Happy Holidays

THE GIFT OF GIVING

What better gift than one that endures and keeps on giving. A gift of a living plant will brighten the lives of most anyone on your shopping list – it brings joy, purpose, and reward to the recipient. The result will surely be a gift to your own heart. So think about that special person and share a bit of nature this year. Stop by our Propagation Area for your Holiday Living Plants and our December Plant Specials.

NEW 'LANDSCAPING ADVISORY COMMITTEE'

We are happy to announce that our Board of Directors has approved a Landscaping Advisory Committee. The committee will be working on the architectural design of the Gardens, planning plant material and landscape sites as well as maintenance standards, and assisting with education programs.

The first project is underway – a redesign of the area you first see as you exit the Pavilion to go into the Gardens. This area will be used for Seasonal

PRESIDENT'S MESSAGE...

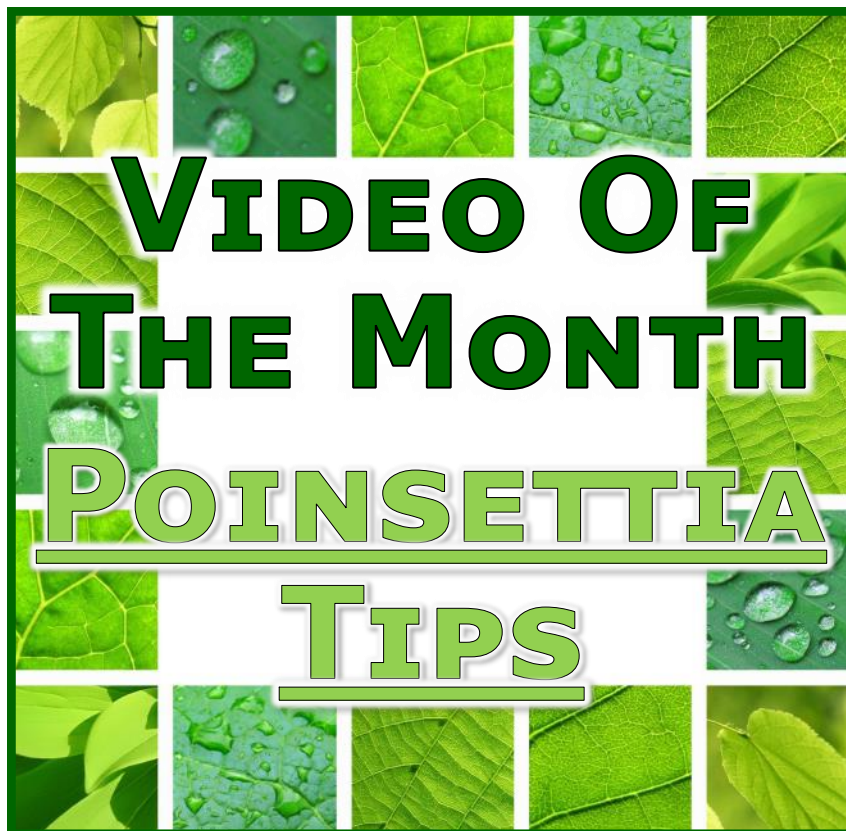

Time.. Simply stated, there isn't enough of it and what we have appears to be moving faster. Our PSL Botanical Gardens is looking at another year end in a few short weeks.

One reality of December 31 each of us experiences is reviewing our personal position with taxes and giving. I ask that you might consider the PSL Botanical Gardens when you review your gift-giving program this year. The Friends of the PSL Botanical Gardens, it's volunteers and members, are committed to continuing the mandate given us by the City and its residents – to provide an enjoyable, relaxed and educational experience to all who visit. To provide a beautiful venue for family celebrations, holiday picture taking, workshops and continuing education; increasing the quality of life here in Port St. Lucie.

Please visit our website for additional information. And Happy Holidays, everyone!

Joleen King
President

HELPFUL HINTS (tips) FROM HORTENSE...

Port St. Lucie
Botanical Gardens
Florida

COFFEE STAINS - To remove coffee (or tea) stains, rinse area with cold water immediately. Rub in a couple of drops of a mild, White dishwashing liquid and rinse well. Then treat with a mixture of one-part white household vinegar and three-parts water. Rinse again and launder as you normally do. Note: If cream was used in the coffee, you may have to sponge the stain with dry-cleaning fluid.

CRANBERRY STAINS - To eliminate cranberry stains, scoop up as much of the sauce as you can—as quickly as you can—and then rinse with cold water. Pretreat the stained area and then wash - as the care label for the fabric indicates.

CANDLE WAX - To get rid of candle wax from the tablecloth, let the wax harden—a quick way is to put it in the freezer. Then scrape it off the tablecloth with a dull knife. Place paper towels on both sides of the stain and set the iron on the warm setting, then iron (no steam) over the stained area. Change the towels often to absorb all of the wax. Launder as usual.

