

## Cold Hardy Vegetable Seedlings and Greens Plant List 2017

All of the plants on this list like to grow in cooler conditions - they are hardy and can be planted at the end of April with no issues.

Most of these vegetable seedlings are sold in 3.5 / 4 inch square pots for \$4.50 each.

Most pots contain 2 or more seedlings - hardened off and timed perfectly for planting in this area.

**Note on Hybrids** - Hybrids are not GMO. They are the result of carefully planned natural plant breedings which result in offspring that are often stronger or more resistant to certain issues. We choose hybrids (vs. heirlooms) appropriately; often we offer hybrid alternatives to address specific, local, climate-related gardening issues, so your garden is as productive as possible.

name/variety	perennial/ annual/tender perennial	special category	DESCRIPTION
Agretti	annual but can self-seed	cold hardy	very unusual and rare Italian Green - the plants look like miniture palm trees but have a texture and taste like saltwort or samphire. Very cool.
Arugula - regular	annual but can self-seed	cold hardy	traditional quick growing
Arugula - Sylvetta	annual but can self-seed	cold hardy	a more lace-like leaf shape - tends to self seed very readily
Arugula - smooth 'selvatica sel. Liscia'	annual but can self-seed	cold hardy	a hot flavored smooth and very wild looking arugula
Arugula - wasabi	annual but can self-seed	cold hardy	a wasabi flavored arugula
Arugula - dragon's tongue	annual but can self-seed	cold hardy	a red veined arugula with hot flavor
Asian Greens - Extra Dwarf Pak Choy "Petite Star"	annual	cold hardy / heat sensitive	White Ribs and dark green leaves. Plant in cool weather keep well watered and moist. They appreciate some afternoon shade in hot weather. Or I plant in large pots that are submerged 2 inches in a tub of water.
Asian Greens - Fun Jen	annual	cold hardy / heat sensitive	NEW - This is a very popular frilly leaf pak choi or "Bok Choy" in Taiwan. The plant is semi-spreading and weighs about 1/2 pound at maturity. The leaves are green, frilly and wrinkled with smooth white petioles. The leaves are very tender and crisp and can be prepared in stir-fry or added to soup
Asian Greens - Mibuna	annual	cold hardy / heat sensitive	Like a Tatsoi in flavor and coloring but with lots of tall and long leaves. Plant in cool weather keep well watered and moist. They appreciate some afternoon shade in hot weather. Or I plant in large pots that are submerged 2 inches in a tub of water.

Asian Greens - Mizuna	annual	cold hardy / heat sensitive	A spicy flavor
Asian Greens - Pak choi, (Bok Choy) white stem - Joi Choi	annual	cold hardy / heat sensitive	White Ribs and dark green leaves. Plant in cool weather keep well watered and moist. They appreciate some afternoon shade in hot weather. Or I plant in large pots that are submerged 2 inches in a tub of water.
Asian Greens - Pak choi, (Bok Choy) white stem - Li Ren	annual	cold hardy / heat sensitive	White Ribs and dark green leaves. Plant in cool weather keep well watered and moist. They appreciate some afternoon shade in hot weather. Or I plant in large pots that are submerged 2 inches in a tub of water.
Asian Greens - Pak choi, (Bok Choy) green stem Black Summer	annual	cold hardy / heat sensitive	Light Green Ribs and medium green leaves. Plant in cool weather keep well watered and moist. They appreciate some afternoon shade in hot weather. Or I plant in large pots that are submerged 2 inches in a tub of water.
Asian Greens - Pak choi, (Bok Choy) green stem Mei Qing	annual	cold hardy / heat sensitive	Light Green Ribs and medium green leaves. Plant in cool weather keep well watered and moist. They appreciate some afternoon shade in hot weather. Or I plant in large pots that are submerged 2 inches in a tub of water.
Asian Greens - Pak choi, (Bok Choy) green stem Purple Choi	annual	cold hardy / heat sensitive	Light Green Ribs and medium green leaves. Plant in cool weather keep well watered and moist. They appreciate some afternoon shade in hot weather. Or I plant in large pots that are submerged 2 inches in a tub of water.
Asian Greens - Pak choi, (Bok Choy) green stem narrow shape - Natsu Rakuten Summer Fest	annual	cold hardy / heat sensitive	Light Green Ribs and medium green leaves. Plant in cool weather keep well watered and moist. They appreciate some afternoon shade in hot weather. Or I plant in large pots that are submerged 2 inches in a tub of water.
Asian Greens - Tatsoi - Yukina Savoy	annual	cold hardy / heat sensitive	Yukina Savoy looks like a larger and savoyed version of Tatsoi. The thick, dark green, shiny, spoon-shaped leaves grow upright on pale green petioles. This vigorous and easy to grow plant is heat and cold resistant and can be grown year round. It has a mild flavor when harvested young.
Asian Greens - Tatsoi	annual	cold hardy / heat sensitive	Very flat and round florets of round dark green leaves. Plant in cool weather keep well watered and moist. They appreciate some afternoon shade in hot weather. Or I plant in large pots that are submerged 2 inches in a tub of water.
Beets - are best grown direct seeded into the garden			We don't sell beet seedlings in pots as they do best if direct seeded or sown directly into the ground as seeds rather than transplanted.
Broccoli Raab, Cima di Rapa Quarantina	annual	cold hardy / heat sensitive	Very quick - I sometimes have these in pots for sale as seedlings but they grow so fast that they are truly best to grow from direct seeding.
Broccoli, Blue Wind F1	annual / biennial for seed production		A hybrid broccoli that is quite dependable even in this area's fluctuating springs

