages.</p>
<p>Three biface caches from Frio & Kinney County are documented and illustrated. Speculation on "cache behavior" is advanced.</p>
<p>A documentation and discussion of the preserved architectural layout of some of the 18th-20th century ranchos in Zapata & Starr Co.</p>
<p>A polyhedral blade core that exhibits traits that are typical of Clovis technology is documented and illustrated.</p>
<p>A tubular sandstone pipe is documented and illustrated.</p>
<p>Alexander's knapping technique and tool kit are discussed.</p>
<p>Various caches found in south Texas are discussed along with trade blanks, trade patterns and observations the visit of Cabeza de Vaca in Texas.</p>
<p>10 types of archaeological sites in the Falcon reservoir area are defined and examples are given and described.</p>

<p>The site is described, field methods presented and artifacts illustrated. The occupation periods are characterized and results submitted for consideration.</p>
<p>The results of analysis of ceramics from five late 18th and mid 19th century sites are presented. Neutron activation methods and procedures are detailed.</p>
<p>Curvilinear rock art symbols are defined and meaning suggested.</p>
<p>The skeletal remains of an old adult male found on the shoreline of San Antonio Bay are detailed and the diseases and trauma suffered by this person is discussed.</p>
<p>Reasons for and methods of smoothing are outlined.</p>
<p>Previously unpublished data and illustrations of Golondrina points from Bakers Cave and improvements in the calibration of radiocarbon assays are discussed.</p>
<p>Comments are offered on current approaches to typology, and suggestions are provided for its proper application.</p>
<p>This paper examines the possible uses of these artifacts and describes notch styles and groove patterns. Also raises the possibility of shared shell technology.</p>
<p>This rockshelter and it's rock art is described and illustrated as well as near by bedrock mortars and graffiti.</p>
<p>The results of an investigation of this rockshelter are illustrated and described along with abrading marks on boulders in front of the shelter. Comparison is made to other near by sites.</p>
<p>The history and sites of manganese mining in Val Verde County is explored</p>
<p>This unusual burial is detailed and comparison is made to a similar burial in Starr County</p>
<p>A container made of Polinices duplicatus and sealed with asphaltum is illustrated and it's contents detailed.</p>
<p>11 corner tang bifaces from West Texas are documented and illustrated.</p>
<p>Covers the discovery and location of this prehistoric mortuary site and then draws comparison with other Edwards Escarpment & Blackland prairie prehistoric cemeteries.</p>
<p>A description of the geomorphic setting and stratigraphy of the Coleman Cemetery and comparison with Richard Beene, 41BX831.</p>
<p>Describes how the site was excavated during two distinct phases.</p>
<p>Combined field and laboratory observations of each interment are given with grid location and biological and pathological data.</p>
<p>Offers a summary of the bioarchaeological and pathology information gained as a result of the excavation of the 21 individuals interred in this small cemetery.</p>
<p>A broad outline of the prehistory of Bandera County and a request for more scientific archaeology in this poorly studied area.</p>
<p>A collection of chert can be diagnosed as Clovis, when lacking clovis points, flakes and cores.</p>
<p>Artifacts from this Caddo site are described and illustrated.</p>
<p>The four bifaces described and illustrated.</p>
<p>The artifact is described and the significance of the data collected is discussed.</p>