GRAVY - To clean up gravy, spoon it up as fast as you can. Sprinkle artificial sweetener or flour over the stained area to absorb the grease. Put the tablecloth into a sink and soak in a mixture of one teaspoon of a mild, colorless detergent with each cup of lukewarm water for at least 20 minutes. Then wash as usual and let air dry—don't put in the dryer.

RED WINE - To remove red-wine stains, pour a big dose of salt on top of the stain to absorb the liquid. Put the tablecloth into cold water and try to rub out the stain. Use an enzyme detergent in the hottest water safe for the fabric, soak for 30 minutes and launder.

*HORTense takes no responsibility for her claims. And furthermore, she is penniless so don't try suing her...

Displays. Wait until you see the 'WOW' factor they are creating – the first will be a holiday theme with lots of color.

Future projects include designing the enhancement of the Rose Garden and the Secret Garden.

The committee is currently comprised of Co-Chairs, Paul Renwick & Maureen Reilly, Brenda Gustafson, Laurie Hart, Jeff Policar, Tim Sutton and Rich Zwack. They will be calling on members for their expertise in the Gardens and would welcome your thoughts and suggestions.

MISSION

The mission of the Landscaping Advisory Committee is to assist the Horticulture Committee with the architectural design and vision of the Gardens while continuing the development and maintaining of plant collections, education, research, conservation and enjoyment.

University of Florida IFAS Extension
Central Florida Gardening Calendar — November

What to Plant

Perennials: Divide and replant overgrown perennials and bulbs now so that they establish before the coolest weather arrives. **See** *Seeds and Propagation (Lawn and Garden)*: http://edis.ifas.ufl.edu/topic_garden_propagation

Lawns: Watch for brown patch and large patch until May. These fungal diseases cause areas of grass to turn brown. Since treatment is difficult, prevention with proper cultural practices is key. **See** *Turf Diseases*: http://edis.ifas.ufl.edu/topic_turf_diseases

Scale insects: Take advantage of lower temperatures to apply horticultural oil sprays to control scale insects. **See** *Landscape Pest Management*: http://edis.ifas.ufl.edu/topic_landscape_pests

Irrigation: Turn off systems and water only if needed. Plants need less supplemental watering in cooler weather. **See** *Landscape Irrigation*: http://edis.ifas.ufl.edu/topic_landscape_irrigation

Poinsettias: Watch for hornworms on poinsettias planted in the landscape. This pest can quickly defoliate a plant. Handpick or treat only the infested area. **See** *Poinsettias*: http://edis.ifas.ufl.edu/topic_poinsettia

What to Do

Annuals/Bedding plants: To add color to the winter garden, plant masses of begonia, impatiens, and geranium. **See** *Annuals*: http://edis.ifas.ufl.edu/topic_annual_landscape_plants

Bulbs: Amaryllis is a popular plant for the holiday season. It can be forced to bloom now or planted outdoors for spring blooms. **See** *Bulbs for Florida*: http://edis.ifas.ufl.edu/topic_bulbous_flowers

Herbs: Plant herbs that thrive in cool weather. Some examples include parsley, thyme, sage, dill, fennel, and cilantro. **See** *Herbs*: http://edis.ifas.ufl.edu/topic_herbs

Vegetables: Reliable cool-season vegetables to plant this month include broccoli, carrots, kale, green onions, and others. **See** *Vegetable Gardening in Florida*: http://edis.ifas.ufl.edu/topic_vegetable_gardening

HEARD AROUND THE GARDENS

"Thank you for providing such a beautiful place for our community to enjoy. We are blessed each time we are allowed to use the facility and are grateful to God for our years of friendship!" -Crosstown Chapel

"... My staff and I had a fantastic time. BOOtanical was an ingenious idea for all of our families with small children looking for a place to go Trick-or-Treating. I can't tell you how many parents, with big smiles, thanked us for participating in this incredible event. The joy on the children's faces as we handed them candy is a memory I will cherish forever. Thank you again letting us be a part of the special occasion and thank you for all you do for the Botanical Gardens of Port St. Lucie. Your hard work and dedication is appreciated more than you will ever know. You are a part of what makes St. Lucie County a great place to live!" - Gayle Harrell, Florida House of Representatives, District 83

"..... truly amazed and very impressed with what you are doing in the propagation area with propagating and selling plants from your very own gardens. Havn't seen that in California or other places visited. Definitely bringing it back to San Francisco." - Caleb of San Francisco as told to Brenda Gustafson

GARDEN OF THE MONTH: CACTUS & SUCCULENT GARDEN

MAINTAINED BY FRIENDS OF THE PORT SAINT LUCIE BOTANICAL GARDENS

The initial dream of a Cactus and Succulent Garden is attributed to the late Richard Laub, one of our Founding Members. Tony Jonek carried that dream to reality and still today nearly single handedly maintains and refreshes the garden. Stop by, take the time to really see the many and varied types of cacti and succulents in a unique artistic garden setting.