Broccoli, Green Magic F1	annual / biennial for seed production		New this year - Another quality hybrid that has promise for performing well here in spring
Broccoli, Gypsy F1	annual / biennial for seed production		Another quality hybrid that usually does well here in spring
Broccoli, Di Cicco (Heirloom)	annual / biennial for seed production		A rich-tasting old Italian heirloom. Compact 2-3' light-green plants. 3-4" bluish-green central head, then lots of medium-sized side shoots. Matures over a long period-best for home gardens. Usually does better if sown in late summer for fall harvest
Broccoli, Calabrese (Heirloom)	annual / biennial for seed production		A unique type. Large compact cauliflower-type plant bears beautiful spiraling apple-green heads up to 6". Extremely soft texture and magnificent flavor.
Broccoli, Solstice (open pollinated)	annual / biennial for seed production	NEW 2017	A great open-pollinated heat-resistant broccoli
Broccoli, Piricicaba (open-pollinated)	annual / biennial for seed production	Second Spring Sale	best for fall into winter planting; a sprouting broccoli that does particularly great in a cold greenhouse in winter.
Broccoli, Chinese - Green Lance	annual / biennial for seed production		Chinese kale is also known as kailaan or Chinese broccoli. A popular, vigorous hybrid, Green Lance has white flowers, green leaves and stalks. These are all delicious. Looks like a small, slender version of broccoli. Its ability to thrive in many different micro climates makes it a good choice for home gardeners.
Broccoli, Chinese - Ryokuho	annual / biennial for seed production		Chinese kale is also known as kailaan or Chinese broccoli. This excellent early maturing hybrid has vigorous growth, high yields and disease resistance. The uniform, upright plants are about 16" tall with thick tender stems with long internodes. The smooth dark green leaves have very short petioles with less wax. Thick stems, strong heat tolerance and moderate bolting resistance make this variety very desirable. Also known as Green Jade variety.
Brussels Sprouts (traditional green)"Dagon"	annual	New 2017	Tall plants are very attractive for selling "on-the-stalk" sprouts. Dagan's sprouts are medium-large, smooth, and attractive. Holds very well in the field for a midseason variety.
Cabbage, Chinese, Tokyo Bekana	annual	cold hardy / heat sensitive	Tokyo Bekana is a loose-head Chinese cabbage from Japan. The spring-green leaves curl at the edges and mature with slim white stems that widen at the base
Cabbage, Chinese, Kaisin Hakusai	annual	cold hardy / heat sensitive	A fluffy topped Chinese Cabbage

Cabbage, Chinese, Osaka Shirona	annual	cold hardy / heat sensitive	NEW - Osaka Shirona is loose-head variety of Chinese cabbage. These Japanese greens grow mild-tasting medium-sized bright green leaves atop wide and firm white petioles or stocks. Like Shirona, Osaka Shirona is a fast-growing variety that is tolerant to both cold and heat. Avoid planting in the middle of a hot summer. Packed with vitamin A, these leafy cabbages are most often enjoyed fresh in a stir-fry. Traditionally, leaves were dried or pickled to provide nutritious greens during winter months.
Cabbage, Chinese, Maruba Santoh	annual	cold hardy / heat sensitive	This mild flavored green is fast and easy to grow. It is heat tolerant and suitable for year round growing. This loose head type Chinese cabbage has tender, smooth, round light green leaves and white petioles that can be harvested at any stage.
Cabbage, Chinese, Kogane	annual	cold hardy / heat sensitive	NEW - Kogane means gold in Japanese. When mature, the loose head, fluffy head type, can weigh up to 8 lbs and has a yellow core surrounded by crumpled green outer leaves. It has good flavor and is popular for pickling and cooking.
Cabbage, Storage 'Copenhagen Market' (green)	annual	cold hardy / heat sensitive	A long season heirloom cabbage that gets a large head and stores all winter long
Cabbage, Storage F1 (green)	annual	cold hardy / heat sensitive	A long season cabbage that gets a large head and stores all winter long
Cabbage, Caraflex pointy green cabbage	annual	cold hardy / heat sensitive	Small heads, but fast growing with pointy tops.
Cabbage, Murdoc pointy green cabbage	annual	cold hardy / heat sensitive	Small heads, but fast growing with pointy tops.
Cabbage, Cour di Bui - Heirloom pointy green cabbage	annual	cold hardy / heat sensitive	Small heads, but fast growing with pointy tops.
Cabbage, Kalibos (green and white savoy)	annual	cold hardy / heat sensitive	A savoy with white variegation
Cabbage, Red Express Salad Delight	annual	cold hardy / heat sensitive	A wonderful quick growing medium sized red cabbage.
Cabbage, San Michele (red and green savoy)	annual	cold hardy / heat sensitive	This is a savoy in dark green with pink
Cabbage, Testa di Ferro Green Savoy	annual	cold hardy / heat sensitive	Classic savoy

