Extend your existing video conference investment

We understand that video conferencing should not just be limited to within the enterprise. We provide B2B, B2C & Enterprise hosted solutions for reliable, easy and secure desktop/mobile video conferencing.

Our virtual meeting rooms work with all your existing video conferencing infrastructure and systems. We offer the widest level of interoperability to ensure that SIP, H.323, SVC, Lync, ISDN and Telephone attendees can join your meetings.

Through our one time software download for iPad, iPhone, Android, PC & Mac you can also invite guests who don't have existing video conference solutions.

Full monthly reporting is provided as standard giving you a high level dashboard of your usage as well as detailed meeting reporting and cost centre billing reports.

VCEverywhere
Virtual Meeting Place

- No commitment pay as you go or monthly plans
- Audio, ISDN, Any VC Room, Smart Phone or MS Lync
- HD Video and Content Sharing
- Supports Wi-Fi & Mobile Broadband
- Live booking of over 3,000 VC rooms world wide

Reliable, Easy & Secure Hosted Video Conferencing

Easily join video conferences directly from clicking an email link; access a company directory to invite attendees, including Microsoft Lync, any VC system, ISDN or telephone.

Fully Featured Conferencing

Participate in standards-based video conferences with full two-way video capabilities and see up to 28 participants simultaneously.

View presentations, spreadsheets, documents and images shared in a conference with standards-based H.239 interoperable data collaboration and be fully engaged as if attending on a video conferencing room system. You can even step back in time and view slides previously shown.

Control, moderate and administer meetings. Start or stop recording or streaming, lock a conference or end the meeting. View the participants list and mute noisy users, stop cameras or simply disconnect unwanted participants. Change video layouts including re-arranging participants.

Any device or VC system can join your meeting room from any location over any network

Reduce Your Costs >>>

Extend the life of your existing video conference equipment with our virtual meeting rooms. This flexibility gives you the option to invest only in the technology you need, allowing your customers and partners to communicate with you by video with no additional costs.

Improve Reliability>>>

Cloud-based video conferencing offers high-quality, always available video network without the overhead and complexities of managing it yourself. Built-in network intelligence and firewall traversal helps ensure you'll have a reliable connection, regardless of network limitations.

Scale with us>>>

You can now "buy the drink instead of the bottle" without having to make large investments on video solutions. As your business grows, your hosted video solution can grow with you. So invest in what your SMB needs now and know that you can always increase your video usage later.

Improve Business Relationships>>>

There's no question that meeting face-to-face with people helps establish relationships and build rapport. Video conferencing allows you to meet "in-person" without having to travel. People who haven't previously used video say, "It's so nice to finally meet you," to those they've interacted with only by phone. If you use your virtual meeting room with your remote colleagues all you hear is, "It's great to see you again!"

Number of video participants	Up to 28 continuous presence with voice switching
Reporting	Detailed and Dashboard reports