Volunteer at the Friends of the Port St Lucie Botanical Gardens

PROPAGATION

Assist with propagation, plant sales and all areas of propagation techniques.

No experience needed. Bring gloves and clippers.

Thursday – Saturday 8:30AM – 12PM in the Propagation Area.

Please call Brenda Gustafson at 772-678-8523.

Center & Gift

If you enjoy greeting and meeting 'The Gardens' guests, handing out informational materials, answering the telephone and assisting with questions and requests this is the place for you. Assist in the selection and sales of books, gifts and other merchandise. Capable of handling money and accountable for gift shop receipts. Ability to work well with other volunteers and the public. Open Wednesday – Saturday – 10AM-4PM, Sunday 12AM-4PM. No experience needed. Retail experience in Gift Shop a plus.

Please Call Illona Christie at 772-337-1959.

HORTICULTURE KNOW HOW...

Friends of the Port St. Lucie Botanical Gardens Horticulture Class Series 2016 Annual Poinsettia Handout

1. Poinsettia's are cultivars of *Euphorbia pulcherrima*, a shrub or small tree native to Mexico and Central America. It was introduced to the US by Joel Poinsett who was the US Minister to Mexico in 1825. It is a member of the spurge family. It is a shrub or small tree growing in seasonal dry forests as understory and grows from 2 to 16 ft. tall. The ones I have seen blooming naturally in the islands and in Mexico were 8 to 10 ft. tall, with long flexible stems with the bracts at the ends. They were in their dry cycle and so had no leaves just bracts. They sort of looked like flying red flowers.
2. Plant care - These are tropical plants. They do not like conditions below 60 degrees, wind, salt, or high variations in soil moisture. They wilt easily and will drop their leaves if subject to high soil moisture variability and hot or cold drafts. They do best in a house if they can get some sunlight every day.
3. If given somewhat protected conditions the red bracts can last for weeks. The bracts are actually colored leaves; the flowers are the small yellow or green tufts in the center of the bracts.
4. To re-flower or reuse your poinsettia follow these directions: Throughout the winter, keep the plant somewhat dry and do not fertilize until the weather warms in spring.

After the weather has begun to warm, cut off the fading bracts, leaving 4-6 inches of the stem on each branch. When new growth begins fertilize lightly, repot if necessary to a slightly larger container. Be sure and use potting mix which drains well. Poinsettias dislike soggy mix. Move the plant to an area with partial shade.

5. To use in a shrub border, select a location that is well drained, receives partial sun, and has some wind protection. In addition, if you want consistent flowering, you need to select a location that does not have outside night lighting.
6. To encourage re-flowering - In July cut the plant back to about 1/2 the height you want for your holiday decorations. On October 1st, begin 14 hours of uninterrupted darkness each night, every night without interruption, and continue this until the holidays arrive. Even a flash of light for a few seconds will interrupt the cycle and delay flowering. Your re-flowered bracts will probably not be as large or as perfect as the commercial ones because you will probably not be providing perfect fertilizer applications nor applying a variety of pesticides.
7. Toxicity - Despite the rumors, these are not terribly toxic plants. Recent research indicates that it would require the consumption of many pounds of plant materials to produce more than an upset stomach. However, members of the spurge family have white sticky sap which a small percentage of the population finds to be irritating. So don't eat your poinsettias and when you are working with them keep the sap off of your skin.

*Merry Christmas,
Happy Hanukkah
& Happy Holidays!*

Horticulture How-To Series: **Creating Holiday Wreaths**

Port St. Lucie Botanical Gardens

Saturday • December 17, 2016

10:00 - 11:30 am

In The Propagation Area

3 Designs that will make your door sparkle. Get in the Holiday Spirit and join us for a Wreath making demonstration.

What You Will Learn:

- How to design 3 different stunning wreaths
- Step by step demonstration on how to make and personalize your own wreath
- How to use simple supplies found in your yard and your home to create an eco-friendly, upcycled wreath

PAUL RENWICK, a Port St. Lucie Botanical Gardens Member and volunteer will be demonstrating 3 different Holiday Wreath Designs. Paul has been very active at the Gardens assisting in the propagation area and as Co-Chair of the new Landscape Advisory Committee and is working with the committee developing a new display for the back entrance to the Gardens creating a "WOW" factor. He is also responsible for creating the stunning floral designs exhibited on the central table of the Pavilion. A multi-talented volunteer, Paul owned and operated a flower and design shop in Alameda, California for over 25 years'. He was chosen to create the Presentation Bouquets, flower arrangements and decorations for the 1992 World Skating Championships, held in Oakland, California. Now retired, Paul continues to practice his talents where he finds opportunities. Be sure to attend this great workshop.

**This workshop will be held in conjunction with
Delights of December Plant Sale**

Cost: PSLBG Members - **NO CHARGE** • Non-Members - **\$10**

Become an individual FPSLBG member for \$25 and you can attend the event **FREE!!**

[CLICK HERE TO REGISTER](#)