Cabbage, Portuguese (white varigated)	annual	cold hardy / heat sensitive	Large, loosely styled cabbage - usually used for wrapping rather than grating. Green leaves with white varigation
Cabbage, Tendersweet	annual	cold hardy / heat sensitive	Tendersweet is one of my favorite cabbge varieties - it grows quickly to a medium sized slightly squatty head. Super tender and wonderful flavor.
Carrots - are best grown direct seeded into the garden			We don't sell carrot seedlings as they do best if direct seeded or sown directly into the ground as seeds rather than transplanted.
Cauliflower, Fremont F1	annual	cold hardy / heat sensitive	A dependable and solid cauliflower for spring planting in this area
Cauliflower, Skywalker F1	annual	New 2017	A dependable and solid cauliflower for spring planting in this area
Cauliflower, Cheddar	annual	NEW 2017	A bright orange colored cauliflower
Cauliflower, Snow Crown F1	annual	cold hardy / heat sensitive	A dependable and solid cauliflower for spring planting in this area
Cauliflower, Purple "di Sicilia violetto"	annual	cold hardy / heat sensitive	This Italian cauliflower makes lovely pruple heads. They tend to be smallish compared to the white hybrids, but they are fun and tasty. Will side shoot.
Cauliflower, Di Jesi	annual	cold hardy / heat sensitive	A nice heirloom Italian cauliflower. Yellow-white heads, good flavor.
Cauliflower, Vita Verde (Bright green heads)	annual	cold hardy / heat sensitive	NEW - A fun and beautiful green cauliflower - VitaVerde is a dependable producer even in fluctuating temps.
Cauliflower, Italian green 'Verde di Macerata"	annual	cold hardy / heat sensitive	Another gorgeous and delicious green cauliflower
Celeriac - Tellus	annual	requires moisture	This type of celery is grown for its root - 3 to 5" across, round, white, with a mild nutty flavor. Try it in potato salad, hot dishes, soup or shred for salads. Needs long steady growth with even temperatures and moisture as well as high fertility. Roots can be stored like carrots
Celery, Chinese Green Kintsai	annual	requires moisture	Like other varieties of Chinese celery, Light Green variety delivers the strong celery flavor and aroma found in many Asian stirfries and soups. These smaller, moisture-loving plants add a distinctive texture and lighter green color to the garden. They prefer the cooler temperatures of spring and fall.

Celery, Chinese - Dark Kintsai	annual	requires moisture	This Chinese celery grows small dark green leaves with green petioles. It is very aromatic, even seedlings have a nice celery flavor. This makes it an excellent micro-green. As the plant matures the celery flavor and scent intensifies.
Celery, Chinese, White Queen	annual	requires moisture	This very special Chinese celery has a flavor and aroma that is stronger than Western celery. The long white stems are considerably smaller than those of Western celery, and the jagged green leaves, more delicate. This easy to grow variety prefers cool temperatures. A must for many Chinese dishes, this celery makes a delicious addition to stews, soups or stir-fries. Include both the stalks and leaves.
Celery, John Jeavons Special Strain	annual	requires moisture	Pre-Sale availability.. From John Jeavons's research garden, developed from the Ventura variety. Tall Utah type with upright glossy bright-green stalks over a foot long. Well-developed hearts on high-yielding plants. Good disease resistance and slow to bolt.
Celery, Amsterdam	annual	requires moisture	A wonderful and productive (almost self-blanching) celery
Celery, Sedano di Monte - Wild Celery (The Italian Lovage)	perennial		This is Lovage - a pungant but wonderful member of the celery family. Every garden must have one.
Chervil	annual	herb	
Chicory, Catalogna Puntarelle di galatina	annual	"Second Spring" Sale	Can come back the second year, best grown in late summer for fall/early winter harvest.
Chicory, Italiko Rosso (Red-Ribbed Dandelion)	annual		This is the "dandelion greens" that are sold in stores. This one has a bright reddish -purple stem and rib. Not related to dandelions although they look similar and taste similar as well.
Chicory, Grumolo - Rosso Verona Tardiva	annual	NEW 2017	Grumolos are hard to find in the US - they look similar to mache, but have a richer flavor with bitter overtones. This one is a dark red rosette.
Chicory, Grumolo - Verde	annual	NEW 2017	Bright green rosette
Chicory, Grumolo - Sugar Loaf Borca	annual		One of the sweetest and most tender of the grumolos. Can come back the second year, best grown in late summer for fall/early winter harvest.
Chicory, Root Chicory - Cichoria di Chiavari	annual	NEW 2017	chicory grown for its roots

