

Emiliana Organic

Alfalfa

The wide diffusion of alfalfa in the world proves its great adaptability to different climates and soils. An example of this is **Emiliana** organic alfalfa which has been bred for high yields of high quality hay and high disease resistance to phytophthora and fusarium wilt along with excellent winter hardiness giving it the capability of long term persistence and productivity that alfalfa producers are looking for today. **Emiliana** organic alfalfa features an excellent leaf to stem ratio for optimal quality and animal gains. **Emiliana's** high fiber digestibility and protein content provides the producer with the excellent yields and quality that they are looking for in an organic variety today.

APPLICATIONS

- Good long term production in pure alfalfa hay situations
- Well suited for alfalfa/grass mixtures to insure optimum quality
- Excellent for hay, haylage or grazing situations

MANAGEMENT

- Planting Rate (Pure stand): 20-25 pounds per acre
- Planting Rate (AL/grass mixture): 15-17 pounds per acre
- Planting Depth: 1/4—1/2 inch

FEATURES

- High Resistance to phytophthora and fusarium wilt
- Good Winter Hardiness
- Good tolerance to aphids and nematodes

BENEFITS

- Allows for optimum long term stands
- Improved persistence in northern climates
- Improved persistence
