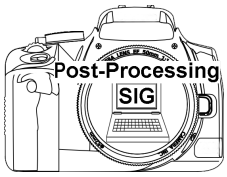
February 2017

- How Do I Do That In Lightroom/Photoshop?
- Introduction to Lightroom Collections (Pete/Mac)
- Building Photo/Video Slideshows
  - Simple Slideshows and Videos in Lightroom (Pete)
  - Other Slide Show Programs (Pete)
  - Building the Africa Slideshow for TWCC (Mac)
    - Microsoft Powerpoint
    - Apple Keynote
    - Adding a soundtrack



Lightroom Slideshows

Starting Point: **Collections**
Running Slideshow:
In Lightroom
As a Video
As an Adobe Acrobat File (PDF)

Pete Poulsen
February 2017

What are Collections?

Think of collections as albums or groupings of photos

Photos remain in original file folder; collections point to the photo location

Simple collections - You add the photos

Smart collections - LR automatically adds photos based on your instructions

Quick collections - Temporary collections you create as needed (i.e. previous import)

Photos can be included in multiple collections

Edits done in collections are also reflected in original folder; Virtual copies in collections are also placed next to original photo in original folder

Why Collections?

Organize photos by subject, location, etc from multiple file folders without moving or copying

Group collections into a collection set to streamline workflow or create multiple layers of organization

Select photos for sharing, **slide shows**, photo books, printing, shows, annual best, etc.

Required to bring photos (and videos) into a slideshow

Why a Lightroom Slideshow

Quick and “easy” without exporting individual photos

Make multiple slideshows with photos from multiple folders using Collections

Exportable to easy sharable PDF slideshows

Exportable to sharable video

Include video clips

Creating a Lightroom Slideshow

Select your photos for the slideshow
Tip: Make a collection of the selected photos

Arrange the photos in order for the slideshow

Customize the slideshow (right panel)

Preview or Play the slideshow

Export the slideshow

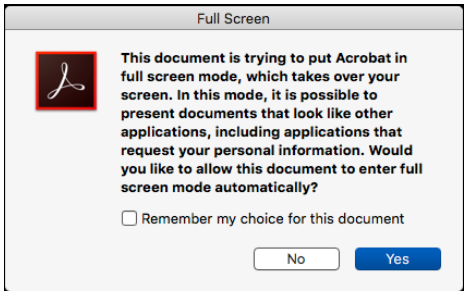
- MP3 Video
- Acrobat PDF

PDF Slideshow Notes

Playback settings don't apply in PDF slideshows.

Slide duration and fade transition are fixed in PDF slideshows.
Music does not play in PDF slideshows

Full screen notice



Other Slideshow Programs

VideoWin Movie Maker 2016

VideoWin Movie Maker is a video creating/editing software application, designed for Windows 7, 8, 10, XP, Vista. Download the Best Windows Movie Maker Software for making your own movies.

Key Features

- With VideoWin Movie Maker, it's easy to organize and select the photos and videos you want to use in your next movie.
- With VideoWin Movie Maker, you can add text, transitions, effects, and more. Change as much as you want, or let Movie Maker do it for you.
- Post your movie to your favorite sites—including YouTube, Facebook, Windows Live SkyDrive, and many others, right from VideoWin Movie Maker.

Download Information

Operating System: Windows XP, Windows 7, Windows 8, Windows 10, Windows Vista
Version: 2016.2.0.0
Software Price: Free Trial

iMovie

Turn your videos into movie magic.

With iMovie for iOS and macOS, you can enjoy your videos like never before. It's easy to browse your clips and create Hollywood-style trailers and stunning 4K-resolution movies. You can even start editing on iPhone or iPad, then finish on your Mac. And when you're ready to premiere your movie on all your devices, iMovie Theater rolls out the red carpet.

African Safari Slide Show

PowerPoint
Keynote
Adding Audio

Mac Rodgers
February 2017

Production Decisions

Emphasize **entertainment** over **education**

Focus on the images and their subjects

Use moderation in choice of transitions and animations

Keep video clips short and relevant to the adjacent images

Ruthlessly maintain a fast pace

- Quick, smooth transitions
- Weed out repetitive images - but maintain full coverage of participants' contributions

Creative Decisions

Group images into major themes

- Landscapes
- Elephants
- Lions
- Other animals
- Other big and small cats
- Birds
- The people of Kenya and Tanzania
- Our safari adventure

Tie music to visual themes

Basic Steps

Agree on approach
- Slide show of participants favorites
- Approx.10 minutes, fast paced
- Music
- Video clips

Gather, review and sort resources
- Images & videos
- Collect potential music tracks

Load images and video clips into a new presentation
- Start with one image per page - just get them into the deck

Apply titles, credits, slide formats, transitions, and animations

Convert slide show to a video to lock in timing

Open a new project in **Garage Band** or similar

Add slide show video to the Garage Band time line

Add tracks containing music songs or clips

Synchronize music to desired slide transitions

Export audio to video slide show

The Results

The Gathering Place Presentation

MS PowerPoint for Mac: Client uses PC

Limited time: no videos, simple transitions

Music added with multiple files

Slide timing varies with computer and RAM loading

Conversion to video not satisfactory

The WCC Safari Presentation

Apple Keynote: Better transitions and animations

Added videos and more transitions

Music added as a single stream with multiple tracks

Conversion to video preserved timing and sound, reduced size

Demos/Examples

PowerPoint

Audio files - Introducing GarageBand

Video limitations

Keynote

Scale and move

Including video clips

Convert to video

Build a sound track