Chicory - Zuccherina di trieste	annual	NEW 2017	
Chicory - Barba di Cappuccino "Monk's Beard"	annual	NEW 2017	
Chicory Catalogna Frastagliata	annual	NEW 2017	Almost a cross between a dandelion-chicory and escarole
Chicory, White-Ribbed Dandelion style- Clio F1	annual		This is the "dandelion greens" that are sold in stores. Not related to dandelions although they look similar and taste similar as well.
Cilantro/Coriander	annual	cold hardy	traditional cilantro
Cilantro/Coriander - Delfino	annual	cold hardy	fine leaf cilantro - same flavor but a pretty ferny version
Cilantro/Coriander - Rak Tamachat	annual	cold hardy	traditional cilantro - thai in origin - giant leaves
Collard Greens, Vates (heirloom)	annual	cold hardy	
Cress, French Garden (Cresson alénois)	annual	salad green	
Cress, Persian Garden	annual	salad green	
Cress, Water	annual		
Cress, Wrinkled Crinkled	annual	salad green	
Dandelion - see herb list for wild official dandelion - see chicories for dandelion-style chicory leaves			
Dill, "Ella"	annual	herb	traditional dill - slow to bolt

Dill, "Bouquet"	annual	herb	traditional dill - slow to bolt
Endive, Belgium	annual	salad green or saute	
Endive, Capellina	annual	salad green or saute	A wonderful frissee; each of the varieties we offer have different frizzle-levels!
Endive, frisee de meaux	annual	salad green or saute	A wonderful frissee; each of the varieties we offer have different frizzle-levels!
Endive, Dubuisson	annual	salad green or saute	A wonderful frissee; each of the varieties we offer have different frizzle-levels! Leaves are less broad and more frilly. Very uniform. Technically a Wallone type.
Endive, Rhodos	annual	salad green or saute	A wonderful frissee; each of the varieties we offer have different frizzle-levels! A small endive technically of the French Tres Fine Maraichere type, often referred to as frisee in the salad mix trade. Smooth, but deeply cut, toothed pale green leaves. Forms a mass of tender blanched leaves at the heart for salad mix.
Endive, Bianca Riccia	annual		A wonderful frissee; each of the varieties we offer have different frizzle-levels! The blonde leaves are extra-cut and fringed, a unique color with pinkish petioles. Relatively tolerant to heat and cold for growing year-round.
Endive, Riccia Pancalieri	annual		Very large full head. Nice frilly leaves. Larger and later than Cuor d'Oro. Bright green with large ribs and golden heart. Fall or spring, but best color and taste in fall. If desired, blanch heart by covering with pail or bucket or by tying up with string ten days before harvest. Cook as a side dish, use in soups or salads.
Escarole, Cornetto Bordeaux (Upright escarole)	annual		I love this Escarole - it stays nice a clean. Flavor is the same as the flatter headed version
Escarole, Eros	annual		The classic and traditional escarole!
Escarole, Bionda a Cuore Pieno	annual	New 2017	Heirloom classic and traditional escarole!
Escarole, Schiana	annual		The classic and traditional escarole!
Fennel, Herb for pollen/seeds	annual		Leafy Fronds are delicious added to salads.

Fennel, "Preludio" Bulbing	annual		A hybrid from Johnny's Seeds - a super fennel - great bulbs - long lasting and very slow to bolt. Fabulous.
Good King Henry - Chenopodium bonus- henricus	perennial		This rare plant, also known as Mercury or Lincolnshire Spinach, has fleshy long-stalked, arrow-shaped leaves. The roots some like better than Asparagus. Delicious flower clusters. Will grow anywhere, but responds best to good cultivation. A hardy perennial that vigorously self-seeds itself. Potherb cooked and eaten much like spinach, also used in salads. Rich in vitamins A & C, calcium. Very ify germinator - LIMITED QUANTITIES AVAIALBLE.
Grumolos - see Chicories			
Herba Stella or Erba Stella (Buck Horn Plantain, Plantago, or Minutina) Plantago coronopus	annual	salad green	A cultivated species related to the common edible garden weed. However it has a tender crispness and is wonderfully flavored. No fibers. Some would describe it as succulent with a slightly nut-like flavor. A traditional hardy winter green throughout Europe it is still very popular in Italy. Hardy. Plants are perennial though quality is best with younger succession sown plants. It re-grows well after cutting and the young flower buds are also tasty.
Ice Plant	annual	salad green	An organic farmer in France sent me these seeds telling me that I have never tasted a plant like this. They are wonderful, succulent salad greens, covered in bead-like "crystals." Salty flavor. Fun!
Kale, Cavolo Nero Lacinato or Nero di Toscano Kale (Dinosaur Kale)	annual / biennial for seed production	cold hardy	This is a very popular kale with narrow very bumpy leaves in a dark almost black color. Tasty and wonderful. Kale always tastes best in cool weather.
Kale, Lacinato - Galega	annual / biennial for seed production	cold hardy	The Italian Heirloom kale, known as Galega is one of my favorites for flavor and production. (btw, "Lacinato" is the Italian word for "Kale" it is not a specific type)
Kale, Starbor	annual / biennial for seed production	cold hardy	Super-Crinkled and Curly leaves
Kale, Red Russian	annual / biennial for seed production	cold hardy	The traditional kale with pointy oak-leaf like shape and pinkish red ribs
Kale, Spigarielle Liscia (sometimes categorized as a broccoli raab)	annual / biennial for seed production	cold hardy	I love this kale - it is j=kind of a mix between raab and kale. Very prolific grower and I love the flavor.
Kale, White Russian	annual / biennial for seed production	NEW 2017	Like the classic red russian, but with pale white/green stems/veins.

