

# Flexform Product Comparison

## flexform crates:

*Ship and store flat. Can stack several pallets high or store in racks.*

*Shipping flat allows to fit more in truck. Great density ratings lowering shipping costs!*

*Customizable sizes*

*Easy to assemble. Ready to use in less than 3 minutes.*

*5 panel construction offers cost savings by using less paper.*

## preformed paperboard crates:

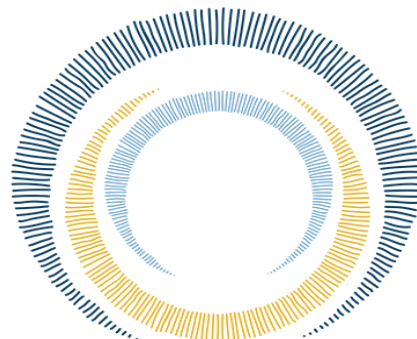

*Bulky. Takes up storage space. Stacking pallets causes safety concerns because of leaning.*

*Freight density ratings make it costly to ship*

*Limited sizes - based on available die chains*

*Difficult to pull apart base and tops for assembly*

*Two piece construction uses additional paper making packaging more expensive.*
