

## **BRIDGE LAWS**

**States that are NOT listed have no restrictions on axle lengths, refer to your atlas for updates**

Alabama	41' maximum distance between kingpin and the center of real axle assembly on trailer
California	40' maximum distance between kingpin and the center of real axle assembly on trailer
Connecticut	43' maximum distance between kingpin and the center of real axle assembly on trailer
Florida	41' maximum distance between kingpin and the center of real axle assembly on trailer
Illinois	42' 6" maximum distance between kingpin and the center of real axle assembly on trailer
Indiana	43' maximum distance between kingpin and the center of real axle assembly on trailer
Maine	43' maximum distance between kingpin and the center of real axle assembly on trailer
Maryland	41' maximum distance between kingpin and the center of real axle assembly on trailer
Michigan	41' maximum distance between kingpin and the center of real axle assembly on trailer
Minnesota	43' maximum distance between kingpin and the center of real axle assembly on trailer
New Hampshire	41' maximum distance between kingpin and the center of real axle assembly on trailer
New Jersey	41' maximum distance between kingpin and the center of real axle assembly on trailer
New York	41' maximum distance between kingpin and the center of real axle assembly on trailer
North Carolina	41' maximum distance between kingpin and the center of real axle assembly on trailer
Pennsylvania	41' maximum distance between kingpin and the center of real axle assembly on trailer
Rhode Island	41' maximum distance between kingpin and the center of real axle assembly on trailer
South Carolina	41' maximum distance between kingpin and the center of real axle assembly on trailer
Tennessee	41' maximum distance between kingpin and the center of real axle assembly on trailer
Utah	41' maximum distance between kingpin and the center of real axle assembly on trailer
Vermont	41' maximum distance between kingpin and the center of real axle assembly on trailer
Virginia	43' maximum distance between kingpin and the center of real axle assembly on trailer
West Virginia	37' from tractor rear axle to trailer first axle cannot exceed 37' (max 41' from kingpin to center of trailer axles is ok)
Wisconsin	43' maximum distance between kingpin and the center of real axle assembly on trailer