Kale, Siber Frill	annual / biennial for seed production	NEW 2017	I am still looking for a curly leafed kale that is tender and with the flavor of the lacinatos... these seeds are from Bountiful Gardens - open pollinated heirloom - that I am excited to try this year...
Kale, Gulag Stars	annual / biennial for seed production	cold hardy	Incredible diversity unlike anything else. A mix of napus kales that have been crossed with B. rapa. Napus leaf types vary through the color spectrum from brilliant red to green to white Russian types; from super frilly to broad-leafed shapes; and skinny, short stems to broad, thick stems; and multiple combinations thereof. Occasional rapa leaf types vary from turnip-leaf to something that looks like a cross between pak choi and napa cabbage, though we have been selecting away from these rapa variations.
Kale, Nash's Green	annual / biennial for seed production	NEW 2017	Nash's Green kale is an on-farm selection from grower Nash Huber of Nash's Organic Produce in Sequim, WA. Tall plants have shown exceptional tolerance to cold, making this a great variety for overwintering.
Kale, Blue-Curled Scotch (Starbor style)	annual / biennial for seed production	cold hardy	Super-Crinkled and Curly leaves
Kohlrabi, Azur Star	annual	cold hardy	One of the best performing, open-pollinated, purple kohlrabies. Attractive, slow-bolting, flat-round, purple-skinned bulbs. Crisp white flesh.
Kohlrabi, Korist White	annual	cold hardy	
Leek, Blue Solaise	annual	self-seeds	Beautiful 19th century French heirloom, blue-green leaves that turn violet in the cold. Medium-sized, and the fastest maturity of all the overwintering types, with excellent flavor. Very cold-hardy, very productive. Plant in spring for use the next winter long slow growth is what makes leeks very cold-hardy. If you want to eat out of your garden year-round, leeks are key. Will overwinter in the ground, even in New England. Excellent for soup.
Leek, Musselburgh	annual	self-seeds	Very easy to grow heirloom introduced in 1834, near Edinburgh, Scotland. Huge thick stems, exceptional cold-hardiness. Considered the most cold hardy and dependable of all. Included in the Slow Food Ark of Taste.
Leek, Falltime tall	annual	self-seeds	Falltime is an early maturing leek - very tall too.

Leek, Scotland winter	annual	self-seeds	The Scottish heritage in this winter hardy, heirloom leek goes back many generations. These short-shanked plants have wonderful sweet flavor and tender texture perfect for creamy potato-leek soup.
Leek, Gigante d'Inverno	annual	self-seeds	Gigante d'Inverno — Giant Winter Leek. Large storage type leek. Big plant, blue/green tops, white bottoms with a bit of a bulb at the end. 120 days or so. Cold resistant.
Lettuce - please note - lettuces are quick turn arounds in pots - we cannot guarantee any particular varieties on any part			
Lettuce, Butterhead, sylvestra	annual	salad green	
Lettuce, Butterhead, alkindus	annual	salad green	
Lettuce, Butterhead, nancy	annual	salad green	
Lettuce, Cos (Romaine), Green-fusion	annual	salad green	
Lettuce, Cos (Romaine), freckles	annual	salad green	
Lettuce, Crisphead, Concept	annual	salad green	
Lettuce, Crisphead, Muir	annual	salad green	
Lettuce, Crisphead, Cherokee	annual	salad green	
Lettuce, Looseleaf, Red Salad Bowl	annual	salad green	
Mache - Cranon	annual	super cold hardy	A french winter salad green - grows in very cold temperatures
Mache - Gelber Nussler	annual	super cold hardy	A french winter salad green - grows in very cold temperatures
Mallow, Chinese	annual	salad green	