<p>38 arrow shafts have been studied and detailed descriptive, decorative and technological information is given along with illustrations.</p>
<p>Using historic land survey records, the nature of mid-19th century plant communities in the northeastern Rio Grande plain is detailed.</p>
<p>The life and career of Dr. Campbell are outlined.</p>
<p>The history, lifestyle, range and sources of information on this group of Indians are detailed.</p>
<p>The results of a 30 meter interval land use study of the Camp Bullis area is given. Soils, drainage, hydrology, topography and archaeological sites are discussed.</p>
<p>The results of analysis of this burial are detailed and biological and cultural information regarding early inhabitants of the Texas Coastal Plain are given.</p>
<p>Lesions on a cranial fragment are illustrated and discussed.</p>
<p>Both ornamental and utilitarian artifacts are illustrated and described followed by a discussion of their significance.</p>
<p>A review and history of archaeological sites in Frio county.</p>
<p>The 4 points are illustrated and described.</p>
<p>The points from a bison kill site are illustrated and documented.</p>
<p>This core from 41TV2266 is illustrated and described.</p>
<p>The purpose, definition and function of caches are studied. Four biface caches are detailed.</p>
<p>Artifacts from this site are illustrated. The value of distinguishing Victoria points from the Angostura family is discussed.</p>
<p>The results of the first 3 1/2 years of ongoing excavation at this site are detailed. Prehistoric burials and artifacts are illustrated and described.</p>
<p>The pendant is illustrated, described and compared to other "mirrored style" artifacts</p>
<p>345 majolica shards from 41ZP79 are detailed and illustrated</p>
<p>15 unfinished metal arrow points and pot fragments detailed and illustrated. Historic period Indians at Mier are examined.</p>
<p>The artifacts are illustrated, described and source indicated. The life style of laborers in the 1940s' and '50s' in the lower Rio Grande discussed.</p>
<p>The author continues the work of C.K. Chandler in documenting this group of flaked glass artifacts and discusses glass color</p>
<p>A Cache of nine bifaces found in a burned rock midden are illustrated and discussed</p>
<p>19 aboriginal Caddo pottery sherds are described</p>
<p>Three Clovis points from the indicated counties are illustrated, documented and discussed</p>
<p>The results of excavation and surface collecting are illustrated and described. History of the springs is given.</p>

<p>The hook is described and illustrated, along with several other hooks from other sites.</p>
<p>One vessel is illustrated and it's history given.</p>
<p>This Early Archaic dart point type is defined, illustrated and described. It's known distribution is given.</p>
<p>The site is described, faunal analysis methodology stated, procedures given and results detailed.</p>
<p>El Sauz chert is described, geologic sources are indicated and artifacts made of this chert are illustrated.</p>
<p>This intermittent campsite, used for about 8,000 years, is described and its artifacts are detailed and illustrated.</p>
<p>Stone artifacts found in Hidalgo and Starr counties are described and illustrated. Unusual types of stone transported into the area are described.</p>
<p>The results of this experiment to gauge the difficulty and time required to make shell beads is given.</p>
<p>Two of the newly recognized kinds of core are described and illustrated. The reduction strategy is suggested and the need for contextual affiliation stated.</p>
<p>Thin section analysis is used in an effort to determine the geologic source of a hematite hammerstone. Procedures and results are detailed.</p>
<p>Six ground stone artifacts are described and illustrated. A source for hematite was found and general location provided.</p>
<p>This early archaic type is described, the attributes of a large group is charted and illustrated. Comparison to Calf Creek Horizon points is discussed.</p>
<p>The use of shells by Indians during the time span of A.D. 1100-1700 is discussed. The use and methods of making shell tools and ornaments is detailed. Subsistence on the delta is described.</p>
<p>Excavation methods, culture history and site description of this middle archaic through late prehistoric site are detailed. Artifacts recovered are detailed and illustrated.</p>
<p>An overview of the life of Ellen Sue and her contributions to archaeology.</p>
<p>Current methodology has resulted in the lumping of various dart and arrow point types under a single typological rubric. To correct this, the author introduces the Diablo and Means points which are defined and illustrated. He also describes and illustrates Alazan and Hueco points.</p>
<p>The results of tests and studies of points that were reflaked in the haft are detailed and the relationship to haft size is given.</p>
<p>The results of experiments in hafting points and reflaking while hafted are detailed and illustrated.</p>
<p>The author recounts his archaeological experiences in the 1950's and 60's. Some burials, pottery and point finds are discussed and illustrated.</p>

1 By Record #

The use of whole shell cutting tools in Florida and Texas is discussed. Four examples from the Texas coast are illustrated and construction detailed.

The results of the study of these Goose Creek Plain sherds are stated and conclusions detailed.

Scottsbluff points are infrequent finds in this area. This point is illustrated, detailed and discussed.
