A QUALITY OF POINT OF VIEW

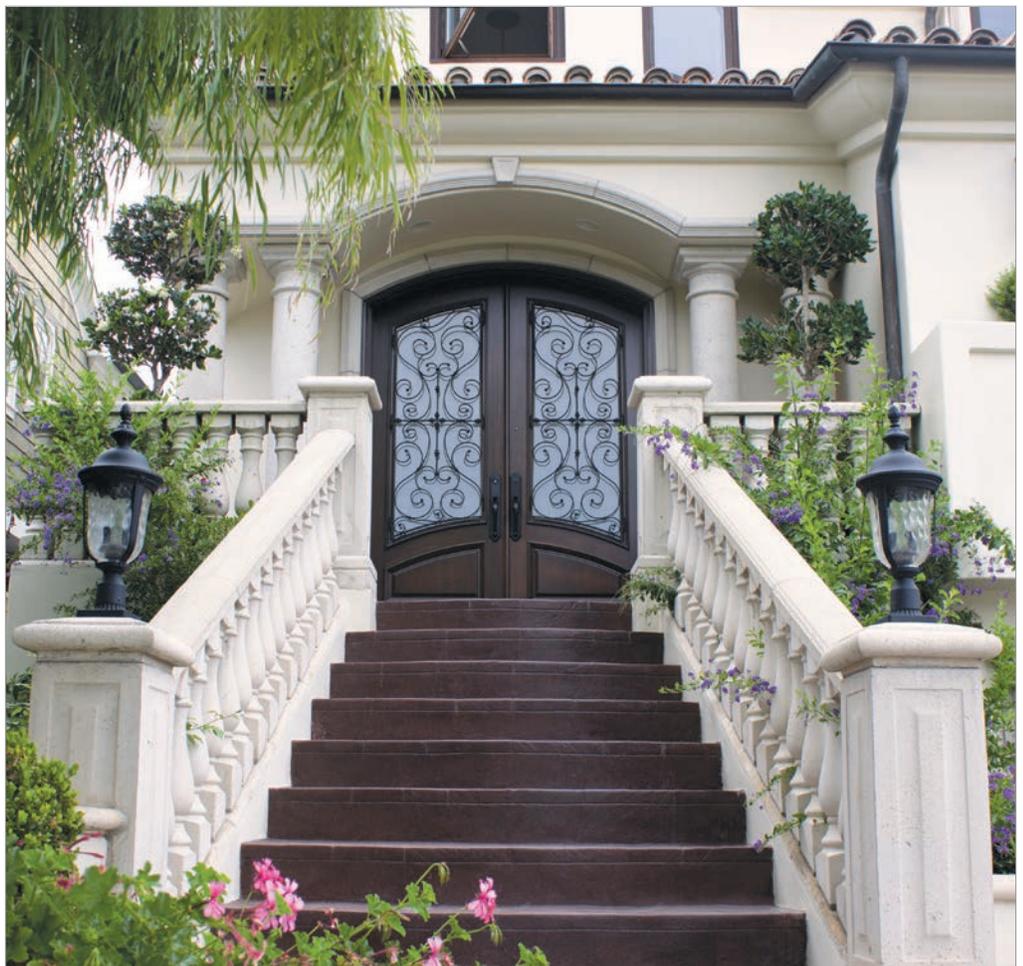

CREATE BEAUTY

Be inspired | Enjoy the view | Let in the light

Enjoy the View

Your home is an expression of your personal style. The doors you pass through each day should be an extension of that style. If indoor/outdoor living is your desire, AG Millworks will help you achieve a quality point of view. Express yourself architecturally with countless configurations of door systems that fold, slide, lift and slide, pocket, swing or pivot. Fine craftsmanship combined with advanced technology ensures a perfect fit and finish when your project is complete.

AG Millworks
SINCE 1986

Beautiful Bi-folds

AG Millworks' beautiful bi-folds dramatically expand your living space, opening entire walls to the outdoors as they fold completely out of the way.

1 | Zero –corner bi-fold units provide wide open panoramic views with no supporting post at the corner.

2| Retractable screens keep bugs out and let cool breezes in, increasing energy efficiency and air circulation. Retractable screens are fully installed on the frame at the AG Millworks factory saving you installation time—and money.

3| Bi-fold windows open fully for easy outdoor entertaining.

4| Bi-fold door systems with an odd number of doors feature a convenient “daily door” that swings open easily without needing to fold all of the doors out of the way.

Spectacular Sliders

Sliding patio doors are another great option and space saving solution. Unlike swinging doors, sliding doors stack behind each other on one side of an opening or into a pocket concealed in the wall. The look is clean and there are no doors extending into your room or onto your patio taking up living space.

Amazing Openings

Our Lift & Slide doors feature European engineering that enables you to slide even the most massive doors with incredible ease, opening entire walls with the turn of a handle. As you rotate the lever, a concealed full length gear system activates the wheels and elevates the sliding door panel. The door can be smoothly rolled from side to side. When you want to lock it, simply roll it back to the closed position, rotate the lever and feel the wheels smoothly retract as the door settles easily down onto the track.

The multi-point lock engages with authority. Our optional nesting lift and slide handle set rests flush with the face of the door and folds neatly away to allow the doors to pocket without needing a removable handle.

Multi-Slides glide past each other like lift and slide doors, but do not require the rotation of a handle to operate. The wheels are always engaged, ready to roll and are a practical solution for openings that are not quite as large. Just like lift and slide doors, you can pocket them and open up a wall, or stack them in front of each other off to one side of an opening.

Fabulous French Doors

The most traditional of patio door options, the French swinging patio door brings timeless elegance to any room, adding beauty and individuality to your home. The classic in-swing French door is a stately architectural element.

Extraordinary Entries

You only get one shot at making a first impression and AG Millworks custom entry doors take center stage to make the front of your home stand out from the crowd. We select only the highest grades of hardwood and carefully choose components to ensure cohesive color, texture and grain. Factory pre-hanging and pre-finishing make installation quick, cost effective and hassle-free.

Make a bold and functional statement with a matching transom that lets in light or operable sidelites that let in fresh air. From traditional to mid-century modern, rustic to contemporary, choose the custom entry system that expresses your personal style.

Express Yourself...

At AG Millworks, we take your architectural vision and turn it into reality. From stunning patio doors to custom entry systems and more, we will build everything for you with matching sidelites and details in wood clad or all wood, with a huge array of wood species to choose from.

Wood Species

Our doors are available in 18 different wood species including:

- Walnut
- Paint-grade Pine
- Clear Alder
- Knotty Alder
- Clear Cedar
- Knotty Cedar
- Cherry
- Sipo Mahogany
- Genuine Mahogany
- African Mahogany
- North American Red or White Oak
- Quarter Sawn White Oak
- Rift Sawn White Oak

Clad Colors

When exposure to sun and rain is an issue, opt for Aluminum Clad/Wood Patio Doors. We combine a sleek, tough, low maintenance exterior of 1/16" thick extruded aluminum with a rich, warm all wood interior to give you the best of both worlds.