Mallow, Vegetable mallow (malva crispa)	perennial		Another nice perennial green. Big mild flavored curly edged green leaves used for salad when young, better when lightly cooked. Good digestive aid. One of the first domesticated crops in Asia over 2,500 years ago. Very productive and mildly frost resistant. Leaves are good added to soups like gumbo, as a cool weather okra substitue. It is in the same family as okra and marshmallow and adds a similar thickening element to a dish.
Mitsuba - Japanese Parsley (Cryptotaenia japonica)	perennial	herb/green	Great mild flavor - a little like a mix between celery and parsley. Very hardy - returns every year. A perennial Parsley!
Mustards - please note - mustards are quick turn arounds in pots - we cannot guarantee any particular varieties on any p			
Mustard - Mizuna Purple	annual	NA 2015 - sorry!	hot and dark purple in color. Smallish pointy leaves
Mustard - Mizuna	annual	cold hardy / heat sensitive	A spicy flavor
Mustard - Garnet Giant	annual	salad green	Large rounded leaves in a red purple color - mild flavor. The solid, rounded leaves of this baby leaf are deep purplish red color. Leaves produce their color early in the growing season and retain it through summer. With its mild but distinct flavor, Garnet Giant complements any collection of greens.
Mustard - Golden Frill	annual	salad green	Beautiful frilly yellow color - Fuller than the airy Golden Streak variety, this baby mustard green has a slightly more substantial leaf while retaining a frilly, delicate appearance. The leaves and stems are a uniform light green color and its mild spicy flavor is delicious. An easy and vigorous variety that grows from spring through late fall. Harvest baby leaves for salads or garnish.
Mustard - Ruby Streak	annual	salad green	Almost lace like - red leaves - Arguably the most attractive of all baby leaf mustards, this variety adds delicate spice and colorful elegance to a salad plate. The stems are green with fine lacy thread-shaped leaves that can range in color from green to maroon. Harvest at any stage from micro-size to full maturity.
Mustard - Osaka Purple	annual	salad green	Large tasty leaves -This broad-leafed mustard has reddish leaves. It will tolerate cold weather. Grows fast in warm weather. Both leaves and stems can be pickled, stir-fry, steamed or added to salad. The younger the leaves are picked, the milder their flavor will be. Individual leaves or the whole plant may be harvested.
Mustard - Oka Hijiki	annual	salad green	Seaweed Mustard - salty and bit succulent - great for salads or adding at the end of stir fries

Mustard - Wasabina	annual	salad green	Great for microgreens or salad mix, this dark green mustard has frilly edges and a spicy flavor. It grows 16-18" tall, is slow to bolt and stands 2 to 4 weeks longer than other varieties. Pungency mellows when cooked. This variety is an All American Selection winner.
Mustard - Spicy Green	annual	salad green	This tasty mustard green is one of the many popular salad greens from Japan. The leaves are harvested young for salad mixes or as a garnish in gourmet cuisines. The frilly leaves are mildly spicy making it a good complement to many salad dressings. Harvest at any stage depending on culinary use.
Onion, Scallion "Parade" bunching	annual	New 2017	Parade has bright white shanks with no bulbing, and dark green, erect foliage. Very uniform, upright growth makes for easy harvest and cleaning.
Onion, Scallion - "Crimson Forest" or "Deep Purple"	annual		
Onion, Scallion - HeShiKo - naturalizing scallion	perennial		This Japanese bunching onion or scallion, produce tender leaves with white 12-14" stalks. The onion has delicious, white, pungent flesh. This variety will over-winter.
Onion, Scallion - Ishikura - naturalizing scallion perennial	perennial		This is a traditional Japanese type bunching onion. At maturity, the stalk has white stems up to 20" long with 6" green leaves. The stems can grow to 1" in diameter. Be sure to eat the thinnings, as they are mild and delicious fresh.
Onion, Scallion - Kyoto Kujo Negi	perennial		This non-bulbing Japanese green onion. Kyoto Kuji Negi, is one of the Kyo-yasai, traditional vegetables, in Kyoto, Japan. It has been a part of that cuisine since the Edo period of the early 1800s. The tender leaf tapers to a height of 24", modulating in color from white to light green then dark green. It has a nice mild flavor
Onion, Scallion, Nebuka	perennial		This popular Japanese bunching onion produces 12-16" tall stalks. Without blanching, the white part of the stalk measures 2-3". Cold hardy, slow to bolt, and resistant to Pink Root, thrips, and smut. Suitable for overwintering but can be harvested at any time.
Onion, Scallion - Chinese Flowering Leek	perennial		This popular Chinese specialty herb is a vigorous perennial. It is grown for its young flower buds, long stems and slender flat deep-green blades that grow up to 14". All of these parts are edible including mature flowers and have a delicate garlic onion flavor. This variety is suitable for harvest from mid spring to early fall when grown in a greenhouse, and from late spring to late fall when grown in the field. Sufficient vegetative growth (1-2 years) plus low temperatures in winter and long summer days are needed for flowering. Generally, Chinese leek will not flower in the first growing season.

