# VALANCES

## STANDARD VALANCE & RETURN CONFIGURATIONS (OUTSIDE MOUNTS)

### Standard Decorative - 3" Profile

- Standard on Smooth finish and Enhanced Grain blinds
- Not available on Coastal blinds

### Crescent Valance - 3" Profile (optional)

- Optional for Smooth finish blinds only
- Not available on Enhanced Grain or Coastal blinds

### Soho Valance - 3" Profile (optional)

- Standard on Coastal blinds
- Optional for Smooth finish blinds only
- Not available on Enhanced Grain blinds

### Forte Valance - 4" Profile (upgrade)

- Optional for Smooth finish blinds only
- Not available on Enhanced Grain or Coastal blinds

NOTE: Outside mount returns are adjusted longer by the factory when short or long extension brackets or when small or large (3/8" or 3/4") spacer blocks are ordered. Only the 1st set of ordered spacer blocks will affect the return length adjustment. Please specify longer custom return lengths when ordering if necessary.

### Slat Size/Style

3"

Note: Inside mount blind valances do not come with returns unless specified on the order.

## KEYSTONE VALANCE OPTION

Keystones are designed to cover splices in oversized valances or can be used as a decorative element to add dimensional appeal.

Valances under 102" – a keystone may be added to a valance for a small surcharge. The valance will come fully assembled with the keystone positioned in the center. The color of the keystone will match the valance.

Valances over 102" that are spliced - a keystone will automatically be provided at no charge to join the sides and cover the splice. Will require assembly.

Note: the addition of a keystone will not affect the overall width of the valance.

## VALANCE / RETURN SPECIFICATIONS

- **Custom valance widths** are available upon request. Maximum widths for valance are as follows:  
The maximum Continuous Valance width is **102"**.  
The maximum Spliced Valance width is **120"**. (See note below).
- **Custom return lengths** are available upon request:  
The minimum return length is **1 1/2"**  
The maximum return length is **6"**
- **3" Return lengths** are factory adjusted when extension brackets or (1 set of) spacer blocks are ordered.  
Returns + Short Extension Brackets = **4-1/4"**  
Returns + Long Extension Brackets = **6-1/4"**  
Returns + Small Spacer Blocks = **3-3/8"**  
Returns + Large Spacer Blocks = **3-3/4"**

**NOTE:** Valances over 102" will be spliced in the middle. A decorative keystone will be supplied at no charge to join the sides and conceal the splice.

### CUSTOM VALANCE & RETURNS – MEASURED & CUT FROM THE INSIDE:

- **NOTE:** Valances are cut to measure from the inside miter to insure the most accurate fit when installed over the headrail or window frame.

# SOLID AND DECORATIVE TAPES

## TAPES

## TAPE SPECIFICATIONS

Select the tape width, color and design which will complement your 1-3/8", 2" or 2-3/8" wood blind.

- Made from a poly/cotton blend
- Resists fading or shrinking
- *Lifetime Guarantee*
- Decorative tapes are attached to solid colored tape ladders that are slightly narrower than the width of the decorative tape (see chart below). The ladder is pre-selected based upon this width and for color coordination. A high tech gluing process is used to adhere the decorative tape. This process is superior to the commonly used sewing application which is visible and tends to pucker. **The decorative tape is only applied to the ladder on the front of the blind. The back of the blind will have a solid color tape visible (see chart below).**

FOOTNOTES					
1	RemoteTilt motorization system requires a hand-held REMOTE CONTROL unit. <b>The quantity of remote control units must be specified when ordering. RemoteTilt requires both a remote and a power source. Please specify when ordering.</b>				
2	The <b>LightsOut</b> configuration may cause slight "puckering" of the <b>lift cords</b> on the front of the blind when the slats are tilted backwards (reverse tilt) due to the use of interlacing cords on the front (the back uses looped ladders). A gentle tug down on the lift cord The slats on LightsOut routeless blinds feature notches at the rear of the slat instead of route holes. Regardless of blind size, there will be two notches, each approx 6" in from the end of the slat.				
3	There will be a 1/2" maximum light gap between multiple blinds on 1 headrail. 2 or 3 on 1 headrail not available with the Cordless Lift or RemoteTilt upgrades.				
4	Wood tone blinds will include Antique Brass Tape Clamps and White/Neutral tone blinds will include White Tape Clamps on the bottomrail.				
5	On outside mount valances, the 1st set of ordered spacer blocks will automatically lengthen the default 3" valance return length by the depth of the spacer, either 3/8" or 3/4".

### BREAK-AWAY STOP BALL

- Stop balls are standard for ALL lift cords.

The stop ball separates under pressure. It easily snaps together again.

### BOTTOMRAIL

- Trapezoid** bottomrails are standard on wood blinds

The "trapezoid" bottomrail provides a contoured, modern look along with improved blind operation (slat tilting & rotating). It also accommodates a smaller flat 1" tape clamp when solid or decorative tapes are ordered.

NOTE: Wood tone blinds will include Antique Brass Tape Clamps and White/Neutral tone blinds will include White Tape Clamps on the bottomrail.

## REMOTETILT™ MOTORIZATION: OVERVIEW

---

With RemoteTilt motorized blinds, a better quality of life and have more time to enjoy life's daily pleasures. At the touch of a button, window coverings can be instantly adjusted to changing activities or the varying sun conditions.

An ideal solution is to manage glare with a RemoteTilt hand-held remote control. At the simple touch of a button, blinds will tilt open or closed to adjust to the changing sunlight in a room.

RemoteTilt motorized blinds provide ultra-quiet operation. This RF system can operate blinds from virtually anywhere in the house without direct line of sight. Similar to how a garage door opener operates, radio signals travel through walls and make it possible to control multiple coverings throughout the home alone or as a group. It is also available in a 5-channel version. The multi-channel RF system allows for independent control of individual blinds and/or group control.

---

The RemoteTilt motorization system provide many benefits, such as improving energy efficiency, providing easily controllable privacy and also enhancing home security.

---

The RemoteTilt RF timer allows users to program specific times of the day to automatically adjust blinds in different areas of the house, protecting interiors from the fading effects of direct sunlight. This feature provides added security to an unoccupied home by creating a lived in look even while homeowners are away on vacation.

The battery powered RemoteTilt RF wireless wall switch allows blinds to be controlled when entering or exiting a room, just like the lights. The switch may be seamlessly installed without wiring next to any light switch or stand alone, and is never misplaced. This one touch privacy helps create the ideal environment whether preparing for a bath, relaxing in bed or enjoying time with the family at home.

Alta RemoteTilt motorized blinds are powered by Somfy, an industry leader in automated window coverings. All motorized products are backed by a 5 year warranty.
