Press Release

WIRELESS ACQUISITION LLC ANNOUNCES NEW PRODUCT

Versatile Digital Broadcast Processor Now Available

MESA, AZ, May 11, 2015: Wireless Acquisition LLC is pleased to announce a new addition to its EMCEE Broadcast Products line of Integrated Broadcast Systems. The SAK1000 currently being assembled at the new Mesa, AZ facility is a versatile digital broadcast processor. Jim Yard, CEO of Wireless Acquisition LLC calls this new product a “real game changer”. He says; “broadcasters with a tight budget now have an interface that will allow them to keep up with new technologies in real time with the major market broadcasters”.

The SAK1000 stands alone in the US Broadcast equipment industry as a versatile digital broadcast transport stream processor. It is adaptable to almost any application and situation occurring in a broadcast system transport stream application. Built under the EMCEE name, the engineers at Wireless Acquisition LLC have designed this processor to be the silent partner that allows broadcasters to take virtually any transport stream input signal and convert it to an output signal that is fully integrated into the station’s existing infrastructure. This means that as source feeds change, are updated, or as new, not yet imagined, transport schemes are introduced, the broadcaster can quickly adapt without needing to replace expensive equipment. The box utilizes a selection of over forty different I/O plug-in modules to provide a quick solution to almost any transport stream Input/Output application. Examples include: demodulation, transcoding, multiplexing, encoding, RF modulation, decoding, etc., for both SD and HD enabled networks. This versatile interface can be structured with multiple input ports, can feed multiple outputs, and is self-redundant. It is truly a 21st century tool that allows 20th century systems to keep up with technology without busting their budgets.

For more information on this exciting new product call us at 844-276-8373 or email us at info@emceecom.com.

About EMCEE, a Subsidiary of Wireless Acquisition LLC

Founded in 1960, EMCEE quickly established a reputation as a premier provider of television transmitter and translator systems. More than 10,000 EMCEE transmitter systems are in use in more than 100 countries and EMCEE is well known for many technological “firsts”. With modern manufacturing and support facilities in Pennsylvania and Arizona, EMCEE offers RF transmission equipment and system