Onion, Scallion/Chive - Broad Leafed Nira Chinese Leek	perennial		This Japanese variety of Chinese leek (nira) has deep green, broad, thick leaves that have a garlic-onion flavor. It is also referred to as flat chives. Its tolerance of heat and cold makes it very easy to grow. Likes full sun and will also thrive in half shade. Once the plant is established, it can be divided and raised for several years. Excellent choice for home garden and commercial growing. Can also be used to grow the delicate yellow blanched Chinese leek.
Onion, bulbing - Madalyn F1	annual	New 2017	New! Dependable, organic short-day onion. Jumbo globe- to elongated globe-shaped yellow bulbs with mild to slightly pungent flavor. Early midseason maturity with moderate bolting tolerance. For short storage (2-3 months).
Onion, bulbing - Redwing	annual	long day	Round medium pink-red onion
Onion, bulbing - Tropea Rossa Lunga	annual	long day	Long style red onion
Onion, Red Torpedo - Rossa Lunga di Firenze	annual	long day	Long Red Onion - very dependable
Onion, bulbing -Di Maggio Mini White (Cipollini)	annual		Small, flattened onions - Avg. 2-3" diameter x 1 1/2" depth. White cipollini onions - great harvested young with green tops, or mature, dried in braids. We trialed several strains from Italy to find the best. Mild flavor. Limited storage.
Onion, bulbing - Sierra Blanca	annual	long day	Big, mild white onions. Widely adapted, day-neutral, and matures well anywhere in North America from spring sowing. Suitable for fall planting where short-day onions are normally grown. Produces uniform, large, white-skinned onions with mild flavor and thick rings. Not for long storage.
Onion, bulbing, New York Early	annual	New 2017	Classic yellow O.P. strain. Maintained and reselected by Johnny's. One of the more dependable and productive early onions. Medium-large, blocky, firm, yellow onions are early and suited to medium-term storage. Its flesh is more tender than the extra-hard, long storage varieties.
Onion, bulbing, Cortland	annual	New 2017	Large, blocky-round, uniform onions with thin necks that will dry well. Very hard with a thick, rich brown skin for good storability.
Onion, Ailsa Craig			Huge, mild onions. A distinct strain of the classic sweet and mild Ailsa Craig, this line has been specifically selected to perform in organic management systems. Mild onion with excellent size potential. Jumbo to colossal, round to teardrop-shaped bulbs with light-yellow skins. Use fresh or for short-term storage.

Onion, Gold Coin (Cipollini)	annual	New 2017	Very flat, yellow. Matures to a small-medium, yellow cipollini onion, avg. 1 1/2-3" diam. x 3/4-1" depth. Pungent, but deliciously sweet when cooked. For bunching or braiding. Stores well.
Onion, Egyptian Walking	perennial		Will naturalize readily -
Orach, Aurora	annual	New 2017	An amazing rainbow of bright and unusual colors really jazzes up summer salads and vegetable plates: red, gold, green, pink, carmine, and purple. The leaves have a shimmery radiance that you really have to see. BOTANICAL NAME: <i>Artiplex hortensis</i>
Parsley (Curly)	biennial	herb/green	Parsley is a wonderful superfood. I like curly parsley when used in raw salads. Fabulous source of rutin, which strengthens veins and builds cell walls.
Parsley (Flat or Italian)	biennial	herb/green	Parsley is a wonderful superfood. Flat Leaf is the same as Italian Parsley. Fabulous source of rutin, which strengthens veins and builds cell walls.
Parsley Giant of Italy	biennial	NA 2016	Parsley is a wonderful superfood. My favorite is this Giant Leaf Italian Parsley. It has great vibrant flavor yet never overpowers the recipes no matter how much I add! Fabulous source of rutin, which strengthens veins and builds cell walls.
Peas - we usually recommend planting peas as seeds directly into the ground as early as possible in the year - we aim for 3/17. But there are some super-exciting varieties that we couldn't help but offer to you in pots for planting out now!			
Pea, Golden Sweet	annual / soil builder	New 2017	Lemon yellow pods Vines grow to 6 feet Bi-colored purple flowers Pods best eaten when small Dried peas can be added to soups Edible podded pea
Pea, Oregon Giant Snow Peas	annual / soil builder	New 2017	

Pea, Tom Thumb	annual / soil builder	New 2017	Plants grow to 8 inches - we'll be selling these in pots that won't need transplanting! Just pop them onto your patio table and snack away! Good for container gardening Able to withstand hard frosts Shelling pea
Potatoes - German Butterball	annual	"seed" potatoes	Introduced by David Ronniger in 1988, this creamy and yellow fleshed potato will surely win you over. This mouth watering potato even won first place in Rodale's Organic Gardening "Taste Off". 100+ days, late-season. Creamy yellow flesh. Great baked or any way you like it
Potatoes - Yukon Gold	annual	"seed" potatoes	Creamy yellow - we've been growing these every year and love them.
Potatoes - Variety of Fingerlings - Various colors	annual	"seed" potatoes	Fingerlings grow fast and abundantly - they are small but their skins are tender and tasty and add crazy color to any dish. I usually cut them in half lengthwise, toss them with olive oil or melted butter, sprinkle with sea salt and black pepper and chopped rosemary and bake in the oven.
Potatoes - Purple Majesty	annual	"seed" potatoes	This purple inside and out potato is loaded with Anthocyanidins, nearly twice the amount found in any other produce item at a fraction of the cost. 80+days, mid-season. Nice uniformity and yield. Great baked or fried.
Potatoes - Purple Viking	annual	"seed" potatoes	This was a new potato for us last year - and we fell in love - bright white, super-delicious on the inside. Dark purple on the outside, but with crazy pink splashes. These grew prolifically and large. They are also known for being Drought resistant. 65+ days, early season.
Puntarelle, Uprising Version	annual	limited number in spring - lots at our "Second Spring" Sale	
Puntarelle, Catalogna Puntarelle a Foglie Stretta (thin-leafed)	annual	limited number in spring - lots at our "Second Spring" Sale	
Puntarelle - Cicoria Galantina Puntarelle Sel. Larosa Tard.	annual	limited number in spring - lots at our "Second Spring" Sale	

