

GEO

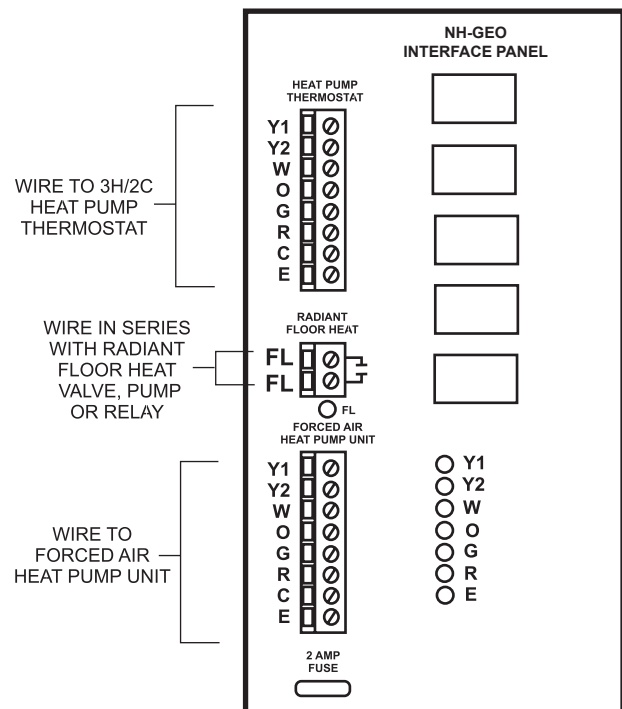

Nature's Home[®] Geothermal Interface Panel

The NH-GEO panel is designed to control a geothermal radiant floor heating system and a forced air geothermal system from a single room thermostat. The Geothermal Panel eliminates the hassle of installing a second thermostat.

Features and Benefits:

- Can be used with any 3H/2C thermostat
- Uses standard 18-gauge thermostat wire
- Saves hours of installation time
- Reduces installation cost
- Simplifies servicing the system
- Provides a clean, professional installation

Warranty: 5 years

Specifications:

Mounting	Aluminum back plate with mounting holes
Dimensions	8" Height x 6" Width x 1.5" Depth
Input Voltage	24 VAC, powered by equipment transformer
