

**Help Create Native Habitats for Pollinators  
While Beautifying Your Yard!  
*Become a host for butterflies, birds and bees!***

The SIA Pollinator Committee is hosting a native plant sale to help increase garden habitats throughout town, many lost to development or to increased use of ornamental/invasive landscaping. Pick up on Sat, May 4, Schiavo Library lot, 9-10:30 am. Please order by April 21. Qs? 609 970-0157.

**Why native plants?**

- Native habitats provide food and shelter for birds, turtles, bees, bats, butterflies and other wildlife.
- Habitat loss is the chief cause of species decline; Natives are the bedrock for bringing species back.
- Native plants adapt to local climate-no need for herbicides/pesticides/fertilizer.
- Most are perennials-no need to buy and replant each year.
- Natives host butterfly breeding grounds. (Monarch numbers are down by more than 80%!)
  - Natives provide garden color, soil retention and long bloom seasons. They're natural beauties!

**Proceeds support public SIA Pollinator Gardens.**

Plants are gallon or two gallon sizes unless noted otherwise. Pre-order your plants here:

<i>Plant</i>	<i>Number of pots</i>			
Beach Plum	\$8 One gallon ____ \$18 Two gallon ____	<b>Name:</b> _____  <b>Address:</b> _____ _____  <b>Phone:</b> _____  <b>Email:</b> _____  <b>Checks:</b> <b>SIA, Box 4, STM 08248 or Venmo @strathmere-1951.</b> Mark that \$\$ is for plant sale, please.