Puntarelle - Galantina Asparagus Chicory	annual	limited number in spring - lots at our "Second Spring" Sale	
Radicchio di Castelfranco	annual	limited number in spring - lots at our "Second Spring" Sale	A gorgeous light colored radicchio - mild flavor - Radicchios do best planted in late summer and harvested in fall / early winter.
Radicchio, Rossa di verona	annual	limited number in spring - lots at our "Second Spring" Sale	A pointy traditionally colored radicchio - Radicchios do best planted in late summer and harvested in fall / early winter.
Radicchio, Rossa di treviso precoce	annual	limited number in spring - lots at our "Second Spring" Sale	A pointy traditionally colored radicchio - Radicchios do best planted in late summer and harvested in fall / early winter.
Radicchio, Rossa di chiogga	annual	limited number in spring - lots at our "Second Spring" Sale	A pointy traditionally colored radicchio - Radicchios do best planted in late summer and harvested in fall / early winter.
Radishes - are best grown direct seeded into the garden			We don't sell radish seedlings as they do best if direct seeded or sown directly into the ground as seeds rather than transplanted.
Romanesca Broccoli - Veronica	annual	cold hardy	Fabulous pointy spirals - chartreuse colored heads cauliflower-like but so much more
Salad Burnet	perennial	herb/green	Everyone needs to have a salad burnet plant. Very hardy. One of the first green things to eat. And it has a lovely cucumber flavor. I put a handful in a pitcher of ice water and let it seep about an hour - it makes very tasty cucumber-flavored water months before you'll harvest any cucumbers!
Samphire	perennial	NA 2015 - sorry!	A beautiful hardy clumping plant. Not used so much for herbal reasons; more ornamental. Very limited availability this year.

Sea Kale "Lily White"	perennial	cold hardy	A perennial kale or cabbage - succulent rosettes - a bit tender at times though
Sorrel, Red-Veined (Bloody Dock)	perennial	herb/green	Stronger lemon flavor than the regular French Sorrel. Gorgeous plant, also perennial.
Sorrel, Sauerampfer Belleville	perennial	herb/green	One of the first greens to come up in early Spring. A perennial salad green. Lemony fresh flavor. Very special salad ingredient. Flavor loses something when heated too much.
Spinach - Emu	annual	cold hardy / heat sensitive	Emu - super slow bolt
Spinach - 7 Green F1	annual	cold hardy / heat sensitive	Emu - super slow bolt
Spinach, Red Kitten	annual	cold hardy / heat sensitive	Red colored Spinach
<b>See alternative spinaches on Warm-Weather Vegetable List</b>			Swiss Chard is a wonderful alternative to Spinach - Chard is much easier to grow, thriving in cool as well as warm weather.
Swiss Chard, Broad stem Green with White Ribs - "Fordhook"	annual / biennial for seed production		Traditional White Stemmed variety. Very large leaves. Big succulent stems.
Swiss Chard, Rainbow 'Bright Lights'	annual / biennial for seed production		A mix of beautiful colors - full of antioxidants! Pink, Magenta, Yellow, Peach, Orange, Dark Red.
Swiss Chard, Fantasia Orange	annual / biennial for seed production		Brilliant carotene-rich Chard
Swiss Chard, Umaina	annual / biennial for seed production		Japanese Swiss Chard - performs well in hot weather - a lower more rosette-like style
Swiss Chard, Perpetual	annual / biennial for seed production	New 2017	Frost and bolt resistant, needs water after a dry spell. Popular in Europe, hard to find in the US. Perennial in zones 6 and above, or zone 5 if winter drainage is excellent.
Swiss Chard, Rhubarb	annual / biennial for seed production		Japanese Swiss Chard - performs well in hot weather - a lower more rosette-like style
Turnips - are best grown direct seeded into the garden			We don't sell turnip seedlings as they do best if direct seeded or sown directly into the ground as seeds rather than transplanted.

Tyfon-Holland Greens	perennial	cold hardy	A perennial spinach alternative - usually naturalizes in the yard. Great fodder for chickens.
